Duck Creek Billing™ Features Overview

A powerful and robust set of features brings the best of modern technology to Duck Creek Billing™, reducing the overall cost and complexity of customer billing operations. Fully integrated with the EXAMPLE Platform®, Duck Creek Billing™ meshes seamlessly with EXAMPLE Express®, providing an intuitive and easy-to-use experience for all users of the system, from policy agents and customer service representatives to billing administrators.

Duck Creek Billing™ is:

- A receivables management tool with an integrated rules engine.
- A customer service tool with intuitive account and payment management features in a state-of-the-art user interface.
- A set of out-of-the box "real-world" account plans and invoices.
- A full feature system including single policy direct bill, consolidated account billing, low-volume agency billing, and third-party billing functionality.

Duck Creek Billing™ supports Personal, Commercial, and Specialty lines, and integrates role-based security to allow users to define security groups, manage group memberships, and associate maxtrixed permission sets with individuals and groups.

Topics included in this overview of Duck Creek Billing™ features include:

- Essential features
- The user interface
- End-user functionality
- System requirements

How Duck Creek Billing™ Works

Although Duck Creek Billing™ is based on real-world billing scenarios, it is highly customizable and configurable to accommodate individual user requirements. Each account plan is governed by account level settings, and each policy associated with an account is governed by the specified policy level settings.

Account level plans specify:

- Rules based on specific countries, states/provinces, bill classes, etc.
- Billing frequency
- Follow-up rules for past due invoices
- Invoicing
- Payment allocation for items billing under the account
- Suspense processing
- Scheduling for bill items

Policy level plans specify:

- Rules based on specific countries, states/provinces, lines of business, account rules, etc.
- Policy billing frequency and down payment information

- Payment allocation within each policy term
- Non-payment cancel rules
- Rescind cancel rules
- Scheduling philosophy for missed installments (spread vs. catch-up)
- Commission processing
- Follow-up activities for each policy term

Essential Features

The following essential features associated with the core functions in Duck Creek Billing™ are described in additional detail:

- Installment plans and receivable management processing
- Invoices
- Payments
- Follow-up activity
- Collections support
- Disbursement and refund authorization and management
- Commission processing, distribution, and payment support
- Policy administration support
- Reporting Services
- Databases
- Account balancing and internal controls

Installment Plans and Receivable Management Processing

The Duck Creek Billing™ scheduling process automatically establishes billing and installment due dates and amounts for an account based on customized billing plan parameters. By applying customized billing plan rules for each carrier, the Duck Creek Billing™ system:

- Establishes billing frequency
- Calculates installments
- Establishes invoice dates and corresponding due dates
- Determines payment windows

The installment scheduling process occurs as an automated, non-attended event, triggered when a collection of receivables has posted to the billing system.

The installment plans and receivable scheduling features allow the user to:

- Receive or require down payments and schedule the remaining due
- Set up installment billing options
- Change collection method mid-term
- Process mid-term endorsements

- Automatically recalculate installment amounts as changes happen in the policy term
- Make payment plan changes at any time within carrier-configured guidelines
- Receive payments for policy events before the billing system is notified of the event
- Process multiple events for the same policy on the same day
- Process early and late-entered policies
- Spread or catch up late entered policies
- Process equity-date-based calculations with or without charges and fees
- Allow for gaps in policy coverage
- Automatically allocate payments according to the rules you specify
- Automatically allocate excess funds from overpayments according to the rules you specify
- Manually hold unallocated funds in suspense
- Automatically respond to underpayments according to the rules you specify
- Manually redirect funds to meet each customer's needs

Invoicing

The production of billing invoices is typically a high-volume, automated process occurring daily. Duck Creek Billing™ automatically generates a variety of invoices and specialized billing statements for delivery to the billing account holder.

Invoicing features include:

- Easily customizable paper or electronic invoices created as Adobe PDF or Excel documents
- ManuScript-driven forms production allowing for the generation of forms from Microsoft Word or PDF templates
- Invoices configurable to the required level of detail according to your needs (for example, state, LOB, program, etc.)
- Invoices that can be configured to show only summary information
- Ability to generate credit card style invoices
- Prior payment and account history are included on the current invoice
- Ability to break out account charges and fees display in any configuration
- Configurable minimum invoice thresholds
- Configurable time between invoices based on due date
- Ability to generate duplicate invoices
- Automatically re-bill for non-sufficient fund payments, including associated charges
- Third-party integration for credit card and EFT interfaces
- EFT functionality including:
 - Ability to adjust the date for a pending EFT draw up to the date the transmission is sent to the bank
 - Ability to cancel a pending EFT draw
 - Ability to process an out of cycle bill for late entered policies
 - Masking of all but the last four digits of the EFT bank account number for security
 - Details of all EFT transactions are maintained, even if the bank account information changes

To view a sample invoice, see *Sample Invoice*.

Payments

The Duck Creek Billing™ system offers a receivables management system that receives payments, associates them with the proper account, and automatically allocates each payment to the appropriate premiums, premium-related charges or discounts, or non-premium related items such as charges or fees.

The following payment types are accepted by Duck Creek Billing™:

- Cash
- Check
- EFT support for ACH (US) or BACS (UK) payments
- Credit card
- Debit card
- Pre-authorized credit card
- Pre-authorized debit card
- Lockbox

Payments may be entered manually, or may be received electronically through a third-party electronic funds transfer or lockbox services through system configuration.

Duck Creek Billing™ payment management features allow you to:

- Change the payment method at any point during the policy life cycle.
- Reverse a payment from the system due to insufficient funds, payment entry error, or other reason.
- Suspend previously applied payments to hold for transfer, write off, manual allocation, or disbursement.
- Set due dates based on policy effective date for single policy accounts.
- Catch up or spread late-entered policies based on rules you configure.
- Process and schedule endorsements according to the rules you specify.
- Automatically recalculate installment amounts when changes occur in the policy term.
- Establish legal notice number of days when required.
- Support cash with application payments.
- Accept or deny payments on policies in pending cancellation or canceled status based on a configurable number of days.
- Automatically process payment allocations based on configured rules and priorities.
- Process multiple events for the same policy on the same day.
- Process early or late-entered policies.
- Manually allocate payments according to configurable rules.
- Validate data and verify batch payment management.
- Combine payment batches from individual operators.
- Accept batch payments from multiple sources.
- Allocate excess funds from overpayments according to configurable rules.

Follow-Up Activities

When an invoice becomes past due, Duck Creek Billing™ automatically initiates a series of automated, customized follow-up activities that attempt to collect the delinquent amounts.

Carriers pre-define specific follow-up activities for both the policy level and account level. Account-level actions typically include the generation of invoice reminder notices and the creation of late charges. Policy-level activities include Cancel-Pending, Cancel, and Rescind-Cancel Pending transactions.

Follow-up activities allow the user to:

- Define timing and content of follow-up notices.
- Send copies of notices to other affected parties automatically.
- Send reminder and pending cancellation notices.
- Assess billing charges and fees including service charges, late fees, and penalty fees.
- Generate automatic recessions within a configurable number of days.
- Generate automatic reinstatements within a configurable number of days.
- Configure amount tolerances on pending cancellations (amount or percent).
- Automatically write off unpaid amounts due according to configurable thresholds.
- Process write off and collections activities on canceled and expired policies.
- Process pending cancellation triggers based on equity-based calculations with or without charges or fees.
- Allow for gaps in policy coverage.
- Calculate the APR for a policy term.
- Send copies of legal notice of cancellation to multiple parties.
- Adhere to state-mandated regulations for automatic cancellation processing.
- Automatically prevent cancellation notices when close to policy expiration date.
- Send a trigger to the policy administration system when a policy should be pre-canceled.
- Configure the timing of follow-up activities to adhere to state-mandated regulations for automatic cancellation processing.
- Automatically prevent pending cancellation notices when close to policy expiration date.
- Suspend or write off disbursements under a specified minimum amount.
- Use the customizable manual letter generation link to access customer-defined letters for processing by a third-party interface.

Collections Support

Duck Creek Billing™ collections support features allow you to manage internal collections activities and provide policy-level-based collections support.

With the available collection features, the user may:

- Move canceled or expired policies into collections based on delinquent days and premium owed.
- Automatically suspend normal billing activities for policies entering collections status.
- Allow the assignment of special installment plans to improve your ability to collect.
- Adhere to standard accounting rules to properly report on receivables in collections.

- Define specific payment allocation rules for collections premium.
- Configure specific follow-up options for collections premium.
- Automatically remove a policy from collections based on carrier-defined rules.
- Manually remove a policy from collections.

Disbursements and Refund Authorization and Management

Duck Creek Billing™ disbursement features allow for automatic or manual handling for all of your disbursements and refunds. The server request processes a pre-defined quantity of disbursements, and then reschedules itself for processing future disbursements based on the configuration settings specified.

Disbursement features allow the user to:

- Automatically disburse excess funds according to customized rules.
- Configure automatic disbursement limits.
- Automatically write off refunds below configurable thresholds.
- Refund disbursements to the payment source.
- Control who can manually disburse funds.
- Optional two-tier disbursement authorization for specified limits.
- Manually issue refunds on demand.
- Manually refund to the payment source.
- Re-bill a disbursement.
- Reverse a refund before it is issued.
- Re-bill honored refunds automatically or manually.
- Name an alternate payee for a specific disbursement without changing the default payee for the account.
- Utilize the expense payment method to refund miscellaneous expenses automatically or manually, or apply to the outstanding amount due on the payee's account.

Commissions Support

Out-of-the-box commission plans provide a variety of options for commission payment that can be customized to meet any carrier's needs. Agent commission accounts specify how commissions are paid at the various levels of a multi-tier commission plan, and allow commission statements to be manually adjusted or placed on hold.

Commission features include the:

- Ability to track and report on commissions
- Ability for an agent to collect commission through direct deposit or check
- Ability to view and print commission statements in multiple formats including PDF, Excel, CSV, or XML
- Ability to store a copy of each commission statement format in a separate directory in a specified location
- Ability to store a copy of all generated commission statements in the Archive directory
- Ability to automatically authorize or de-authorize commission based on receivable or payment processing events
- Ability to distribute commissions using customized multi-level commission plans
- Ability to view or adjust a pending commission statement
- Ability to generate an ad hoc commission statement in multiple formats

- Ability to define the criteria used to distribute commission based on policy attributes and additional customer-defined attributes
- Ability to calculate commission based on percentage or flat fee
- Ability to create custom commission plans

For more information, see *Commission Plan Detail*.

Policy Administration Support

The integration between Duck Creek Billing™ and policy administration systems is bi-directional. Data flows from the policy administration system to Duck Creek Billing™, and from Duck Creek Billing™ to the policy administration system. Although Duck Creek Billing™ is integrated with EXAMPLE Express® out of the box, it is designed to easily integrate with other policy administration systems.

Duck Creek Billing™ supports the following policy administration features:

- Receives policy transactions from any number of external systems
- Integrates billing account setup and payment plan selection into the policy workflow
- Processes the following types of receivables:
 - Policy premium transactions
 - Premium-related policy fees
 - Non-premium related policy fees (for example, flat auto theft fee per vehicle)
 - Taxes and policy surcharges
- Supports unattended renewals
- Supports multiple policy terms including:
 - Monthly
 - Quarterly
 - Semi-annually
 - Annually
 - Three months free
 - Multi-year

Reports

The Duck Creek Billing™ reporting system is based on Microsoft SQL Server Reporting Services. Custom reports can be created using Microsoft SQL Server Business Intelligence Development Studio, and both custom and out-of-the-box reports are accessible from the Billing Dashboard, in addition to a number of available charts and graphs.

The Duck Creek Billing™ reporting features include:

- Real-time, Web-based reporting
- Multiple report formats including PDF, XLS, XML, CSV, TIFF, and Web archive
- Ability to subscribe to reports and receive regularly scheduled email reports
- Ability to schedule reports to run at a specified time, or generate reports on demand
- Ability to control access for viewing or accessing reports using role-based security

Out-of-the-box reports include:

- Aged Receivables (60, 90, 120, 180, 180+ days)
- Cash in Suspense
- Commission Activity
- General Ledger
- Revenue Reconciliation
- Transaction Errors
- View Single Payment List
- Activity Log
- Cancellations Processed
- Batch Payment List
- Unidentified Cash
- Internal Balancing:
 - Cash Receipts Journal
 - Commission Due compared to Commission Paid
 - Payments compared to Allocations
 - Revenue compared to Receivables
 - Trial Balance Interface Balancing
- Interface Balancing
 - Billing to Check Writing
 - Billing to Commission Management System
 - Billing to General Ledger
 - Billing to PAS

Database Structure

SQL Reporting Services allows reports to be organized within its database in a virtual folder hierarchy. All reports applicable to a given EXAMPLE Server® instance are installed under a root virtual folder specific to that instance. Just as a single SQL Server can support databases for multiple EXAMPLE Server® instances, this virtual folder system allows a single report server to support multiple sets of reports.

Account Balancing and Internal Controls

Internally, Duck Creek Billing™ supports account balancing and internal control needs by providing the following features:

- Advanced database controls used to ensure the system is always in balance
- General ledger interface support
- Internal trial balance posting support
- Internal audit controls for all monetary transaction activity

The User Interface

Duck Creek Billing™ is for real-world people performing real-world tasks. The intuitive user interface offers quick, functional access to the information and processes that users access most frequently. Key elements of the user interface include:

- The Billing Dashboard
- The Account Home page
- The Policy Term Summary page
- Controls (grids, dates, and validation)

The Billing Dashboard

The screenshot shows the Duck Creek Billing Dashboard. At the top, there is a navigation bar with the Duck Creek Technologies logo, a 'Billing' link, a 'Logout' link, and a search bar with a dropdown menu set to 'Account Number' and a text input field. Below the navigation bar, there are four tabs: 'Billing Dashboard' (selected), 'Billing Administration', 'Batch Cash Management', and 'Notifications'. The main content area is titled 'Billing Dashboard' and includes the text 'You are logged in under Internal Users.' On the left side, there is a sidebar with a section titled 'Activities' containing links: 'Search For A Payment', 'Enter A Single Payment', 'Unidentified Payments', and 'Create A New Account'. Below this is a section titled 'Accounts Last Accessed'. At the bottom of the sidebar is a 'Reports' section with the text 'No reports available' and a system date indicator: 'The current system date is March 10, 2010'. The main content area on the right has a section titled 'Find a Billing Account' with a dropdown menu set to 'Account Number' and a text input field, followed by a 'Search' button. Below this is a 'Notifications' section with the text 'You have no notifications.' At the bottom of the page, there is a footer with the text 'Copyright 2009 Duck Creek Technologies | Duck Creek is built on Express technology.'

From the Billing Dashboard page, a user can:

- Search for a payment.
- Enter a single payment from the Cash Management screen instead of within an account.
- View summary information for payments automatically or manually entered that were not posted to a policy or account.
- Create an account in the billing system without going through policy issuance.
- View a list of recently created or accessed accounts.
- Open an available report with one click.
- View notifications and tasks.

The Account Home Page

The Account Home page is the primary workhorse for the Duck Creek Billing™ system, and provides a direct path for accessing and managing billing activities at the account level.

The screenshot shows the 'Account Home' page for Robert Watterson (Account ID: 000000003). The page includes a navigation bar with links to Policy Management, Billing, and Logout. A search bar is located at the top right. The main content area is divided into several sections:

- Account Home Summary:** Includes links to Account Home, Installment Schedule, Account Settings, Make A Payment, Items In Suspense, and Hold Billing Activities.
- Account Ledger:** Displays account balances: Outstanding Balance: \$120.00, Current Amount Due: \$0.00, Past-Due Amount: \$0.00, and In Suspense Amount: \$0.00.
- Account Details:** Shows Target Due Days: 31, Account Type: Account, Account Class: 5, Collection Method: PA, Disbursement Hold, and NSF Counter: 0.
- Payor:** Lists Robert Watterson with address and city information.
- Most Recent Invoice:** A table with columns: Invoice Date, Docs, Amount, Due Date.
- Last Payment Received:** A table with columns: Date, Amount, Method.
- Next Scheduled Invoice:** A table with columns: Invoice Date, Amount, Due Date.
- Recent Account Activity:** A table showing activity logs with columns: Date, Activity Type, Created By, and Amount.

Date	Activity Type	Created By	Amount
3/12/2010, 4:41 pm	Policy Transaction <i>New Business: receivable has been processed.</i>	Express Admin	\$120.00
3/12/2010, 4:41 pm	Policy Term Issued <i>Policy Term 3P2010 03/10/2010 - 03/10/2011 created</i>	Express Admin	N/A
3/12/2010, 4:40 pm	Account Created <i>Account created.</i>	Express Admin	N/A
- Policies Associated With This Account:** A table showing policy terms with columns: Policy Reference, Policy Term, Policy Status, Current Due, and Outstanding Balance.

Policy Reference	Policy Term	Policy Status	Current Due	Outstanding Balance
3P2010 Line 1	3/10/2010 - 3/10/2011	Active	\$0.00	\$120.00

At the bottom, it states: 'The current system date is March 12, 2010'.

The Account Home page provides quick access to view and work with:

- The most recent invoice.
- The account history, sortable by date, activity type, or policy term in the Recent Account Activity list.
- A list of all policy terms associated with the account, with a link for quick access to the Policy Term Summary page for each term.
- A summary of the account ledger and account details, providing a quick look at the account status.
- Payment and payment allocation details.
- A list of any Items in Suspense for the account.
- Transferring payments from one account to another.
- Transferring policy terms from one account to another.
- Manually allocating payments.
- Adding notes to an account.

The Policy Term Summary Page

The Policy Term Summary page design echoes that of the Account Home page, and provides easy-to-use access for policy term details.

Policy Term Summary

Summary

Policy Number	Eff/Exp Dates	Status	Aggregation Reference
14P2009	11/4/2009 - 11/4/2010	Active	

Most Recent Invoice

Invoice Date	Docs	Amount	Due Date
11/10/2009		\$9.09	11/30/2009

Next Installment

Date	Amount	Due Date
11/10/2009	\$9.09	11/30/2009

Future Policy Term Renewal

Account Number	Policy Term Settings

Policy Term Activity

Date	Transaction	Receivable	Amount	Bill In Full	Commission Amt
11/4/2009, 12:00 am	New Business	Premium	\$100.00		\$10.00

Bill Item Effective Dates - 11/4/2009 - 11/4/2010

Other Policy Terms Associated with this Policy

Policy Term	Policy Status	Current Due	Outstanding Balance
11/4/2009 - 11/4/2010 (1 Item)	Active	\$0.00	\$100.00

The current system date is November 04, 2009

 Written Off/Waived: \$0.00

Insured
Agent

This page provides answers to the most frequently asked questions concerning policy account terms. All tasks related to policy terms are quickly launched from this page.

From the Policy Term Summary page, the user can:

- Transfer a policy term to another policy.
- View or edit policy term settings.
- Update renewal information.
- Hold billing activity for the policy term.
- View policy term details.
- View detailed information for the insured and the agent.
- Access a list of other policy terms associated with the account.

Controls

The Duck Creek Billing™ user interface incorporates ExtJs2.2, making available a diverse set of GUI-based form controls (widgets) including:

- Grids
- Date fields
- Panel layouts
- Credit card and date validation

Grids

Grids in Duck Creek Billing™ integrate a wide variety of tools that allow users to easily view customized information. These grid types include:

- **Grid Types**
 - **Grouping grids** – Group items within the grid. Common rows are grouped together based on the grid's configuration.
 - **Preview grids** – Display an extra information row per item. This information row can be collapsed or expanded (for a single row or for all rows) using a button in the grid toolbar.
- **Check box grid** – Display a check box on each row, based on a row rule check. These grids can store all selected rows in a paging grid, storing the items selected on each page until the user is ready to submit the selections.
- **Grid toolbar** – Allow users to display or hide items according to their preferences.
- **Column filtering** – Allows users to filter grid data within each column. Data is displayed based on all filters the user has selected. Filtering types include:
 - **Dates** – Allows **less than or equal to**, **greater than or equal to**, and **equal** filtering.
 - **Text** – Allows text searches.
 - **Amounts** – Allows **less than or equal to**, **greater than or equal to**, and **equal** filtering.
 - **Support table values** – Loads selectable items using check boxes.
- **Row classification** – Allows a class name to be appended to a row to change styling. This classification is based on a rule provided through a JavaScript function.
- **DataOnLoad event** – Allows the onload event to occur immediately after a page or image is loaded.

Date Fields

Duck Creek Billing™ offers the following date field functionality for date fields:

- System pages with their own Ext Js date fields that do not interfere with interview pages.
- Available events for date fields:
 - onBlur event
 - onChange event
 - onKeyUp event
 - onKeyPress event

Date fields are turned on by providing a function that is called for one of the listed events. The function is passed as a configuration parameter in the XSL. If the screen XSL does not pass a function, the event is not processed.

Validation Functions

Credit Card Validation – The credit card validation function performs a behind-the-scenes validation on all entered credit card numbers. All standard credit card types are handled.

Time Validation – The Time Validation function checks that any entered time is valid.

End-User Functionality

Out-of-the-box roles are provided as a framework for customization of the role-based security features implemented in Duck Creek Billing™. Roles can easily be customized to allow users to have specific privileges not available with the out-of-the-box role. Shipped roles include: administrator, agent, senior customer service representative, and standard customer service representative.

Using the available roles and privileges, the following representative users can perform a variety of tasks:

- Policy system user
- Customer service representative
- Payment processor
- Billing administrator

Policy System Users

Using Duck Creek Billing™, agents, underwriters, and other policy system users can:

- Attach a policy to an existing account
- Create a new account for a policy, including:
 - Select the payment mode (invoicing frequency)
 - Select the day of month for invoicing
 - Select the payment method
 - Identify an alternate payor or payee
- Select a payment plan for a new policy
- Post policy-term information
- Post a single payment (both cash-with-application payments and other payments)
- Request an installment schedule for a new policy or quote
- Inquire into an account status where the agent is "owner" (as controlled by role/security at an individual level)
- Update bill accounts where agent is "owner" (as controlled by role/security at an individual level)

Customer Service Representatives

This section lists the activities available to Customer Service Representatives (CSRs) who typically perform hundreds of activities a day within the Duck Creek Billing™ system. It is important to note that any or all portions of the CSR role may be granted to policy system users, agents, underwriters, members of the accounting department, billing administrators, or other users. The range of activities any given individual may perform within Duck Creek Billing™ is determined through the roles granted to that person using EXAMPLE UserAdmin™. These roles can be customized by carriers.

Using Duck Creek Billing™, CSRs can perform the following functions:

- Search for and access account details and history, including:
 - Account holder details
 - Account status
 - Payor and payee information
 - Payment, balance summary, and transaction history
 - Account rules and scheduling information
 - Policy term plan, status, and transaction history
- Access to the Account Home page for an immediate view of key billing data for an account
- The Recent Account Activity list provides a visual account timeline allowing CSRs to navigate through key events in chronological order in a filterable list
- Print installment schedules or reprint invoices
- Post a payment
- Search for and access key payment information and allocation details
- View the installment schedule for an account, including the projected service charges
- Search for and access key information regarding:
 - Payment reversals
 - Items in suspense
 - Write-offs
 - Disbursements
 - Payment transfers between accounts
- Perform the following actions on payments:
 - Reverse a payment
 - Place items in suspense (and re-suspend items)
 - Write off items (and reverse a write-off)
 - Make disbursements (and re-bill for a disbursement made in error)
 - Transfer payments (and reverse transfers)
- Create a new billing account
- Change account plan, bill day, billing method, EFT information, invoice due date, or billing classification
- Change payee or payor
- Change renewal billing account

- Suspend or resume account billing activities
- Suspend or resume disbursements
- Refer to third-party collections
- Add notes to an account
- Search for and access policy term information
- Post policy term information including term plan, status, and balance summary
- View policy term transaction history
- Transfer a policy term
- Change policy plan renewal
- Suspend/Resume policy level activities

Payment Processors

Using Duck Creek Billing™, payment processors can:

- Post single payments and unidentified payments
- Create and post to batch cash payments
- Search for and access batch cash payments
- Search for and access individual batch cash payment details
- Change existing batch cash payments

Billing Administrators

Billing administrators are responsible for billing system setup and administration. Using Duck Creek Billing™, administrators can:

- Establish initial billing plans
- Update existing plans
- Oversee operational reports
- Initiate bulk payment error processing
- Develop custom reports and queries
- Suspend and resume billing activities for accounts

System Requirements

Duck Creek Billing™ requires installation of the following EXAMPLE Platform® 4.x products:

- EXAMPLE Server® must be installed first
- EXAMPLE TransACT®
- EXAMPLE Asynchronous Request Viewer
- EXAMPLE Forms™

Installation of EXAMPLE Express® is also recommended, and is required for the installation of the Billing On Demand Components. If you do not install EXAMPLE Express®, you will not be able to view Duck Creek Billing™ pages out of the box.

System requirements for Duck Creek Billing™ are:

- Microsoft Internet Explorer 8 or higher
- Microsoft Message Queuing
- Internet Information Service (IIS) v. 7

If you are installing IIS for the first time, you must uninstall .NET Framework first. After successfully installing IIS, reload .NET Framework

- Microsoft .NET Framework v3.5 (SP 1)
- Microsoft SQL Server 2005 (SP 3) with Full Text Search (FTS) and Reporting Services enabled.

New SQL Server 2005 users should install FTS when installing Microsoft SQL Server 2005. Users who are upgrading should check in Control Panel>Administrative Tools>Services to see if FTS is installed and is started. If it is not shown in the Services folder, install it from the SQL 2005 CD.

The following services must be started to run Duck Creek Billing™:

- DuckCreek_MSMQBillingListener_EXAMPLE SERVER
 - DuckCreek_Async_Request_Queue_EXAMPLE Async Queue O
 - DuckCreek Scheduled Requests EXAMPLE Billing Components O
- Microsoft Excel 2003 for generating Excel format agent commission statements (EXAMPLE Platform® 4.2.2. or later)

Compatible versions of Microsoft Excel and SQL Server are required. SQL Server 2005 requires Microsoft Excel 2003.

Appendixes

This section contains information about:

- Commission Plan Detail
- Sample Invoice

Commission Plan Detail

The following commission plans are included out of the box in Duck Creek Billing™. The Commission Scheme option is included in the Policy Term Settings.

- **Paid on Paid First Payment** – The entire commission amount is paid when the first payment is applied to the receivable. Receiving one valid payment on the policy term releases the commission for that policy term. The activity date of the payment is used as the commission authorization date for a new business or a renewal policy transaction. All other policy transactions use the activity date of the policy transaction as the commission authorization date. Debit receivables create an authorization record. Credit receivables generate a de-authorization record. (Option POP2)
- **Paid on First Paid** – The commission is released following the receipt of one valid payment on the policy term. The latter of the policy transaction effective date or the activity date of the payment is used as the commission authorization date for a new business or renewal policy. All other policy transactions use the latter of the policy transaction effective date or the activity date of the policy transaction as the commission authorization date. Debit receivables create an authorization record. Credit receivables generate a de-authorization record. If all payments are reversed (no money has been applied to policy premium), the commissions will be de-authorized. (Option POP4)
- **Paid on Paid Pro Rata** – Payment is required before commission is released. The amount of commission that has been paid to date for a given receivable is evaluated. Next, based on the payment activity, the amount of commission that should have been paid is evaluated. The difference is the commission amount that is authorized. The activity date of the payment is used as the commission authorization date for all debit policy transactions. All other policy transactions use the activity date of the policy transaction as the commission authorization date. When premiums are written off, the corresponding commission amount is still authorized. Debit receivables create an authorization record. Credit receivables generate a de-authorization record. If payments are reserved the commissions that were authorized due to that payment will be de-authorized. (Option POP1)
- **Paid on Effective** – The commission is authorized for each policy transaction at issuance. Payment is not required before the commission is released. The commission authorization date is the latter of the effective date or the activity date of the policy transaction. Debit receivables create an authorization record. Credit receivables generate a de-authorization record. (Option POE1)
- **Paid on Written** – Payment is not required before commission is released. The entire commission amount is authorized when the receivable is posted. The commission authorization date is the activity date of the policy transaction. Debit receivables create an authorization record. Credit receivables generate a de-authorization record. (Option POW1)
