Duck Creek Billing™ User Guide

This guide contains instructions for performing tasks in Duck Creek Billing™.

Working with the Billing Dashboard

As the launching page for Duck Creek Billing™, the Billing Dashboard gives at-a-glance access to frequently accessed information and frequently launched tasks for working with accounts.

The screenshot shows the Duck Creek Billing Billing Dashboard. At the top, there is a navigation bar with links for Policy, Billing, and Logout. A search bar is located on the right side of the navigation bar. Below the navigation bar, the main content area is titled "Billing Dashboard" and includes a welcome message: "Welcome to the Billing Dashboard, Express Admin." The dashboard is divided into several sections: "Activities" on the left, which includes links for "Search For A Payment", "Enter A Single Payment", "Unidentified Payments", "Create A New Account", and "Import Statements"; "Accounts Last Accessed" below Activities; "Reports" and "Charts" below Accounts Last Accessed; "Find a Billing Account" on the right, which includes a search bar and a "Search" button; "Notifications" below Find a Billing Account, which states "You have no notifications."; and "Tasks" below Notifications, which states "You have no tasks due today." At the bottom of the dashboard, there is a footer with links for "Change Password" and "Logout", and a copyright notice: "Copyright 2011 Duck Creek Technologies | Duck Creek is built on Express technology."

Duck Creek Billing is a highly customizable and configurable product. Not all pages may appear as described in this user guide, which is based on out-of-the-box settings.

The following table lists the tasks and information accessible from the Billing Dashboard page.

Item	Description
Search For A Payment	Allows the user to manually search for a payment posted to a Billing Account or as Unidentified Cash.
Enter A Single Payment	Allows the user to enter a single payment from the Cash Management screen instead of within an account.

Unidentified Payments	Displays summary information for payments automatically or manually entered that were not posted to a policy or account.
Create A New Account	Allows the user to create a billing account in the billing system without going through policy issuance.  No policy is associated with the account when the account is created.
Accounts Last Accessed	Displays a list of recently created or accessed accounts.
Reports	Provides access to out-of-the-box and custom reports for specified billing activities.
Charts	Provides access to out-of-the-box charts.
Find A Billing Account	Allows the user to manually initiate an account search in Duck Creek Billing™, or in the entire party data system.
Notifications	Displays notifications regarding accounts in the system.

Working with Grids and Filters

Grids and filters allow a Duck Creek Billing™ user to change the displayed items in a list on a page, or the order of the list.

Customization allows items to be excluded from display when a page appears. See *Working with Grids and Filters* in the *Duck Creek Billing™ Reference Guide*.

To utilize an available grid or filter:

1. In the appropriate header, select a **column heading**.
2. Click the **Down Arrow** button.
3. Select the appropriate items from the expanded list.

Refreshing the page view or changing pages clears the selected grids and filters.

Pages with filtering available include:

- Recent Account Activity
- Items in Suspense
- Account Home
- Unidentified Payments
- Policy Term Summary
- Payment Detail Page (Payment Allocation list)
- Batch Cash Management

Entering a Single Payment

Single payments can be associated with an account or policy, or entered as unidentified payments which cannot immediately be associated with the appropriate account or policy.

If a policy is in a pending cancellation status, payment to rescind the pending cancel must be made on the policy level. For more information, see *Rescinding Pending Policy Cancellations*.

Entering a Payment Associated with an Account or Policy

To enter a single payment and associate it with an account or policy:

1. In the **Activities** list on the Billing Dashboard, click **Enter a Single Payment**.
The Payment Reference page appears.
I know the account, policy number, or name is selected by default.
2. Perform one of the following actions:
 - In the **Search for Account by** list, click **Account Number** or **Policy Number**, and then enter the appropriate information in the **Enter Number** text box.
 - Click **Party Information**.
3. Click **Search**.
The Enter a Single Payment page appears.
A confirmation message appears when the search returns a matching account.
4. (Optional) If the search does not locate the appropriate account, click **Select Another Reference** and launch another search.
5. Enter the appropriate **Payment Details**. For more information on entering different types of payments, see *Making a Payment*.
6. Click **Add Payment**.
A confirmation message appears with a link to the account number the payment is posted to.

Entering an Unidentified Payment

To enter a single payment that is unidentified:

1. Click **This is an unidentified payment, not associated with an account or policy**.
The Payment Reference page appears.
2. Complete at least one of the fields marked with an asterisk (*).
3. Enter the appropriate **Payment Details**.
For more information on entering different types of payments, see *Making a Payment*.
4. Click **Add Payment**.
A confirmation message appears regarding the unidentified payment.

Managing Unidentified Payments

Unidentified payments are payments that cannot immediately be associated with the appropriate policy or account. After they are entered in Duck Creek Billing™, unidentified payments can be applied to a policy, updated, or reversed.

Associating Unidentified Payments with Accounts

To associate an unidentified payment with the appropriate policy or account:

1. In the **Activities** list on the Billing Dashboard, click **Unidentified Payments**.
The Unidentified Payments page appears.
2. Locate the appropriate payment in the **Unidentified Payments** list, and then click the **Details** link.
The Payment Reference page appears.
3. Click **I know the account, policy number or name**.
4. In the **Search for Account by** list, click the appropriate criteria.

Selecting the Account Number or Policy Number initiates a search within the Duck Creek Billing™ system. Searching with Party Information initiates a search of the entire Party data system, which includes Duck Creek Billing™.

5. In the **Enter Number** text box, enter the appropriate number.
6. Click **Search**.
If a search returns a single match, the account number is displayed in the Payment Reference section. If multiple matches are returned, a candidate list appears.
7. (Optional) Click **Select Another Reference** to launch another search if no matching account is found.
The Unidentified Payments page appears.
8. (Optional) Select the **Place hold on payment when processed** check box to place the item in suspense.

If the check box is not selected, the payment is automatically processed.

9. Click **Process Payment**.
The Unidentified Payments page appears, with an **Account Number** link. The payment is added to the **Recent Account Activity** list.

Updating Unidentified Payments

If you have additional information about an unidentified payment, you can update the payment reference without processing the payment.

To update the payment reference:

1. In the **Activities** list on the Billing Dashboard, click **Unidentified Payments**.
The Unidentified Payments page appears.
2. Locate the appropriate payment in the **Unidentified Payment** list, and then click the **Details** link.

The Payment Reference page appears.

3. Update the Payment Reference information as appropriate.
4. Click **Update Reference**.
The Unidentified Payments page appears.

Reversing Unidentified Payments

To reverse an unidentified payment:

1. In the **Activities** list on the Billing Dashboard, click **Unidentified Payments**.
The Unidentified Payments page appears.
2. Locate the appropriate payment in the **Unidentified Payment** list, and then click the **Details** link.
The Payment Reference page appears.
3. In the **Reverse This Payment** list, click one of the following reasons for the reversal:
 - Company Mistake
 - EFT Rejection
 - Non-Sufficient Funds
4. Click **Reverse Payment**.
The Unidentified Payments page appears with a message confirming the reversal.

Searching for a Payment

You can search for any payment that has been entered into the billing system, whether it's entered automatically or manually.

To search for a payment:

1. In the **Activities** list on the Billing Dashboard, click **Search for a Payment**.
The Search For A Payment page appears.
2. Enter the appropriate information in at least one of the available text boxes.

The search is filtered by the amount of information entered.

3. Click **Search**.
The Search Payment List page appears, with a list of all payments matching the search criteria.
4. Click the **Payment Amount** link in the **Payment List** to view the payment detail.
5. (Optional) Click **Search Again** to launch another search.

Creating a Billing User

Duck Creek Billing™ users must be created and then be assigned the appropriate roles for accessing Duck Creek Billing™. You can create billing users with EXAMPLE UserAdmin™, or with another user management tool.

The BillingLogin role is required for login access for all billing users.

Billing roles are used to assign privileges to Duck Creek Billing™ users. Each role has a unique set of permissions. You can use the out-of-the-box roles or create custom billing roles. The following table provides a description of the Duck Creek Billing™ privileges associated with each out-of-the-box role.

Role	Description	Duck Creek Billing™ Privileges
BillingAdmin	Billing administrator	All privileges assigned to any billing user
BillingLogin	Login access	Ability to login
BillingAgent	Agent access	• Accessing the Account Summary page • Accessing the Installment Schedule page • Accessing the Policy Summary page • Adding notes to an account • Changing payor and payee information • Scheduling disbursement service interface requests • Manually redistributing installments • Viewing an invoice

BillingSeniorCSR	Senior customer service representative	• Accessing the Account Summary page • Accessing the Disbursement Detail page • Accessing the Installment Schedule page • Accessing the Suspended Items page • Accessing the Payment Detail page • Accessing the Policy Summary page • Accessing the Write off/Waive detail page • Adding notes to an account • Creating hold billing and follow up activities • Changing the target due date on an account • Changing payor or payee on an account • Changing Policy Plan Options • Changing the hold type for an item in suspense • Creating an account without an associated policy • Entering a payment within an account • Manually allocating money in suspense • Manually redistributing installments • Viewing, creating, editing, deleting and processing payment batches • Searching for a payment • Reprinting an invoice • Re-suspending a pending disbursement • Submitting monthly payroll reports • Transferring cash from suspense • Viewing an invoice • Accessing reports • Writing off or waiving receivables • Accessing the Unidentified Payments page • Assigning unidentified payments to an account • Accessing batch cash management facilities • Managing hold events • Manually rescinding a policy in PCN status • Re-billing disbursements • Writing off cash in suspense • Transferring a policy to a collections account
------------------	--	--

		• Transferring a policy between accounts • Suspending an allocated payment • Reversing a payment • Resuspending a pending disbursement • Resuspending a pending disbursement up to a specified limit
BillingStandardCSR	Standard customer service representative	• Accessing the Account Summary page • Accessing the Disbursement Detail page • Accessing the Installment Schedule page • Accessing the Suspended Items page • Accessing the Payment Detail page • Accessing the Policy Summary page • Accessing the Write off/Waive detail page • Adding notes to an account • Creating hold billing and follow up activities • Changing the target due date on an account • Changing payor or payee on an account • Changing Policy Plan Options • Changing the hold type for an item in suspense • Creating an account without an associated policy • Entering a payment within an account • Manually allocating money in suspense • Manually redistributing installments • Viewing, creating, and managing payment batches • Searching for a payment • Reprinting an invoice • Re-suspending a pending disbursement • Submitting monthly payroll reports • Transferring cash from suspense • Viewing an invoice • Accessing reports • Writing off or waiving receivables

For information on creating a Billing Role, see *Working with Users in the EXAMPLE UserAdmin™ User Guide*.

Working with Accounts

When working with accounts in Duck Creek Billing™, you can:

- Create accounts
- Create policies
- Use the Add a Note feature
- Work with monthly premium reporting
- Produce a quote schedule before issuing a policy
- View the account home page
- Work with invoices
- View the account installment schedule
- Update billing account options
- Update policy plan options
- Make a payment
- View payment details
- Reverse a payment
- Re-suspend a payment write-off
- Work with suspended items
- Work with billing hold events
- Reprint invoices
- Work with late charges and past due accounts
- Work with reminder notices
- Work with collections
- Work with commissions
- Work with reports

Creating Accounts

You can use Duck Creek Billing™ to create billing accounts that are not connected to a policy, or to connect a new business policy to an existing or newly-created billing account.

Both a payor and payee are required for account creation.

The payor is responsible for paying the premiums and any other charges on the account, while the payee receives any refunds on the account. By default, the **Payor and payee are the same party** check box is selected. To name a different payee for an account, clear the selected check box, and select an existing account, or create a new account. The payor continues to be responsible for paying the premiums and charges on the account, but the new payee is the recipient of any refunds on the account.

You can change the payee for a specific disbursement rather than naming a new payee for all account activity. See *Working with Refund to Source* and *Working with Items In Suspense*.

To change the default payee on an account:

The Search for Party page appears.

The information for the new default payee now appears when you click the Payee name in the left navigation panel.

1. On the left navigation panel for the appropriate account, click **Change Payee**.
2. Enter the appropriate search criteria, and then select the appropriate party.

Through ManuScript customization, create customized bill and policy plans rather than selecting the appropriate value for each available option each time you create a bill or policy plan. Customized account level plans are displayed in the **Bill Account Class** list on the Create New Account page. Customized policy plans are displayed in the **Select Billing Plan** list on the Submission page. Creating custom plans saves time, reduces errors, and promotes consistency between accounts.

Creating an Account Not Associated With a Policy

There are two ways to create a new Duck Creek Billing™ account without associating it with a policy:

- Search your party system for an existing party
- Create a new party

When you create a Duck Creek Billing™ account, it is automatically added to your party data system.

Creating an Account by Searching For an Existing Party

To create a new billing account by searching for an existing party:

1. In the Activities section of the left navigation panel on the **Billing Dashboard**, click **Create a New Account**. The Create New Account page appears.
2. In the Account Payor section, click **Search For An Existing Party**. The Search for Party page appears.
3. Enter the appropriate information, and launch a search of the party data system being used.
4. Select the appropriate party. The Create New Account page appears, with the selected party named as the payor.

The **Payee and payor are the same party** check box is selected by default.

5. (Optional) If the payor and payee are not the same, and the payee is an existing party, clear the selected check box and repeat the search process.
6. In the **Bill Account Class** list, click one of the available options.

The options available in the **Bill Account Class** list are determined by ManuScript configuration.

7. In the **Target Due Days text box**, enter a number from 1-31. See *Target Due Days Settings*.

When the Resulting Due Date is on Sunday, it is automatically moved ahead one day to Saturday.

8. (Optional) Select the **Set target due day to end of month** check box for the due date to always be the last day of the month.

This is the same as entering a value of 31.

9. Click **Create New Account**.
The Select Billing Account Options page appears.

10. Click **Complete**.

For information about viewing or changing the Billing Account Options, see *Selecting Billing Account Options*.

Creating a New Account by Creating a New Party

To create a new billing account by creating a new party:

1. In the Activities section of the left navigation panel on the Billing Dashboard, click **Create a New Account**.
The Create New Account page appears.
2. Click **Create A New Party**.
The user's party data system opens, and allows for the creation of a new party. After the new party is created, the Create New Account page appears with the name of the new account as the Account Payor.

The **Payee and payor are the same party** check box is selected by default.

3. (Optional) If the payee and payor are not the same, clear the selected check box and repeat Step 2 to create a new party as the Account Payee. To select an existing party as the payee, launch a search of the party data system, and select the appropriate party.
The Create New Account page appears.
4. In the **Bill Account Class** list, click one of the available options.

The options available in the **Bill Account Class** list are determined by ManuScript configuration.

5. In the **Target Due Days** text box, enter a number from 1-31. See *Target Due Days Settings*.

When the Resulting Due Date is on Sunday, it is automatically moved ahead one day to Saturday.

6. Click **Create New Account**.
The Select Billing Account Options page appears.
7. Click **Complete**.

The Billing Dashboard appears. For information about viewing or changing Billing Account Options, see *Selecting Billing Account Options*.

Creating a Policy

To create a policy from Duck Creek Billing™

The policy administration system appears.

After the policy information is entered, the Submission page appears.

1. Click the **Policy Management** tab.
2. Create the policy.

Through ManuScript customization, create customized bill and policy plans rather than selecting the appropriate value for each available option each time you create a bill or policy plan. Customized account level plans are displayed in the **Bill Account Class** list on the Create New Account page. Customized policy plans are displayed in the **Select Billing Plan** list on the Submission page. Creating custom plans saves time, reduces errors, and promotes consistency between accounts.

Submission Page Options

The Submission page is customizable through ManuScript configuration.

Billing Set Up

Setup Billing During Issue ☒

MPR Policy ☐

Create New Account ☒

Account Setup

Collection Method

Taxes and Surcharges

Include Taxes/ Surcharges ☒

Policy Taxes Surcharges Change

Include Forms ☐

Waive Charge? ☐

Premiums

Full Term	Premium Written	Prior Premium	Premium Change
\$100	100.00	0.00	100.00

[Complete Issuance](#)

[View Quote Schedule](#)

[View Application Data](#)

Out of the box, the Submission page includes the following options:

- Setting up billing during policy issuance
- Creating a monthly premium report (MPR) policy
- Searching for an existing account to associate with a policy

- Selecting a Billing Plan
- Specifying the collection method
- Specifying whether taxes and surcharges are added to the account
- Specifying whether forms are included with the policy
- Specifying whether to waive charges
- Viewing a quote schedule
- Viewing application data
- Completing policy issuance

Billing Set Up

The following table lists the options available in the Billing Setting Up section.

Item	Description
Setup Billing During Issue	Select the check box to automatically create the billing account during policy issuance.
MPR Policy	Select the check box to create an MPR policy.
Create New Account	Select the check box to associate the policy with an existing account.
	 When the check box is cleared, the Account Search section appears.

To select an account to associate with the policy:

A list of potential matching policy numbers appears.

1. In the **Search by** list, click one of the available options.
2. In the **Using** text box, enter the appropriate search information based on the search type selected.
3. Click **Search**.
4. Click **Select** to attach the policy to the selected account.

The **Attach To Account Reference** text box populates with the appropriate account number.

Account Setup

The following table lists the options available in the Account Setup section.

Item	Description
Select Billing Plan list	Click one of the available options.
	 The available options are determined by ManuScript configuration.

Collection Method list	Click the appropriate option to determine the collection method for the account.
------------------------	--

Taxes and Surcharges

The following table lists the options available in the Taxes and Surcharges section.

Item	Description
Include Taxes/ Surcharges check box	Select the check box to include taxes and surcharges on the account.  The default amount specified in the appropriate Manuscript appears in the Policy Taxes Surcharge Change text box.

To change the default amount:

- Enter a different value in the **Policy Taxes Surcharge Change** text box.

Additional Options

The following table lists additional out-of-the-box options on the Submission page.

Item	Description
Include Forms check box	Select the check box to include forms for the policy.
Waive Charge check box	Select the check box to waive a specified transaction charge.
View Quote Schedule button	Click the button to view the quote schedule before committing the policy.  The exact amount due after the policy is committed may be different from the quote schedule, depending on other charges applied to the account. For example, after purchasing a new business policy for \$100, the customer requests an endorsement for \$75. The quote schedule generated before the policy is committed includes only the \$75 endorsement, and not the previously issued policy.
View Application Data button	Click the button to view the Applicant Info page.

Complete Issuance button	Click to issue the policy.
--------------------------	----------------------------

Working with Agency Lite Accounts

Configuration is required to utilize the Agency Lite feature in Duck Creek Billing™. See *Working with Agency Lite Accounts* in the *Duck Creek Billing™ Reference Guide*.

Direct billing systems typically use a gross premium basis for statement reconciliation. The Duck Creek Billing™ Agency Lite feature allows agencies with low volumes of small agent accounts to reconcile their statement on a net settlement of accounts basis using direct bill features.

Because manual reconciliation is required for each statement and the creation of commission records, Agency Lite is not recommended for large numbers of agents, or agents with more than 50 policies per statement.

Important considerations for Agency Lite accounts include the following:

- Net and gross commission payments cannot be mixed within an account.
- The commission payment type cannot be changed on an account.
- Net payments indicate the agent is retaining the commission.
- Gross payments indicate the commission needs to be paid to the agent.

Creating an Agency Lite Account

After the required configuration changes are complete, you can create an Agency Lite account.

To create an Agency Lite account:

1. Make the following selections in the **Account Type** section of the **Billing Account Options**:
 - In the **Account Type Code** list, click **Agency Lite**.
 - In the **Gross/Net Indicator** list, click the appropriate commission option.
2. Select the remaining **Billing Account Options**.
3. Click **Save**.

Entering an Agency Lite Payment

To enter a payment for an Agency Lite account:

1. From the **Account Home** page, in the left navigation panel, click **Make A Payment**. The Make A Payment page appears.
2. Enter the appropriate payment information.
3. Enter the amount of the payment in the **Other Amount** text box.
4. Select the **I want to choose how to apply this payment** check box.

The **Enter Allocation Amount** list appears.

- For net settlement accounts, the net balance is displayed, and the payment amount entry field defaults to the Current Net Due amount plus the Past Net Due amount.
 - For gross settlement accounts, the gross balance is displayed, and the payment amount entry field defaults to the Current Gross Due amount plus the Past Gross Due amount.
5. In the **Enter Allocation Amount** text boxes, enter the appropriate amounts.
 6. Click **Submit**.
The Account Home page appears.

A confirmation message appears at the top of the home page. Click the **Payment Amount** link to view the Payment Detail page.

The payment date and amount are included in the Last Payment Received section.

Working with Agency Life Commissions

Because the commission functionality is disabled for Agency Lite accounts during customization, no commission authorization records are written.

Balances in direct bill always represent gross amounts, so an open balance representing the commission the agent has already taken remains after payment is entered for the account.

To close the open balance:

1. From the **Installment Schedule** page for the appropriate account, click the **Expand/Collapse** button  to expand the view.
2. In the **Item Amt** column, click the **Write-Off/Waive** button  for the appropriate item.
3. In the **I Want To** list, click **Write-off**.
4. In the **Reason** list, click **Net Settlement Commission Adjustment**.
5. Click **Write-Off**.
The Installment Schedule page appears with a confirmation message for the selected action.

If the statement was not settled in full, the amounts on the page must be adjusted to indicate the amount of commission that has been taken.

Using the Add A Note Feature

The Add A Note feature is used to add a note to an account, and is accessible from the upper right-hand corner of most of the pages that are accessed from the Account Home page.

Once a note is saved, it cannot be changed or deleted.

To add a note to an account:

1. Click .
The Account Notes window appears.
2. Enter the desired title and text, and then click **Save**.
3. (Optional) To view the complete text of the note, click the **Show Preview** button  on the **Recent Account Activity** list.

Working with Monthly Premium Reporting

Customization is required to utilize the Monthly Premium Reporting (MPR) feature in Duck Creek Billing™. See *Configuring Monthly Premium Reporting* in the *Duck Creek Billing™ Reference Guide*.

 Save

Monthly premium Reporting allows a business to pay higher premiums during the time the business is more active, and lower premiums during times of reduced activity. Pricing for an MPR policy is based on the annual estimated exposure or payroll subject to the rates, the exposure modification, and other factors the carrier has in the filing. By reporting the actual exposure monthly the premium due can be accurately calculated throughout the policy term. Businesses that may benefit from MPR include construction contractors, amusement parks, and ski resorts.

The following items are requirements for MPR policies:

- An account can include only one active MPR policy
- The policy must be auditable
- The value of the *Policy Plan Setup Frequency* setting must be *Monthly*

Typically, the carrier issues 11 payroll reports for the first 11 months of the policy and the 12th month is covered by the deposit. An overpayment is returned to the insured after the final audit, and an underpayment is due following the final audit. When a Final Audit transaction is received for an MPR policy, a new receivable transaction for the entire premium amount replaces any existing premium receivables for the policy term.

When the MPR form generation date arrives, the carrier prints the form and sends it to the customer. The customer enters their risk information on the form, calculates the amount due using the risk factor on the form, and returns the completed form and payment to the carrier. The carrier enters the information from the form into the system which creates a new receivable for the policy. The carrier enters the payment received for the new receivable.

When the MPR form is not returned by the specified date, the policy goes into pending cancel status for failure to report (PCNR). If the MPR form is returned without payment, the policy goes into pending cancel status for non-payment (PCNP). If payment is received and entered into the system prior to the cancellation date, the policy cancellation is automatically rescinded.

If an MPR payment is submitted incorrectly, use the write-off process to reverse the payment. See "Reversing Payments" in the Duck Creek Billing™ User Guide.

An MPR policy in PCNR or PCNP status can be manually rescinded from the Policy Summary screen within Duck Creek Billing™. See "Working with MPR Policy Terms" in the Duck Creek Billing™ User Guide.

Creating an MPR Policy

Because customization is required to utilize the MPR feature, the steps required to create a policy will vary. The following procedure is based on out-of-the-box functionality.

To create an MPR policy:

1. Click the **Policy Management** tab.
2. Create an *auditable* policy with a *Monthly* audit period frequency.
3. Enter the policy information.
4. Make note of the policy number before exiting the Policy Management system.
5. On the Submission page, select the **MPR Policy** check box.
6. Click **Complete Issuance**.
7. Click the **Billing** tab.
8. From the Billing Dashboard, in the **I want to find an account by** list, click one of the following options:
 - Account Number
 - Policy Number
9. In the **searching for** text box, enter the policy number noted in Step 4.
10. Click **Search**.

The Account Home page appears.

When the MPR form is generated for an account, the activity is included in the **Recent Account Activity** list for the account.

Working with MPR Reports

The MPR form includes the risk exposure for the specific MPR policy. The form can be printed and sent to the customer who will enter their exposure information and calculate the amount due based on the risk factor.

To print the MPR form:

- From the Account Home page, in the **Recent Account Activity** list, click the **Download Attachment** button .

The form opens as a .pdf file.

When the MPR form and payment are received, the information on the form and the payment should be entered for the appropriate account.

To enter the information submitted by a customer on an MPR report:

1. Click on the appropriate **Policy Term** link in the **Policies Associated With This Account** list.
The Policy Term Summary page appears.
2. In the **Policy Term Actions** list in the left navigation panel, click **Submit MPR**.
3. Enter the information on the form into the appropriate text boxes.
4. Click **Submit Report**.

To enter the payment submitted with the MPR form:

1. From the Account Home page for the appropriate account, in the left navigation click **Make A Payment**.
2. Enter the appropriate payment information.

The payment appears in the **Recent Account Activity** list for the account.

Viewing the Account Home Page

The Account Home page serves as a launching page for the primary tasks within Duck Creek Billing™.

The screenshot displays the 'Account Home' page for 'Williams' Insurance Agency' (Account Number: 000000003). The left sidebar contains navigation links: Account Home, Installment Schedule, Account Settings, Make A Payment, Items In Suspense, Hold Billing Activities, Account Tasks, Account Ledger, Account Details, Payor, Payee, and Agent. The main content area includes sections for 'Most Recent Invoice', 'Last Payment Received', and 'Next Scheduled Invoice'. Below these is the 'Recent Account Activity' table, followed by 'Policies Associated With This Account'.

Date	Activity Type	Created By	Amount
2/16/2011, 1:07 pm	Policy Transaction New Business: receivable has been processed.	Express Admin	\$1,205.00
2/16/2011, 1:07 pm	Policy Term Issued Policy Term 3P2011 02/16/2011 - 02/16/2012 created	Express Admin	N/A
2/15/2011, 3:56 pm	Account Created Account created.	Express Admin	N/A

Policy Reference	Policy Term	Policy Status	Current Due	Outstanding Balance
Policy Reference: 3P2011 Line 1 (1 Item)				
3P2011 Line 1	2/16/2011 - 2/16/2012	Active	\$0.00	\$1,205.00

- To view an Account Home page, click the appropriate account number in the **Accounts Last Accessed** list from the Billing Dashboard.

You can also:

Launch a search for a Duck Creek Billing™ account. For more information, see *Searching for a Billing Account*.

The following table lists the information available from the Account Home page.

Section	Description
---------	-------------

Most Recent Invoice	Displays a summary of the most recent invoice. Click the Download Attachment button  to print a copy of a paper invoice. EFT Invoices are available for online viewing only. For more information, see <i>Viewing and Reprinting Invoices</i> .
Last Payment Received	Displays a summary of the last payment received. Click the Payment Amount link to view the details of the payment.
Next Scheduled Invoice	Displays a summary of the next scheduled invoice. Click the Invoice Date link to view the expanded Installment Schedule for the selected account.
Recent Account Activity list	Displays the details of all activity associated with the selected account. Use the Show Preview button  to expand or collapse the view.
Policies Associated With This Account	Displays a list of all the policies associated with the selected account. Use the available filters to sort the list of policies.
Installment Schedule	Displays the installment schedule for the selected account.
Account Settings	Displays the current account settings, and allows the user to change settings.
Make A Payment	Opens the Make A Payment page for the selected account.
Items In Suspense	Opens the Items In Suspense page for the selected account.
Hold Billing Activities	Opens the Hold Billing Activities page for the selected account.
Account Ledger	Displays the Account Ledger summary for the selected account.
Account Details	Displays the Account Details for the selected account.
Payor	Displays the account payor details, and allows the user to change the payor on the selected account.
Payee	Displays the account payee details, and allows the user to change the payee on the selected account.
Agent	Displays agent details for the selected account.

Viewing and Reprinting Invoices

An invoice can be printed for accounts using paper or Electronic Funds Transfer (EFT) invoices. The invoice type is determined at the account level, and all policies associated with the same account must use the same invoice type.

Paper invoices are automatically generated when the Bill Production Offset Days setting for an account is reached, and the Target Draw Days setting determines when an EFT invoice amount is drawn from the appropriate account. For more information on these settings, see *Selecting Billing Account Options*.

When the invoice creation date and the policy term issue date are the same, there is a five minute delay in generating the invoice to allow the data to be stored in the database. A PDF file of an invoice is not available for viewing until the invoice is generated.

Duck Creek Billing™ enables users to view the next scheduled invoice, the most recent invoice, or any invoice previously created for the account.

To preview the next scheduled invoice:

- Click the **Date** link in the **Next Scheduled Invoice** section.

The Installment Schedule appears.

A PDF file is available for viewing and printing the most recent invoice, or any previous invoice for the account. The invoice is a duplicate, and doesn't include any changes made to the account since the original invoice date.

To view the most recent invoice:

- From the Account Home page for the appropriate account, click the **Download Attachment** button  in the **Most Recent Invoice** section.
- The user is prompted to **Save** or **Open** the file.

To view the next scheduled invoice:

- From the Account Home page for the appropriate account, click the **Date** link in the **Next Scheduled Invoice** section.

You can also:

Click the **Download Attachment** button  in the **Recent Account Activity** list.

The Installment Schedule appears.

To preview or print view a previous invoice:

- From the Account Home page, click the appropriate **Download Attachment** button  in the **Recent Account Activity** list.
- The user is prompted to **Save** or **Open** the file.

To reprint an invoice without a preview:

- Click the **Reprint Invoice** button  in the **Most Recent Invoice** section.

The invoice is automatically sent to the default printer.

Viewing the Account Installment Schedule

The Installment Schedule page provides a comprehensive list of the details of the installments associated with an account.

To view the Account Installment Schedule:

- Click the appropriate account in the **Accounts Last Accessed** list on the Billing Dashboard.
The Account Home page appears.

You can also:
Search for an account. For more information, see *Searching for a Billing Account*.

- From the Account Home page, click **Installment Schedule**.
The Installment Schedule page appears.
- Click the **Expand/Collapse** button  to change the page view.
- In the **Date** text box, enter a start date for the installment schedule.

You can also:
Click the **Calendar** button  to select a date.

- In the **End date** text box, enter an end date for the installment schedule.

You can also:
Click the **Calendar** button  to select a date.

- Click the **Refresh** button .
The following table lists the information available for the Installment Schedule.

Item	Description
Install Date	Displays the date invoices will be generated for the account.
Term	Displays the effective date and expiration date for the policy.
Due Date	Displays the date payment is due, determined by the Target Due Date or Target Draw Date.

Recv	Displays the receivable type.
Trans	Displays the type of transaction: NBUS (new business) END (endorsement) ETC (etc.)
Item Amt	Displays the total amount of the premium sent from the Billing system.
Install Amt	Displays the amount of the installment.
Cash	Displays all payments applied against scheduled items.
Credit	Displays all credits applied to the installment amount.
WriteOff	Displays any written-off or waived premiums or charges.
ReDist	Displays any redistributed installment amounts.
Balance	Displays the balance after cash, credits, write-offs, or redistributions are deducted from the installment amount.

Writing Off or Waiving an Installment

To write off or waive an installment:

1. From the Installment Schedule page for the appropriate account, click the **Expand/Collapse** button  to expand the view.
2. In the **Item Amt** column, click the **Write-Off or Waive** button  for the appropriate item. The Write Off Or Waive An Installment page appears.
3. In the **I Want to** list, click one of the following options:
 - Write-off
 - Waive
4. From the **Reason** list, click one of the following options:
 - Account correction
 - Due to cancellation
 - MPR final audit adjustment
 - Net settlement commission adjustment
 - Overpayment
 - Unable to collect
 - Under invoice tolerance
 - Underpayment
5. Click **Write-Off** or **Waive**.

Depending on the option selected in Step 3, the button at the bottom of the page dynamically updates. The Installment Schedule page appears with a confirmation message for the selected action.

Working with Manual Installment Redistribution

Configuration is required to manually redistribute installments. For more information, see *Manually Redistributing Installments* in the *Duck Creek Billing™ Reference Guide*.

Manual Installment Redistribution is designed to allow a customer additional time to pay a large amount due, such as final audit premiums. This feature is accessible as a link in the balance column on the Installment Schedule page. The link is available only when an open balance exists on the account.

To manually redistribute an installment:

1. From the **Installment Schedule** page, click the **Expand/Collapse** button  to expand the view.
2. Click the appropriate **installment amount** link in the **Balance** column.
The Manual Installment Redistribution page appears.
3. In the **Earliest Start Date** text box enter the date to begin the installment redistribution.

You can also:

Click the **Calendar** button  to select a date.

4. In the **Number of Installments** text box enter the number of installments for the redistributed amount.
5. Click **Redistribute**.

The Installment Schedule page appears with a confirmation message displaying the details of the redistributed installments.

Working with Late Entered Policies

ManuScript configuration is required to use this feature. For more information, see *Working with a Late Entered Policy* in the *Duck Creek Billing™ Reference Guide*.

The Late Entered Strategy feature allows an out-of-cycle EFT installment to be added to collect premium for a late entered new business policy.

This feature allows policy equity to be protected by minimizing the coverage that is provided without payment, in addition to having a positive impact on cash flow and commissions.

Selecting Billing Account Options

You can easily view or change account settings.

To select Billing Account Options:

1. In the **Accounts Last Accessed** list on the Billing Dashboard, click the appropriate account.

You can also:
Search for the account. For more information, see *Searching for a Billing Account*.

The Account Home page appears.

2. Click **Account Settings**.
The Select Billing Account Options page appears, and the current settings are displayed.
3. Make the desired account settings.
4. Click **Save Changes**.
The Account Home page appears.

Any change appears on the **Recent Account Activity** list as an Account Configuration Settings Change.

Working with Service Charges

Service charges are optional and can be a fixed or variable amount. Variable services charges are based on a specified percentage of the installment amount due. Items can be excluded from the percentage-based service charge calculation for both paper and EFT invoices.

No Service Charge Specified

To specify that no service charge be associated with an account:

1. From the Account Home page for the appropriate account, click **Account Settings** in the left navigation panel.
2. In the **Invoice** section, in the **Invoice Method** list, click one of the following options:
 - Paper
 - EFT
3. Do one of the following:
 - For a paper invoice account, in the **Paper Invoice Service Charge Action** list, click **No Service Charge**.
 - For an EFT invoice account, in the **EFT Invoice Service Charge Action** list, click **No Service Charge**.
4. Click **Save Changes**.

Specifying a Service Charge Amount

To specify a fixed service charge amount:

1. From the Account Home page for the appropriate account, click **Account Settings** in the left navigation panel.
2. In the **Invoice** section, in the **Invoice Method** list, click one of the following options:
 - Paper
 - EFT
3. Do one of the following:
 - In the **EFT Service Charge Amount** text box, enter the service charge amount.

- In the **Invoice Service Charge** text box, enter the service charge amount.
4. Do one of the following:
 - In the **Paper Invoice Service Charge Action** list, click **Fixed Service Charge**.
 - In the **EFT Invoice Service Charge Action** list, click **Fixed Service Charge**.
 5. Click **Save Changes**.

Specifying a Variable Service Charge Amount

To specify a variable service charge calculation:

1. Do one of the following:
 - In the **Paper Invoice Service Charge Percent** text box, enter the appropriate percentage.
 - In the **EFT Invoice Service Charge Percent** text box, enter the appropriate percentage.

For example, enter 5% as 5.00.

2. (Optional) In the **Service Charge Minimum Amount** text box, enter the appropriate value.
3. (Optional) In the **Service Charge Maximum Amount** text box, enter the appropriate value.

If the calculated variable percentage service charge amount is between the specified minimum and maximum service charge amounts, the service charge defaults to the minimum or maximum amount specified, depending on which is closest to the percentage-based calculation. For example, if the percentage-based service charge is \$4, and the minimum is \$5, the service charge amount will be \$5. If the maximum service charge is \$10, and the calculated amount is \$11, the service charge amount will default to the maximum service charge amount of \$10. To always accept the percentage-based calculation, do not specify minimum and maximum service charge amounts.

4. Click **Save Changes**.

The service charge calculation includes all non-excluded installments. Any receivables that are to be excluded from the service charge calculation must be specified.

Excluding Items from Variable Service Charge Calculations

To exclude an item from the variable service charge calculation:

1. Do one of the following:
 - In the **Paper Variable Service Charge Exclusions** section, click the appropriate item in the **Invoice Line Type** list.
 - In the **EFT Variable Service Charge Exclusions** section, click the appropriate item in the **Invoice Line Type** list.
2. In the **Receivable Type** list, click the appropriate item.
3. In the **Receivable Sub Type** list, click the appropriate item.
4. In the **Transaction Type** list, click the appropriate item.
5. Click **Add New Exclusion**.

6. (Optional) To add another exclusion, repeat Steps 2-5.

Working with Projected Service Charges

Projected (pending) service charge amounts can be viewed on the Installment Schedule for an account before they are assessed to an account as part of the installment invoicing process.

This feature is available out of the box. To disable this feature, clear the **Use Projected Service Charge** check box on the Select Billing Account Options page.

To view a projected service charge:

1. On the Account Home page for the appropriate account, in the left navigation panel, click **Installment Schedule**.
The Installment Schedule page appears.
2. Expand the **Installment Date** and the Pending Service Charges appear below the policy term dates for the selected installment.

Viewing the Account Installment Schedule

The Installment Schedule page provides a comprehensive list of the details of the installments associated with an account.

To view the Account Installment Schedule:

1. Click the appropriate account in the **Accounts Last Accessed** list on the Billing Dashboard.
The Account Home page appears.

You can also:
Search for an account. For more information, see *Searching for a Billing Account*.

2. From the Account Home page, click **Installment Schedule**.
The Installment Schedule page appears.
3. Click the **Expand/Collapse** button  to change the page view.
4. In the **Date** text box, enter a start date for the installment schedule.

You can also:
Click the **Calendar** button  to select a date.

5. In the **End date** text box, enter an end date for the installment schedule.

You can also:

Click the **Calendar** button  to select a date.

6. Click the **Refresh** button .

The following table lists the information available for the Installment Schedule.

Item	Description
Install Date	Displays the date invoices will be generated for the account.
Term	Displays the effective date and expiration date for the policy.
Pending Service Charge	Displays the projected or pending service charges for the policy.
Due Date	Displays the date payment is due, determined by the Target Due Date or Target Draw Date.
Recv	Displays the receivable type.
Trans	Displays the type of transaction: NBUS (new business) END (endorsement) ETC (etc.)
Item Amt	Displays the total amount of the premium sent from the Billing system.
Install Amt	Displays the amount of the installment.
Cash	Displays all payments applied against scheduled items.
Credit	Displays all credits applied to the installment amount.
WriteOff	Displays any written-off or waived premiums or charges.
ReDist	Displays any redistributed installment amounts.
Balance	Displays the balance after cash, credits, write-offs, or redistributions are deducted from the installment amount.

Writing Off or Waiving an Installment

To write off or waive an installment:

1. From the Installment Schedule page for the appropriate account, click the **Expand/Collapse** button  to expand the view.
2. In the **Item Amt** column, click the **Write-Off or Waive** button  for the appropriate item.
The Write Off Or Waive An Installment page appears.

3. From the **I Want to** list, click one of the following options:

- Write-off
- Waive

4. From the **Reason** list, click one of the following options:

- Account correction
- Due to cancellation
- MPR final audit adjustment
- Net settlement commission adjustment
- Overpayment
- Unable to collect
- Under invoice tolerance
- Underpayment

5. Click **Write-Off** or **Waive**.

Depending on the option selected in Step 3, the button at the bottom of the page dynamically updates. The Installment Schedule page appears with a confirmation message for the selected action.

Selecting Policy Plan Options

You can easily view or change policy plan options.

To select Policy Plan Options:

1. In the **Accounts Last Accessed** list on the Billing Dashboard, click the appropriate account.

You can also:

Search for the account. For more information, see *Searching for a Billing Account*.

The Account Home page appears.

2. In the **Policies Associated With This Account** section, click the appropriate **Policy Term** link.
The Policy Term Summary page appears.

3. In the **Policy Term Actions** list, click **View/Edit Policy Term Settings**.
The Policy Plan Options page appears.

4. Make the desired changes.

5. Click **Save Changes**.
The Policy Term Summary page appears.

Any change appears in the **Recent Account Activity** list as a Policy Term Configuration Change.

Making a Payment

The following payments methods can be used in Duck Creek Billing™:

- Cash
- Check
- Credit card
- Debit card
- Expense
- Phone check
- Pre-authorized credit card
- Pre-authorized debit card

Payments can be made at the account or policy level, and may be entered individually or in batches. For more information on batch payments, *Working in the Batch Cash Management Area*.

When payment is applied to a policy term, if the optional ability to specify allocation priorities has been selected and the payment amount isn't sufficient to pay the full amount due, the payment is allocated to the receivables in the order specified. If a policy term is in PCN status and the equity-bearing receivables option has been specified, payment is applied to the specified equity-bearing items first. For more information, see *Adding an Allocation Priority* and *Working with an Equity-Bearing Calculation*.

Making a Cash Payment

To make a cash payment on an account:

1. Select the appropriate account from the Billing Dashboard.

You can also:

Search for the account. For more information, see *Searching for a Billing Account*.

The Account Home page appears.

2. In the left navigation panel, click **Make A Payment**.
The Make A Payment page appears.
3. In the **Payment Method** list, click **Cash**.
4. In the **Payment Type** list, click one of the following options:
 - Cash with App (application)
 - Deposit
 - Payment
 - Voucher

The **Date Received** defaults to the current system date.

5. (Optional) Enter a different date in the **Date Received** text box.

You can also:

Click the **Calendar** button  to select a date.

The **I want to pay** options vary, depending on the Payment Type selected.

Selecting Cash With App as the Payment Type

1. Enter the payment amount in the **Other Amount** text box.
2. Click **Submit**.

A confirmation message appears at the top of the Account Home page. Click the **Payment Amount** link to view the Payment Detail page.

The payment date and amount are included in the **Last Payment Received** section on the Account Home page.

Selecting Deposit, Payment, or Voucher as the Payment Type

1. Select one of the following options:
 - Click **Current Invoice** to pay the displayed current invoice amount.
 - Click **Current Due** to pay the current amount due.
 - Click **Account Balance** to pay the displayed outstanding balance.
 - Click **Other Amount** to enter a different payment amount.
When this option is selected, the **I want to choose how to apply this payment** check box appears.
2. (Optional) Select the **I want to choose how to apply this payment** check box to enter allocation amounts.
3. (Optional) Enter the appropriate amount to allocate.
4. Click **Submit**.
The Account Home page appears.

A confirmation message appears at the top of the Account Home page. Click the **Payment Amount** link to view the Payment Detail page.

The payment date and amount are included in the **Last Payment Received** section on the Account Home page.

Making a Payment by Check

To make payment by check:

1. Click the appropriate account from the Billing Dashboard.

You can also:

Search for the account. For more information, see *Searching for a Billing Account*.

The Account Home page appears.

2. In the left navigation panel, click **Make A Payment**.
The Make A Payment page appears.
3. In the **Payment Method** list, click **Check**.
4. In the **Payment Type** list, click one of the following options:
 - Cash With App (application)
 - Deposit
 - Payment
 - Voucher

The **Date Received** defaults to the current system date.

5. (Optional) Enter a different date in the **Date Received** text box.

You can also:

Click the **Calendar** button  to select a date.

6. Enter the appropriate number in the **Check Number** text box.
7. Enter the appropriate date in the **Postmark Date** text box.

You can also:

Click the **Calendar** button  to select a date.

If the account type is *Person*, the first and last name text boxes are pre-filled. If the account type is *Organization*, the Last Name text box is pre-filled with the Organization/Agency name, and the First Name text box is blank.

8. (Optional) Enter the appropriate name in the **First Name** (on check) text box.
9. (Optional) Enter the appropriate name in the **Last Name** (on check) text box.

The **I want to pay** options vary, depending on the Payment Type selected.

Selecting Cash With App as the Payment Type

1. Enter the payment amount in the **Other Amount** text box.
2. Click **Submit**.

A confirmation message appears at the top of the Account Home page. Click the **Payment Amount** link to view the Payment Detail page.

The payment date and amount are included in the **Last Payment Received** section on the Account Home page.

Selecting Deposit, Payment, or Voucher as the Payment Type

1. Select one of the following options:
 - Click **Current Invoice** to pay the displayed current invoice amount.
 - Click **Account Balance** to pay the displayed outstanding balance.

This option appears only when an account balance exists.

- Click **Other Amount** to enter a different payment amount.
When this option is selected, the **I want to choose how to apply this payment** check box appears.
2. (Optional) Select the **I want to choose how to apply this payment** check box to enter allocation amounts.
 3. (Optional) Enter the appropriate amount to allocate.
 4. Click **Submit**.
The Account Home page appears.

A confirmation message appears at the top of the home page. Click the **Payment Amount** link to view the Payment Detail page.

The payment date and amount are included in the **Last Payment Received** section.

Making a Payment by Credit or Debit Card

To make a payment by credit or debit card:

1. From the Billing Dashboard, click the desired account.

You can also:
Search for the account. For more information, see *Searching for a Billing Account*.

The Account Home page appears.

2. In the left navigation panel, click **Make A Payment**.
The Make A Payment page appears.
3. In the **Payment Method** list, click **Credit Card** or **Debit Card**.

4. In the **Payment Type** list, click one of the following options:
 - Cash With App (application)
 - Deposit
 - Payment
 - Voucher
5. Enter the appropriate card information.

If the account type is *Person*, the first and last name text boxes are pre-filled. If the account type is *Organization*, the Last Name text box is pre-filled with the Organization/Agency name, and the First Name text box is blank.

The **I want to pay** options vary, depending on the Payment Type selected.

Selecting Cash With App as the Payment Type

1. Enter the payment amount in the **Other Amount** text box.
2. Click **Submit**.

A confirmation message appears at the top of the Account Home page. Click the **Payment Amount** link to view the Payment Detail page.

The payment date and amount are included in the **Last Payment Received** section on the Account Home page.

Selecting Deposit, Payment, or Voucher as the Payment Type

1. Select one of the following options:
 - Click **Current Invoice** to pay the displayed current invoice amount.
 - Click **Account Balance** to pay the displayed outstanding balance.
- Click **Other Amount** to enter a different payment amount.
When this option is selected, the **I want to choose how to apply this payment** check box appears.
2. (Optional) Select the **I want to choose how to apply this payment** check box to enter allocation amounts.
3. (Optional) Enter the appropriate allocations.
4. Click **Submit**.
The Account Home page appears.

A confirmation message appears at the top of the home page. Click the **Payment Amount** link to view the Payment Detail page.

The payment date and amount are included in the **Last Payment Received** section on the Account Home page.

Working with the Expense Payment Method

The expense payment method is designed for refunding miscellaneous expenses, either automatically or manually, to an account payee or for applying the refund amount to an outstanding amount due on the payee's account. When the expense payment method is selected, it creates a credit at the account level which can be processed using the refund to source or disbursement feature.

To use the expense payment method:

1. From the Billing Dashboard, click the desired account.
The Account Home page appears.

You can also:
Search for the account. For more information, see *Searching for a Billing Account*.

2. In the left navigation panel, click **Make A Payment**.
The Make A Payment page appears.
3. In the **Payment Method** list, click **Expense**.

No selection in the **Payment Type** list is required. Changing the default option will not affect the results of the transaction.

4. Click **Other Amount** and then enter the appropriate amount in the text box.
5. Select the **I want to choose how to apply this payment** checkbox.
6. Click **I want to choose how to apply this payment**.
7. Click **Submit**.

Because no amount was allocated, the full amount is placed in suspense at the account level.

8. In the left navigation panel, click **Items In Suspense**.
9. Select the check box for the appropriate item.
10. In the **Select An Action** list, click **Manually Allocate**.
11. Click **Submit**, and then click **Allocate**.
An Alert Message indicates the total amount will be placed on hold at the account level.
12. Click **Yes**, and then click **Allocate**.
The amount is now available for disbursement using either the refund to source or disbursement feature.

The expense amount cannot be transferred to another account.

For more information, see *Working with Refund to Source* or *Working with Disbursements*.

Making a Payment by Phone Check

To make a payment by phone check:

1. Click the account from the Billing Dashboard.

You can also:

Search for the account. For more information, see *Searching for a Billing Account*.

The Account Home page appears.

2. In the left navigation panel, click **Make A Payment**.
The Make A Payment page appears.
3. In the **Payment Method** list, click **Phone Check**.
4. In the **Payment Type** list, click one of the following options:
 - Cash With App (application)
 - Deposit
 - Payment
 - Voucher

The **Date Received** defaults to the current system date.

5. (Optional) To change the date, enter a different date in the **Date Received** text box.

You can also:

Click the **Calendar** button  to select a date.

6. Enter the appropriate information for the payment account.

If the account type is *Person*, the first and last name text boxes are pre-filled. If the account type is *Organization*, the Last Name text box is pre-filled with the Organization/Agency name, and the First Name text box is blank.

Depending on the Payment Type selected, the **I want to pay** options will vary.

Selecting Cash With App as the Payment Type

1. Enter the payment amount in the **Other Amount** text box.
2. Click **Submit**.

A confirmation message appears at the top of the Account Home page. Click the **Payment Amount** link to view the Payment Detail page.

The payment date and amount are included in the **Last Payment Received** section on the Account Home page.

Selecting Deposit, Payment, or Voucher as the Payment Type

1. Select one of the following options:
 - Click **Current Invoice** to pay the displayed current invoice amount.
 - Click **Account Balance** to pay the displayed outstanding balance.

This option appears only when an account balance exists.

- Click **Other Amount** to enter a different payment amount.
When this option is selected, the **I want to choose how to apply this payment** check box appears.
2. (Optional) Select the **I want to choose how to apply this payment** check box to enter allocation amounts.
 3. (Optional) Enter the appropriate allocations.
 4. Click **Submit**.
The Account Home page appears.

A confirmation message appears at the top of the home page. Click the **Payment Amount** link to view the Payment Detail page.

The payment date and amount are included in the **Last Payment Received** section on the Account Home page.

Making a Payment by Pre-authorized Credit or Debit Card

While credit and debit card payments are authorized in the Duck Creek Billing™ system, pre-authorized credit and debit payments are authorized before they are entered in Duck Creek Billing™.

A payment processing center may use its own credit or debit card authorization process and send the payments as an electronic file (lockbox payment) for processing in Duck Creek Billing™.

To make a payment by pre-authorized credit or debit card:

1. From the Billing Dashboard, click the appropriate account.

You can also:
Search for the account. For more information, see *Searching for a Billing Account*.

The Account Home page appears.

2. In the left navigation panel, click **Make A Payment**.
The Make A Payment page appears.
3. In the **Payment Method** list, click **Pre-Authorized Credit Card** or **Pre-Authorized Debit Card**.
4. In the **Payment Type** list, click one of the following options:
 - Cash With App (application)
 - Deposit
 - Payment

- Voucher

The Expiration Date must be selected, but because the payment is pre-authorized, the card information is not required. Entering information in non-required fields is optional.

The **I want to pay** options vary, depending on the Payment Type selected.

Selecting Cash With App as the Payment Type

1. Enter the payment amount in the **Other Amount** text box.
2. Click **Submit**.

A confirmation message appears at the top of the Account Home page. Click the **Payment Amount** link to view the Payment Detail page.

The payment date and amount are included in the **Last Payment Received** section on the Account Home page.

Selecting Deposit, Payment, or Voucher as the Payment Type

1. Select one of the following options:
 - Click **Current Invoice** to pay the displayed current invoice amount.
 - Click **Account Balance** to pay the displayed outstanding balance.

This option appears only when an account balance exists.

- Click **Other Amount** to enter a different payment amount.
When this option is selected, the **I want to choose how to apply this payment** check box appears.
2. (Optional) Select the **I want to choose how to apply this payment** check box to enter allocation amounts.
 3. (Optional) Enter the appropriate allocations.
 4. Click **Submit**.
The Account Home page appears.

A confirmation message appears at the top of the home page. Click the **Payment Amount** link to view the Payment Detail page.

The payment date and amount are included in the **Last Payment Received** section on the Account Home page.

Working with an Automated Notice of Change

Configuration is required to utilize this feature. For more information, see the Working with Automated Notice of Change for EFT Payments in the Duck Creek Billing™ Reference Guide.

The bank account information used by EFT invoice accounts is automatically updated in response to messages from a bank or payment processing service.

When the changes are successfully processed, a message is added to the **Recent Account Activity** list for the account.

To prevent disclosure of confidential information, details for automated notices of change are not included in the messages on the **Recent Account Activity** list. For example, a routing number change would indicate the routing number has changed, but would not include the actual number.

Working with the Bank Details Modulus Check Feature

Configuration is required to utilize this feature. For more information, see Working with the Bank Details Modulus Check feature in the Duck Creek Billing™ Reference Guide.

Internal verification may be required by some Duck Creek Billing™ users to reduce the number of rejected transactions. Verification requirements vary by country.

The Bank Details Modulus Check Feature provides for internal verification of EFT bank details by validating a set of numbers against a specific check digit or digits. Depending on system configuration, different types of modulus checks can be utilized in Duck Creek Billing™.

Working with EFT Payments

To view EFT Payment details:

- From the Account Home page, in the **Recent Account Activity** list, click the appropriate **Payment Amount** link.

You can also:
From the Billing Dashboard, click **Search For A Payment**.

The Payment Details page appears.

The following information is displayed in the Payment Details section for an EFT payment:

- Amount (of the payment)
- Date Entered
- Status (of the account)
- Payment Method
- Routing Number
- Account Number

If the bank account information changes, any previous transactions will retain the original payment details.

Working with an Automated Notice of Change

Configuration is required to utilize this feature. For more information, see the *Working with Automated Notice of Change* in the Duck Creek Billing™ Reference Guide.

 Save

The bank account information used by EFT invoice accounts is automatically updated in response to messages from a bank or payment processing service.

When the changes are successfully processed, a message is added to the **Recent Account Activity** list for the account.

To prevent disclosure of confidential information, details for automated notices of change are not included in the messages on the **Recent Account Activity** list. For example, a routing number change would indicate the routing number has changed, but would not include the actual number.

Working with the EFT Maintenance Page

A specific privilege is required to use this feature. For more information, see *Configuring the EFT Maintenance Privilege* in the *Duck Creek Billing™ Reference Guide*. If a user does not have the required privilege the EFT pages are read-only.

Save

The Maintain EFT Transaction page provides quick access to a list of pending EFT transactions for an account. All pending EFT draws, including rejected draws that are awaiting representment for payment, are included on the page.

An EFT draw can be canceled, or the draw date for a pending EFT draw can be adjusted up to and including the date of the next scheduled EFT draw. If the EFT draw date that is changed falls on the same date as the subsequent draw, two separate draws will be completed. Two draws will also be completed if the draw is a rescheduled representment. If a payment is canceled, the draw amount is included in the next scheduled draw date and only one draw is completed.

If the next scheduled draw is the last scheduled draw for the policy term, the last possible draw date is the next draw date associated with the account cycle which may be past the expiration term for the current policy. Follow up activities, including late charges, PCN activities, and reminder notices, are automatically adjusted for the EFT draw date change.

The draw date is the only detail that can be changed, and draw dates can only be changed or canceled before the draw is transmitted.

Viewing a Pending EFT Draw

To view a pending EFT draw:

- In the left navigation panel for the appropriate account, click **EFT Maintenance**.
The Scheduled EFT Transactions page appears, displaying up to two pending EFT draws.

Changing a Pending EFT Draw Date

To change the draw date for a pending EFT draw:

1. In the left navigation panel for the appropriate account, click **EFT Maintenance**.
2. Click the appropriate **Draw date** link in the **EFT Transactions** list.

You can also:

Click the **Draw date** link on the **Recent Account Activity** list on the Account Home page for the appropriate account.

The Maintain EFT Transaction page appears.

3. In the **Draw Date** text box, enter a different date.

You can also:

Click the **Calendar** button  to select a new draw date.

An alert message appears if a date outside the displayed valid date range is entered or selected.

Clicking outside the Draw Date text box enables the **Update Draw** button.

4. Click **Update Draw**.

The **Recent Account Activity** list is updated to include the new EFT draw date.

Canceling a Pending EFT Draw

To cancel a pending EFT draw:

1. In the left navigation panel for the appropriate account, click **EFT Maintenance**.

The Scheduled EFT Transactions page appears.

2. Click the appropriate **Draw date** link.

You can also click the **Draw date** link in the **Recent Account Activity** list on the Account Home page.

3. Click **Cancel this Draw**.

4. In the verification dialog box, click **Yes** to cancel the draw.

A confirmation message appears on the Account Home page, and the cancellation is added to the **Recent Account Activity** list.

Working with the Bank Details Modulus Check Feature

Configuration is required to utilize this feature. For more information, see *Working with the Bank Details Modulus Check* feature in the *Duck Creek Billing™ Reference Guide*.

Internal verification may be required by some Duck Creek Billing™ users to reduce the number of rejected transactions. Verification requirements vary by country.

The Bank Details Modulus Check Feature provides for internal verification of EFT bank details by validating a set of numbers against a specific check digit or digits. Depending on system configuration, different types of modulus checks can be utilized in Duck Creek Billing™.

Viewing Payment Details

You can view the details of payment allocations for an account.

To view payment detail:

- From the Account Home page, in the **Recent Account Activity** list, click the appropriate **Payment Amount** link.

You can also:

From the Billing Dashboard, click **Search For A Payment**.

The Payment Details page appears.

Reversing Payments

A payment can be manually reversed out of the billing system.

To reverse a payment:

1. In the **Recent Account Activity** list, click the **Payment Amount** link to reverse.

You can also:

From the **Account Home** page, click the **Amount** link within the **Last Payment Received** activity box.

The Payment Detail page appears.

2. In the **Reason** list, click the appropriate reason for reversal.

If non-sufficient funds (NSF) is the reason for the payment reversal, the system will process the NSF fee and notice on the originating account. Only one NSF fee will be assessed to the originating account even if payment has been allocated to other billing accounts. This option is available only when payment is made by check.

3. Click **Reverse Payment**.

No further action can be taken with the reversed payment. All bill items and account level charges that were paid by the reversed payment are re-opened. The re-opened bill items resulting from a payment reversal will follow the account level parameters of the billing account.

If a payment is reversed due to a Company Mistake or NSF, the due date will be automatically adjusted only if the account level parameter (Payment Reversal Due Date Adjustment Reasons) is set to CM or NSF. If the payment reversal reason is not indicated using this parameter, the due dates for the re-

opened bill items will remain the same. Any re-opened bill items will follow the scheduling rules of the account.

Re-suspending a Payment Write-off

A written-off payment allocation can be manually reversed, placing the allocation back in a suspended state.

To re-suspend a written-off payment:

1. From the Account Home page, click the **Written-off amount** link in the **Recent Account Activity** list. The Payment Write-off Detail page appears.
2. In the **Re-suspend this Write-off** list, click one of the following reasons:
 - **Payment Reversal** — Removes an invalid payment from the billing system. Reasons for removal include non-sufficient funds, or a payment applied to an incorrect account. A payment applied in error can be removed from the system, and be re-entered and applied to the correct account.
 - **Pending Premium** — Holds the money in suspense until the premium for a policy is processed. Once the premium is processed, the suspense item will automatically allocate to the policy when the premium is posted to the Billing system.
 - **Written Off in error** — Reverses the write-off and places it back in suspense on the account. The re-suspended amount will follow the suspense processing parameters defined on the billing account.
3. In the **Hold Options** list, click one of the following options:
 - **Hold for Premium** — The amount remains in suspense on the account until the premium for a policy is processed.
 - **Manual Hold** — No automatic processing occurs, and the item remains in suspense until the hold is manually removed.
 - **No Hold** — The suspense item is immediately allocated to the policy term.
4. Click **Resuspend**. The Items in Suspense page appears.

The Account Home page appears, with a confirmation message regarding the re-suspended amount. The total amount being re-suspended is added to the **In Suspense Amount** on the account. The item remains in suspense until further action is taken, manually or automatically.

Working with Items in Suspense

An item can be placed in suspense manually or automatically. Items placed in suspense by either method follow the suspense processing parameters defined for the billing account.

After a payment is placed in suspense, it is automatically reviewed for disbursement based on the Disbursement Write Off Hold Days parameter setting. If the suspended amount is between the Disbursement

Maximum Amount and Disbursement Minimum Amount, disbursement is automatic if nothing is owed on the account.

Suspense parameters are:

- Disbursement Maximum Amount
- Disbursement Minimum Amount
- Disbursement Write Off Hold Days
- Cash With Application Disbursement Write Off Hold Days

Payments received in excess of a policy's outstanding balance automatically go into suspense if the account-level parameter, Excess Payment On Policy, is set to **S**. If the setting is **A**, the payment is automatically allocated to other policies on the account with a balance.

If there are no other bill items to allocate the excess payment to, the payment amount automatically goes into suspense regardless of the Excess Payment On Policy setting.

For details about setting parameters, see *Selecting Billing Account Options*.

The following table includes the available actions for working with items in suspense.

Action	Description
Disburse	The suspended amount is sent to the payee.
Hold For Premium	The suspended amount is held for the next premium.
Manually Allocate	The suspended amount is manually allocated.
Place Hold	The suspended amount is placed on hold.
Release Hold	The suspended amount is released from hold.
Transfer	The suspended amount is transferred to a different account.
Write Off	The suspended amount is written off.

Suspending a Payment

To place an item in suspense:

1. From the Billing Dashboard, click the appropriate account.

You can also:
Search for the account. For more information, see *Searching for a Billing Account*.

The Account Home page appears.

2. Click the **Payment Amount** link in the **Recent Account Activity** list.

The Payment Detail page appears.

3. In the **Payment Allocation** list, select the payments to be suspended.

4. Click **Suspend Selected**.

The Suspend Allocation page appears.

If the Allocation Type is **Suspense** Suspend Selected remains disabled because the payment is already in suspense.

5. (Optional) To suspend only a portion of a payment, enter an amount less than the total payment (default amount) in the **Suspend Amount** text box.

The amount entered cannot exceed the Available Amount.

6. In the **Reason for Suspension** list, click one of the following reasons:

- Awaiting Policy Premium
- Disbursement Reversal
- Due To Cancellation
- Due To Credit Endorsement
- Due To Payment Identification
- Manual
- Overpayment
- Policy Transfer
- Re-Allocation
- Research
- Transferred From Another Account
- Write Off Reversal

7. Click **Suspend**.

The Payment Detail page appears, showing the selected items in suspense.

8. Click **Items in Suspense** on the left navigation panel of the Account Home page to work with suspended items. The Items in Suspense page appears, with a list of all items in suspense for the selected account.

9. Click the appropriate item.

To perform the same action on multiple items, select the check boxes for all the appropriate items.

10. In the **Select an Action** list, click the appropriate action.

11. Click **Submit**.

The appropriate page for the selected action appears.

Working with Items on Hold

When an item is placed on hold, either manually or automatically, it appears on the Items In Suspense page for the appropriate account.

To release an item on hold:

1. From the left navigation panel, click **Items In Suspense**.
2. Select the checkbox for the appropriate item or items.
3. In the **Select An Action** list, click **Release Hold**.
The hold is released, and the payment amount is automatically processed.

Working with Refund to Source

Configuration is required to utilize this feature. See Working with the Refund to Payment Source Feature in the Duck Creek Billing™ Reference Guide.

When payment is made by check, credit card, debit card, or EFT, refunds can be made automatically to the source of the payment when the qualifying conditions for each payment source are met. If the conditions are not met, all refunds are made using the default method regardless of the payment type.

The following table lists the conditions for each available refund method.

Payment Source	Refund Method	Qualifying Conditions
Recurring EFT	EFT	• The EFT bank details for the payment and the refund must be the same. • Grouped payments must be from the same bank account which must be the current validated EFT source. • The EFT account may or may not be active in Duck Creek Billing™. • The original bank account is used for the refund. • Recurring EFT refund cannot include amounts from different sources unless a one-time EFT payment was made with the same bank details that match the recurring EFT bank details. • Multiple payments in suspense for the same bank account can be manually combined and handled as a single refund regardless of when the payment went into suspense or the number of hold days. • Multiple suspense amounts are automatically combined for the same bank account if the suspense amounts have been in suspense the number of days required by the configured Hold Days. If the Hold Days requirement is not met, separate refunds are issued.

One time credit card or debit card	Credit Card or Debit Card	• The Credit Card/Debit Card details for the payment and refund must be the same. • The Credit Card/Debit Card must be authorized in Duck Creek Billing™. • The Credit Card/Debit Card can be effective or expired.  If a refund fails on an expired card, the card is de-authorized in Duck Creek Billing™ and the refund is made by check. • Multiple suspense amounts for the same card can be manually combined and refunded as a single refund. • Multiple suspense amounts are automatically combined for the same bank account if the suspense amounts have been in suspense the number of days required by the configured Hold Days. If the Hold Days requirement is not met, separate refunds are issued. • The Duck Creek Billing™ account does not have to be active.
Check	Check	• No limitations.
Lockbox	Check	• No limitations.

Regardless of the payment source, refunds are made by check when the payee for the account does not match the name in the payment details.

Some payment processing services require verification before a refund can be processed. This may result in a rejection for one time credit card payments. If this process results in rejection, the refund must be manually disbursed and will be made by check. Regardless of the reason, all rejected refunds require manual disbursement. Rejected refunds are placed back in the Items in Suspense list for the appropriate account.

If payments are transferred from one Duck Creek Billing™ account to another, the refunds are based on the guidelines for the account the payment is transferred to. For example, if a payment amount made by check is transferred to another account which utilizes EFT billing, refunds will be made by EFT.

To refund to the payment source automatically:

1. From the Account Home page, click **Items in Suspense** in the left navigation panel.
The Items in Suspense page appears.
2. Select the check box for the appropriate item.

To perform the same action on multiple items in suspense, select all the appropriate check boxes.

3. In the **Select An Action** list, click **Disburse**.
The Disburse Funds page appears, and displays each selected suspense item.
4. Click **Submit**.

The Refund To Source page appears with the selected payee displayed.

5. (Optional) Click **Select Another Payee** to name a different payee for the disbursement.

The party data system search appears.

This procedure only changes the payee for a single disbursement. If the payee for a disbursement is changed, a confirmation message lists the new payee name and indicates this is not the default payee for the account. The change is also added to the **Recent Account Activity** list for the account. To change the payee for all account activity, see *Creating Accounts*.

6. Select the appropriate party.

The Refund To Source page appears.

7. (Optional) In the **Disbursement Amount** text box, enter an amount other than the default to disburse less than the full amount.

The amount entered cannot exceed the Available Amount.

8. Click **Refund**.

The Items In Suspense page appears and the Items Pending Disbursement list is displayed.

9. (Optional) Click the **View Details** link to see the details of the item pending disbursement.

Working with Disbursement Holds

The **Disbursement Hold** check box in the **Account Plan** settings determines if refunds are allowed. To allow refunds, the check box must be selected.

For more information about this setting, see *Working with Billing Account Options*.

Manually Disbursing an Item in Suspense

To manually disburse an item in suspense:

1. From the Account Home page, click **Items in Suspense**.

The Items in Suspense page appears.

2. Select the check box for the appropriate item in suspense.

To perform the same action on multiple items in suspense, select the appropriate check boxes.

3. In the **Select An Action** list, click **Disburse**.

4. Click **Submit**.

The Disburse Funds page appears, with the selected payee displayed.

5. (Optional) To select a different payee than the one displayed, click **Select Another Payee**.

The party data system search appears.

After selecting a different payee, you are returned to the Disburse Funds page.

The disbursement amount defaults to the full amount of the item in suspense.

6. (Optional) In the **Disbursement Amount** text box, enter an amount other than the default.

The amount entered cannot exceed the Available Amount.

7. Click **Disburse**.
The Items In Suspense page appears, with the **Items Pending Disbursement** list displayed.
8. Click the **View Details** hyperlink to see the details of the item pending disbursement.

Viewing Disbursement Details

A user can perform a manual inquiry regarding disbursements for a selected account.

To view the disbursement details for an account:

1. From the Account Home page, click **Items in Suspense** in the left navigation panel.
The Items in Suspense page appears.
2. In the **Items Pending Disbursement** list, click the **View Details** hyperlink for the appropriate disbursement.
The Disbursement Details page appears.

Re-suspending a Pending Disbursement

To re-suspend a pending disbursement:

1. From the Account Home page, click **Items in Suspense** in the left navigation panel.
The Items in Suspense page appears.
2. Click the **View Details** hyperlink for the appropriate item in the **Items Pending Disbursement** list.
The Disbursement Details page appears.
3. In the **Re-suspend Reason** list, click one of the following options:
 - Awaiting Policy Premium
 - Disbursed In Error
 - Transferring Payment
4. In the **Hold Options** list, click one of the following options:
 - Hold For Premium
 - Manual Hold
 - No Hold
5. Click **Re-suspend**.
The Items in Suspense page appears, with a confirmation message detailing the disbursement.

The total amount being re-suspended is added to the In Suspense Amount on the account. The item remains in suspense until further direction is given, manually or automatically.

6. (Optional) Click the **Disbursement Amount** hyperlink in the message to view the Disbursement Details.

The Disbursement Details page appears.

Re-suspending a Processed Disbursement

A disbursement can be re-suspended after it is processed.

To re-suspend a processed disbursement:

1. From the Account Home page, in the **Recent Account Activity** list, click the **Amount** hyperlink for the appropriate processed disbursement.
The Disbursement Details page appears.
2. In the **Re-suspend Reason** list, click one of the following reasons:
 - Disbursed In Error
 - Transferring Payment
 - Void Check
3. In the **Hold Options** list, click one of the following options:
 - Hold For Premium
 - Manual Hold
 - No Hold
4. Click **Re-suspend**.
The Account Home page appears, with disbursement details in the confirmation message.
5. (Optional) To view the re-suspended disbursement, from the Account Home page in the left navigation panel, click **Items in Suspense**.
The Items in Suspense page appears.

Re-billing a Disbursement

If a refund is sent to a payee in error, an invoice can be generated to request repayment of the refund. This is not part of the normal scheduling and invoicing process, and is initiated by a manual request.

The status of the disbursement must be "disbursed" to be eligible for re-bill.

To re-bill a disbursement:

1. From the Account Home page, in the **Recent Account Activity** list, click the **Disbursement Amount** hyperlink for the appropriate disbursement.
The Disbursement Details page appears.
2. In the **Select reason for re-bill** list, click one of the following options:
 - Payment Entry Mistake
 - Payment Reversal
 - Payment Transfer

The total amount being re-suspended is added to the In Suspense Amount on the account. The item remains in suspense until further direction is given, manually or automatically.

3. Click **Re-bill**.

The Account Home page appears, with a confirmation message regarding the re-billed amount. The outstanding balance on the account is decreased by the amount of the re-bill. A non-scheduled invoice is automatically sent to the payor.

Holding For Premium

When the status of an item in suspense is set to Hold for premium, it is unavailable for automatic activity, including disbursement, write off, allocation or transfer. The suspended item remains on hold until the premium is processed on the account. Once the premium is processed, the suspended item automatically allocates to the policy when the premium is posted to Duck Creek Billing™. An overpayment can be placed in suspense and applied to the next policy premium.

To hold an item in suspense for premium:

1. From the Account Home page, click **Items in Suspense** in the left navigation panel.
The Items in Suspense page appears.
2. Select the check box for the appropriate payment in the available list.

To select multiple items to Hold For Premium, select the appropriate check boxes.

3. In the **Select An Action** list, click **Hold for Premium**.
4. Click **Submit**.
The status of the item appears as Hold for Premium in the **Items In Suspense** list.

Hold for Premium affects only automatic processes. Manual disbursements, write-offs, allocations, and transfers can still be processed.

Manually Allocating a Payment from Suspense

A payment or portion of a payment in suspense can be manually allocated from suspense.

To manually allocate a payment from suspense:

1. From the Account Home page, in the left navigation panel click **Items In Suspense**.
The Items In Suspense page appears.
2. Select the appropriate check box for the item to allocate.
3. In the **Select An Action** list, click **Manually Allocate**.
4. Click **Submit**.
The Allocate A Payment From Suspense page appears.
5. In the **Amount** text box, enter the allocation amount for the list of available items.

6. In the **Suspense State** list, click the appropriate option.
7. Perform one of the following actions:
 - If there's an outstanding balance on the policy term you've selected, the available options are:
 - **Manual Hold** — Places the amount in suspense until it is manually removed. No automatic processing occurs.
 - **No Hold** — Immediately allocates the payment to the policy term.
 - If there's no outstanding balance on the policy term you've selected, the available options are:
 - **Hold for Premium** — Holds the amount in suspense until a policy premium is processed. The suspended item is automatically allocated to the policy when the premium is processed and posted to the billing system.
 - **Manual Hold** — Places the item in suspense until it is manually removed. No automatic processing occurs.
8. Click **Allocate**.
The Items in Suspense page appears with a confirmation of the manual allocation.

Placing a Hold On an Item in Suspense

To place an item in suspense on hold:

1. From the Account Home page in the left navigation panel, click **Items in Suspense**.
The Items in Suspense page appears.
2. Select the check box for the appropriate payment in the available list.

To place multiple items on hold, select all the appropriate check boxes.

3. In the **Select An Action** list, click **Place Hold**.
4. Click **Submit**.
The status of the item appears as Manual Hold in the **Items In Suspense** list.

No automatic processing will occur, and the item will remain in suspense until the hold is manually removed.

Releasing a Hold On an Item in Suspense

To release a hold on an item in suspense:

1. From the Account Home page in the left navigation panel, click **Items in Suspense**.
The Items in Suspense page appears.
2. Select the check box for the appropriate item in the available list.

To release multiple holds, select all the appropriate check boxes.

3. In the **Select An Action** list, click **Release Hold**.

4. Click **Submit**.
The selected item is now available for automatic suspense processing.

Transferring a Payment in Suspense

When an entire or partial payment is placed in suspense, it can be transferred to a specific policy or account.

Payments must be placed in suspense before transferring.

To transfer a payment in suspense:

1. From the Account Home page in the left navigation panel, click **Items In Suspense**.
The Items In Suspense page appears.
2. Select the check box for the appropriate item to transfer in the available list.
3. In the **Select An Action** list, click **Transfer**.
4. Click **Submit**.
The Transfer Payments page appears.
5. In the **Search for Account by** list, click the appropriate search method.
6. (Optional) Enter the account or policy number in the **Enter Number** text box.
7. (Optional) If you select **Party Information**, the party system search screen appears.
8. Click **Search**.
The Transfer Payments page appears, displaying the **Transfer From** (account where transfer originates) and the **Transfer To** (account where payment will be allocated) boxes.

The **Transfer To** account must exist in the Duck Creek Billing™ system.

9. (Optional) If the account information returned by the search is not the account you are searching for, click **Select Another Account** and repeat Steps 5 through 8.
10. In the **Reason For Transfer** list, click one of the following reasons:
 - Transferred Due To Overpayment
 - Transferred Due to Premium Transfer
11. In the **Allocate Payment to** list, click the appropriate option.

If any policies are associated with the account, you can transfer the payment in suspense to the account, or to a specific policy.

12. Select the **Place in "Hold" suspense state** check box to place the transferred payment on hold.
If this check box is selected, the item remains in suspense, and no automatic processing will occur until the hold is manually removed.

The Hold status must be removed from within the **Transferred To** account.

13. In the **Transfer Amount** text box, enter the amount of payment to transfer to each available account.

The Amount Remaining for transfer dynamically updates depending on the amount entered in the **Transfer Amount** text box.

14. Click **Transfer**.
The Items In Suspense page appears, with a confirmation message regarding the payment transfer.

Any remaining payment amount is re-suspended. The total amount of the transferred payment is added to the Outstanding Balance of the Transfer From account. The total amount of the transferred payment is subtracted from the Outstanding Balance of the Transfer To account.

A link appears on the **Recent Account Activity** list for both accounts.

- Click the **transferred amount** link to view the Payment Detail page.
- To suspend a transferred payment, repeat Steps 1-14.

Writing Off Amounts in Suspense

You can manually write-off a payment on an account, or specify a portion of the payment to be written off.

To manually write-off an amount in suspense:

1. From the Account Home page in the left navigation panel, click **Items In Suspense**.
The Items In Suspense page appears.
2. Select the check box for the appropriate item to write off.

To write-off multiple items, select all the appropriate check boxes.

3. In the **Select An Action** list, click **Write Off**.
4. Click **Submit**.
The Write Off Payment page appears, with the full amount available for write-off.
5. (Optional) Enter a different amount in the **Write-Off Amount** text box.

The amount entered cannot exceed the **Available Amount**. Any amount not written off remains in suspense.

6. In the **Select Reason for Write-Off** list, click one of the following reasons:
 - Account Correction
 - Automatic From Suspense
 - Zero Balance
7. Click **Submit**.

The Items In Suspense page appears, with a confirmation message detailing the written off amount. The total amount of the write-off is subtracted from the In Suspense Amount on the billing account. To re-suspend a written off amount, see *Re-suspending a Payment Write-off*.

Writing Off and Waiving Charges

Account charges or premiums can be written off or waived. A premium or charge is written off when the receivable can't be collected. A premium or charge can be waived when, for whatever reason, the decision is made not to attempt to collect the receivable.

To manually write off or waive a premium or account level charge:

1. From the Account Home page, click **Installment Schedule**.
The Installment Schedule page appears.
2. Click the **Expand/Collapse**  button to expand the display.
3. In the **Item Amount** column, click the **Write Off/Waive**  button for the appropriate item.
The Write Off Or Waive An Installment page appears, with the full amount available for write off or waive.

Only scheduled items that are still due are eligible to be written off or waived. The **Write off/Waive** button is disabled if the installment balance is zero (0).

4. (Optional) Enter an amount other than the default in the **Write Off/Waive** text box.

Any amount not written off or waived remains open, and is returned to the installment schedule as an amount due. If multiple transaction types exist for an installment row, the corresponding amounts are eligible for write-off or waive.

5. In the **I Want To** list, click one of the following options:
 - Write Off
 - Waive
6. In the **Reason** list, click one of the following reasons:
 - Account Correction
 - Due To Cancellation
 - Unable To Collect
 - Under Invoice Tolerance
 - Under Payment Within Tolerance

The button at the bottom of the page dynamically updates depending on the action selected.

7. Click **Write Off** or **Waive**.
The Installment Schedule page appears, with a confirmation message regarding the written off/waived amount. The total amount of the write-off/waive is subtracted from the installment row and the Outstanding Balance.

Viewing Write-Off and Waive Detail

The details of write offs or waivers that have not been reversed can be viewed. If a write off or waive is reversed, the details are no longer available for viewing.

To view a write-off or waive detail:

1. From the Account Home page in the left navigation panel, click **Installment Schedule**.

You can also:

From the Account Home page, click the **Write off** or **Waive amount** hyperlink in the **Recent Account Activity** list.

The Installment Schedule appears.

2. Click the **Expand/Collapse** button .
3. Click the appropriate **Write Off** or **Waive amount** hyperlink in the WriteOff column.
The Installment Write-Off/Waive Details page appears.

Write offs or waivers can be reversed from this page.

For more information, see *Reversing Write-offs and Waives*.

Reversing Write-offs and Waivers

A written-off or waived amount can be manually reversed at both the policy and account level.

To manually reverse write offs and waivers:

1. From the Account Home page in the left navigation panel, click **Installment Schedule**.

You can also:

From the Account Home page, click the **Write-off** or **Waive** hyperlink in the **Recent Account Activity** list.

The Installment Schedule page appears.

2. Click the **Expand/Collapse** button .
3. Click the appropriate **Written off/Waived Amount** hyperlink in the WriteOff column.
The Installment Write-Off/Waive Details page appears.
4. Select the check box for the appropriate item to reverse.
5. In the **Reverse this Write-off/Waive** list, click one of the following options:
 - Correction
 - Credit Allocation
 - Policy Transfer

- Reschedule
 - Written off/Waived in error
6. Click **Reverse**.
The Installment Schedule page appears, and the reversed amount is added to the Balance column.

Working with Disbursement Authorization

Configuration is required to utilize this feature. For more information, see *Working with Disbursement Authorization* in the *Duck Creek Billing™ Reference Guide*.

The Disbursement Authorization feature requires authorization for the approval of pending disbursements and processing the authorized disbursements utilizing the Disbursement Request service.

A disbursement cannot be requested and authorized by the same user.

Submitting a Disbursement for Authorization

To submit a disbursement for authorization:

1. From the left navigation panel for the appropriate account, click **Items In Suspense**.
2. From the Items In Suspense page, select the appropriate item.
3. In the **Select An Action** list, click **Disburse**.
4. Click **Submit**.
5. Do one of the following:
 - On the Refund To Source page, in the **Disbursement Type** list, click **Regular**, and then click **Refund**.
 - On the Disburse Funds page, click **Disburse**.

The page that is displayed will depend upon system configuration.

The disbursement amount now appears on the **Recent Account Activity** list as a Disbursement Pending Authorization.

Authorizing a Disbursement

To authorize a disbursement:

1. From the Billing Dashboard, click the **Pending Authorization Disbursement Report**.
This report identifies all accounts with disbursements in a Pending Authorization status.
2. Enter the appropriate account number and navigate to the **Recent Account Activity** list.
3. Click the **Disbursement Pending Authorization** amount link.
The Disbursement Details page appears.
4. Click **Authorize** to approve the pending disbursement.

5. (Optional) In the **Recent Account Activity** list, click the **Disbursement Authorized** amount link to open the Disbursement Details page.

Re-suspending an Authorized Disbursement

To re-suspend an authorized disbursement:

1. From the **Recent Account Activity** list on the Account Home page for the appropriate account, click the **Disbursement Pending Authorization** amount link.

The Disbursement Details page appears.

2. In the **Re-suspend Reason** list, click one of the following options:
 - Awaiting policy premium
 - Disbursed in error
 - Transferring payment
3. In the **Hold Options** list, click one of the following options:
 - Hold For Premium
 - Manual Hold
 - No Hold
4. Click **Re-suspend**.

The Account Home page appears with a confirmation message regarding the re-suspended disbursement.

Processing an Authorized Disbursement

To process an authorized disbursement:

1. On the **Billing Administration** tab, click **Disbursement Request**.
2. Click **Start Service**.

The processed disbursement is added to the **Recent Account Activity** list for the account.

Working with Hold Billing Events

Billing events and follow-up activities for accounts can be temporarily suspended for individual accounts, or groups of accounts. An individual hold can be used when a policy holder incurs an individual loss that requires company research. A hold event can be used following a natural disaster when multiple accounts need to be placed on hold for the same reason.

An entire bill account or an individual policy may be placed on hold. For more information on policy level holds, see *Holding Billing for Policy Terms*.

Creating a Hold Event

A Hold Billing Event can be used to place a hold on multiple accounts linked by a common event, such as a natural disaster.

To create a hold billing event:

1. Click the **Billing Administration** tab.
2. In the left navigation panel, click **Manage Hold Events**.
3. Click **Create Hold Event**.

4. Enter the name of the hold event in the **Event Name** text box.
5. Enter the description of the hold event in the **Description** text box.
6. Click one of the available options:
 - Click **Hold billing** to stop future invoices for the selected item.
 - Click **Hold follow-up** to stop all currently scheduled and future follow-up activities.
7. Click an option for **Do you want to hold any follow-up activity that may occur due to past billing activities?**
8. In the **Reason for hold event** list, click one of the following options:
 - Company Request
 - Natural Disaster
9. Enter a date in the **Start hold event on** text box.
10. Click **Save**.

Placing an Individual Account on Hold

An individual hold may be placed on an account instead of attaching the account to an area hold event.

To place an individual hold on an account:

1. From the Billing Dashboard, click the appropriate account.

You can also:
Search for the account. For more information, see *Searching for a Billing Account*.

The Account Home page appears.

2. In the left navigation panel, click **Hold Billing Activities**.
The Hold Billing For Account page appears.
3. Click **This is an individual account hold**.
4. In the **Hold Type** list, click one of the following options:
 - Hold Bill
 - Hold Follow Up
 - No Hold

If you click **Hold Bill**, you have the option to hold any follow-up activity that occurs due to past billing activities.

5. (Optional) Click **Yes** or **No** to hold follow-up activity.
6. In the **Hold Reason** list, click one of the following options:
 - Company Request
 - Company Research
 - Dispute
 - Hold Event

The Start hold on date automatically defaults to the system date.

The **Hold Indefinitely** check box is selected by default.

7. To specify an end date, clear the selected check box, and enter a date in the **End hold on** text box.

You can also:

Click the **Calendar** button  to select a date.

8. (Optional) If you select a **Hold end on** date, the **Resume Options** appear.

When a **Hold end on** date is specified, the hold is automatically released when the date is reached.

9. (Optional) Click one of the following **Resume Options**:
 - **Adjust due dates** — Due dates for missed installments are adjusted.
 - **Do not adjust due dates** — Due dates for missed installments are not adjusted.
10. Click **Place Hold**.

The Account Home page appears, with a confirmation message that a **Hold Bill** has been set at the Account level.

Editing or Releasing an Individual Account Hold

You can edit an individual account hold in Duck Creek Billing™ while it is still in effect. You can also release an individual hold before the date specified for the hold to automatically end, or end an indefinite hold.

To edit an individual account hold:

1. Click the **Update** link in the hold message on the Account Home page.

The hold message is displayed on the Account Home page as long as the hold is in effect on the account.

The Edit Hold Billing For Account page appears.

2. Make the desired edits.
3. Click **Save**.

The account hold is updated, and remains in effect.

To end an individual account hold:

1. Click the **Update** link in the hold confirmation message on the Account Home page.

The Edit Hold Billing For Account page appears.
2. Do one of the following:
 - Clear the selected **Hold Indefinitely** check box.
 - In the **End hold on** text box, enter the date to end the hold.

You can also:

Click the **Calendar** button  to select a date.

3. Click one of the following **Resume Options**:
 - Adjust due dates
 - Do not adjust due dates
4. Click **Resume** to end the account hold.
The account hold is released, and billing resumes on the account, based on the selected options.

Adding an Account to a Hold Event

An account can be attached to an existing hold event, instead of being placed on hold as an individual account. This may be useful when multiple accounts are affected by a natural disaster such as a flood or tornado.

To add an account to an area hold event:

1. From the Billing Dashboard, click the appropriate account.

You can also:

Search for the account. For more information, see *Searching for a Billing Account*.

The Account Home page appears.

2. In the left navigation panel, click **Hold Billing Activities**.
The Hold Billing for Account page appears.
3. Click **This hold is part of an area hold event**.
4. In the **Hold Events** list, click the appropriate hold event.
5. Click **Place Hold**.
The Account Home page appears, with a confirmation message regarding the hold bill activity for the account.

Reviewing Hold Events

To review a hold event:

1. Click the **Billing Administration** tab.
The Billing Administration screen appears.
2. In the left navigation panel, click **Manage Hold Events**.
The Manage Hold Events page appears.
3. Click the **Review** link for the appropriate hold event in the **Current Hold Events** list.
A confirmation message appears, with the details of the hold event.

Ending Hold Events

To end a hold event:

1. Click the **Billing Administration** tab.
The Billing Administration screen appears.
2. In the left navigation panel, click **Manage Hold Events**.
The Manage Hold Events page appears.
3. Click the **End** link to end the hold event.
A confirmation message appears, with the details of the ended hold event.
Invoice generation activity resumes after a hold is released.

Ending an account level hold does not end a policy term hold.

Working with Late Charges and Past Due Accounts

You can specify when an account is past due, and if late charges should be assessed by determining specific billing account option values.

To determine when the account is past due:

1. From the Account Home page in the left navigation panel, click **Account Settings**.
The Selecting Billing Account Options page appears.
2. In the **Late Charge Action** list, click **Charge**.
3. In the **Late Charge Amount** field, enter the appropriate late charge.

Late charges appear on the next scheduled invoice, and are not included in the current amount due.

4. In the **Late Charge Days** text box, enter the number of days after the due date that the account is past due.
5. In the **Late Charge Threshold** text box, enter the minimum amount of the invoice that must remain unpaid for late charges to be assessed.
Late charges appear in the **Recent Account Activity** list, and on the **Installment Schedule** for the appropriate account.

When an account is past due, a **Pending Cancellation** is initiated in Duck Creek Billing™. For details, see *Working With Policy Terms*. For more information on late charge options, see "Follow Up" settings in *Selecting Billing Account Options*.

Working with Reminder Notices

You can specify when a reminder notice should be generated for a late payment.

To generate a reminder notice:

1. From the Account Home page in the left navigation panel, click **Account Settings**.
The Selecting Billing Account Options page appears.
2. In the **Reminder Notice Action** list, click **Reminder**.

3. In the **Reminder Notice Days** text box, specify how many days after the due date the reminder notice should be generated.
4. In the **Reminder Notice Threshold Amount**, specify the minimum amount of the invoice that must remain unpaid for a reminder notice to be generated.

Any unpaid amount less than the threshold amount is written off, or billed with the next scheduled invoice.

Reminder notices are placed in the C:\Program Files\Duck Creek Technologies\Forms folder, which is created during the Duck Creek Billing™ installation.

5. (Optional) Click the **Download attachment** button  in the **Recent Account Activity** list to view a reminder notice.

Working with Collections

Duck Creek Billing™ supports internal collection activities and provides policy-level-based collections support. After a collection account is created, policy terms can be transferred to the account for processing by the carrier. A policy term can also be transferred from the collection account back to the appropriate account.

Once a policy term is transferred to a collections account, policy term settings cannot be changed. Changes to the policy term can only be made in the original account.

Duck Creek Billing™ supports two scenarios for carrier collections.

- Outstanding receivables are sold to a collection agency
- A collection agency is paid by the carrier to collect the outstanding receivable

If the carrier sells the debt to a collection agency, the carrier applies the collection agency payment to the outstanding receivable and writes off the difference between the amount paid for the debt and the amount owed.

If the carrier pays the collection agency to collect the debt, the outstanding receivable is sent to the collection agency. The agency collects as much as possible, then passes the money to the carrier, minus the collection fee. In this scenario, the creation of a collection account would be only for the application of the payment, less the fee submitted by the collection agency. When the carrier is notified that all collections minus fees have been completed, the remaining balances are written off, or written off per payment received.

A daily report can be generated to show cancelled and expired policies. See *Working with Reports*.

Creating a Collections Account

You can create a collections account to manage policies for referral to collections.

To create a collection account:

1. From the Billing Dashboard, click **Create A New Account**.
The Create New Account page appears.
2. Click **Create A New Party**.

The user's party data system opens, and allows for the creation of a new party.

To make it easy to identify a collection account, it's recommended the account name include "coll", "collect", or another identifier relevant to the collection process.

After the new party is created, the Create New Account page appears with the name of the new account as the Account Payor.

3. In the **Bill Account Class** list, click **Collection**.

The **Payee and Payor are the same party** check box is selected by default.

4. Do not clear the selected **Payee and Payor are the same party** check box.
5. Accept the default settings for **Invoice Method** and **Target Due Days**.
6. Click **Create New Account**.
The Select Billing Account Options page appears.
7. Select the desired **Billing Account Options**.
For more information about these options, see *Selecting Billing Account Options*.
8. Click **Complete**.
The Account Home page appears.

Transferring a Policy to Collections

To transfer a policy to a collections account:

1. From the policy management system, navigate to the policy administration section for the appropriate policy to transfer to the Collections Account.
2. Cancel the policy.
3. Click the **Billing** tab to return to Duck Creek Billing™.
4. From the Billing Dashboard, click the account associated with the canceled policy.

You can also:
Search for the account. For details, see *Searching for a Billing Account*.

5. From the Account Home page for the selected account, click the appropriate **Policy Term** link in the **Policies Associated With This Account** list.
The Policy Term Summary page appears.
6. In the left navigation panel, click **Transfer Policy Term**.
The Transfer Policy From Account page appears.
7. In the **Enter Number** text box, enter the account number of the appropriate collections account.
The Transfer Policy From Account page appears, with the transfer from account and the transfer to accounts displayed.

8. In the **Reason For Transfer** list, click **Collections**.
9. Click **Transfer**.
The Policy Term Summary page appears, with a confirmation message regarding the transfer to the collections account.

After a policy term is transferred to a collections account, any changes to party information can only be made in the original account.

Transferring a Policy Term from Collections

After collection activity is finished for an account, it can be transferred out of a collections account.

To transfer a policy term from collections:

1. From the Billing Dashboard, click the appropriate account.

You can also:
Search for the account. For details, see *Searching for a Billing Account*.

2. From the Account Home page, in the **Policies Associated With This Account** list, click the **Policy Term Date** link for the appropriate policy.
The Policy Term Summary page appears.
3. In the left navigation panel, click the **Transfer Policy Term** link.
The Transfer Policy page appears.
4. In the **Search for Account by** list, click the appropriate search method.
5. Perform one of the following actions:
 - In the **Enter Number** text box, enter the account or policy number.
 - If you click **Party Information**, the party system search screen appears.
6. Click **Search**.

If the search does not return the account you are searching for, click **Search Another Account** to repeat the search process.

The Transfer Policy From Account page appears, displaying the **Transfer From** box (account where transfer originates) and the **Transfer To** box (account where the policy will be transferred).

The **Transfer To** account must exist in the Duck Creek Billing™ system.

7. In the **Reason For Transfer** list, click **Remove Policy Term From Collections**.
8. Click **Transfer**.
A confirmation message appears on the Policy Term Summary page, with details of the transfer.

9. (Optional) Click the **Account Number** link in the message to display the Account Home page for the account the policy term was transferred to.

Working with Commissions

Customization is required to use the commissions feature in Duck Creek Billing™. For more information, see *Configuring Commission Options* in the Duck Creek Billing™ Reference Guide.

Save

The following table lists the out-of-the-box commission payment strategies available in Duck Creek Billing™.

Table Name	Definition	Setting
Paid on Written	Payment is not required before commission is released. The entire commission amount is authorized when the receivable is posted. The commission authorization date is the activity date of the policy transaction. Debit receivables create an authorization record. Credit receivables generate a de-authorization record.	POW1
Paid on Effective	The commission is authorized for each policy transaction at issuance. Payment is not required before the commission is released. The commission authorization date is the latter of the effective date or the activity date of the policy transaction.	POE1
Paid on Paid Pro Rata	Payment is required before commission is released. The amount of commission that has been paid to date for a given receivable is evaluated. Next, based on the payment activity, the amount of commission that should have been paid is evaluated. The difference is the commission amount that is authorized. The activity date of the payment is used as the commission authorization date for all debit policy transactions. All other policy transactions use the activity date of the policy transaction as the commission authorization date. When premiums are written off, the corresponding commission amount is still authorized.	POP1
Paid on Paid First Payment	The entire commission amount is paid when the first payment is applied to the receivable. Receiving one valid payment on the policy term releases the commission for that policy term. The activity date of the payment is used as the commission authorization date for a new business or a renewal policy transaction. All other policy transactions use the activity date of the policy transaction as the commission authorization date.	POP2
Paid on First Paid	The commission is released following the receipt of one valid payment on the policy term. The latter of the policy transaction effective date or the activity date of the payment is used as the commission authorization date for a new business or renewal policy. All other policy transactions use the latter of the policy transaction effective date or the activity date of the policy transaction as the commission authorization date.	POP4

To select a commission payment option:

1. Select the appropriate account from the **Billing Dashboard**.

You can also:

Search for the account. For more information, see *Searching for a Billing Account*.

The Account Home page appears.

2. From the **Account Home** page, click the appropriate **policy term** link in the **Policies Associated With This Account** list.
The Policy Term Summary page appears.
3. Click **View/Edit Policy Term Settings** in the left navigation panel.
4. In the **Commission Scheme** list, click the appropriate option.
5. Click **Save**.

Creating Commission Plans for Agents

The commissions features in Duck Creek Billing™ can be customized through ManuScript configuration to accommodate a variety of commission plans and payment schemes.

Commission features include:

- Creating a commission account for an agent
- Creating multi-level commission plans
- Generating multi-format commission statements
- Managing commission plans with the Commission Statement Maintenance page

For more information on the available commission features, see *Working with Agent Commission*.

Working with Reports

Customization, including specific user privileges, is required to utilize the reporting feature in Duck Creek Billing™. See *Working with Reports* in the *Duck Creek Billing™ Reference Guide*.

The Duck Creek Billing™ reporting system is based on Microsoft SQL Server Reporting Services (SSRS). Users can schedule reports to run at a specified time, generate reports on demand, email reports, and copy reports to a network drive for shared access.

Reports can be scheduled daily, weekly, monthly or annually. All available reports are accessible from the Duck Creek Billing™ Dashboard. Custom reports can be created using Microsoft SQL Server Business Intelligence Development Studio.

Out of the box, Duck Creek Billing™ includes the following reports:

- Aged Receivables
- Cash in Suspense
- Commission Activity
- Daily Cash Journal
- Disbursement Activity

- Disbursements Pending Authorization
- General Ledger
- Payment Batch
- Transaction Balancing
- Unidentified Cash

The following table lists the names and descriptions of the available out-of-the-box reports for Duck Creek Billing™.

Report Name	Contents
Aged Receivables	Lists all aged receivables.
Cash in Suspense	Lists all cash in suspense.
Commission Activity	Lists all authorized commissions that occur on a particular day. This report may be used to interface with a customer's check-writing system that actually pays commissions to agents. The system extracts information from the Bill Item and Commission Authorization tables during the daily batch process, and then produces a daily report of all commissions that have been authorized that day.
Daily Cash Journal	Lists all transactions in the daily cash journal.
Disbursement Activity	Lists all disbursement activity for Duck Creek Billing™ accounts.
Disbursements Pending Authorization	Lists all pending disbursements awaiting disbursement authorization.
General Ledger	Lists the amounts on the general ledger to date.
Payment Batch Activity	Lists the detailed account of payment batch activity.
Transaction Balancing	Lists the results of the queries of all the database tables to ensure everything is in balance.
Unidentified Cash	Lists unidentified cash entered into the system.

To open a report:

The Reporting Home page appears and the selected report is displayed.

The interface to the report history is configured in SSRS. When a snapshot image is created, it is available in the Report History list.

1. From the **Billing Dashboard**, click the appropriate **report name** link.
2. In the **Report History** list, select a snapshot image of the appropriate report history.
3. (Optional) Click a **Report Name** in the **Reports** list to display a different report.
4. (Optional) From the **Export** list, click one of the following available file formats for exporting the report:
 - XML file with report data
 - CSV (comma delimited)
 - TIFF file
 - Acrobat (PDF) file
 - Web archive
 - Excel

Working With Policy Terms

The Policy Term Summary page provides an overview of the activity associated with a specific policy term. Tasks may be launched from the Policy Term Actions section in the left navigation panel of the Policy Term Summary page.

2/16/2011 - 2/16/2012	Active	\$0.00	\$1,205.00

The current system date is February 16, 2011

Available tasks accessible from the Policy Term Summary page include:

- *Transferring a Policy Term*
- *Viewing and Updating Policy Term Settings*
- *Updating Renewal Information*
- *Holding Billing for Policy Terms*
- *Working with Pending Cancellations*
- *Rescinding Pending Policy Cancellations*
- *Working with Policy Transactions*
- *Working with MPR Policy Terms*

Transferring a Policy Term to Another Account

A policy term can be transferred from one account to another. This may be necessary if a policy has been applied to the wrong account, or if the payor responsibility on the policy term changes.

To transfer a policy term to another account:

1. From the Account Home page, in the **Policies Associated With This Account** list, click the **Policy Term Date** link for the appropriate policy.

The Policy Term Summary page appears.

2. In the left navigation panel, click **Transfer Policy Term**.
The Transfer Policy page appears.
3. In the **Search for Account by** list, click the appropriate search method.
4. Perform one of the following actions:
 - In the **Enter Number** text box, enter the account or policy number.
 - If you click **Party Information**, the party system search screen appears.
5. Click **Search**.

If the search does not return the account you are searching for, click **Search Another Account** to repeat the search process.

The Transfer Policy From Account page appears, displaying the **Transfer From** box (account where transfer originates) and the **Transfer To** box (account where the policy will be transferred).

The **Transfer To** account must exist in the Duck Creek Billing™ system.

6. In the **Reason For Transfer** list, click one of the following options:
 - Change of Payor Responsibility
 - Re-assignment Of Policy Term Due To Error
7. Click **Transfer**.
The Policy Term Summary page appears. A confirmation message includes the details of the transfer.
8. (Optional) Click the **Account Number** link in the message to display the Account Home page for the account the policy term was transferred to.

Viewing and Updating Policy Term Settings

The settings for policy plan options can be viewed and changed as needed.

If you change a policy term setting, it will not take effect until after the next scheduled invoice is processed.

To update policy term settings:

1. From the Account Home page, in the **Policies Associated With This Account** list, click the **Policy Term Date** link for the appropriate policy.
The Policy Term Summary page appears.
2. In the left navigation panel, click **View/Edit Policy Term Settings**.
The Policy Plan Setup page appears.
3. Make the desired changes.
4. Click **Save Changes**.
The Policy Term Summary page appears.

After changes are made to a policy term setting, the **Schedule History** appears in the left navigation panel. Click the **Policy Term** link in the **Schedule History** section to view the appropriate installment schedule history.

Updating Renewal Information

To update renewal information:

1. From the Account Home page, in the **Policies Associated With This Account** list, click the **Policy Term Date** link for the appropriate policy.
The Policy Term Summary page appears.
2. In the left navigation panel, click **Update Renewal Information**.

Holding Billing for Policy Terms

An individual policy term or entire account can be placed on hold. If an account is placed on hold, all policies associated with the account are on hold, according to the criteria specified in the hold. For more information, see *Working with Hold Billing Events*.

If an account and a policy term associated with the account are placed on hold, releasing the account hold will not end the policy term hold. The policy term hold must be released.

To hold billing for a selected policy term:

1. From the Account Home page, in the **Policies Associated With This Account** list, click the **Policy Term Date** link for the appropriate policy.
The Policy Term Summary page appears.
2. In the Policy Term Actions section in the left navigation panel, click **Hold Billing for Policy Term**.
The Hold Billing For Policy Term page appears.
3. Perform one of the following actions:
 - In the **Hold Type** list, click **Hold Bill**.
 - Click **Yes** to hold any follow-up activity that may occur due to past billing activities.or
 - In the **Hold Type** list, click **Hold Follow Up**.
4. In the **Hold Reason** list, click one of the following options:
 - Audit
 - Company Request
 - Company Research
 - Dispute

The **Start hold on** date defaults to the system date.

5. (Optional) To enter a date, clear the selected check box and enter a date in the **End hold on** text box.

You can also:

Click the **Calendar** button  to select a date.

When a **Hold end on** date is specified, the hold is automatically released when the date is reached.

The **Hold Indefinitely** check box is selected by default.

6. (Optional) If you clear the **Hold Indefinitely** check box, the Resume Options appear.
7. (Optional) Click the appropriate **Resume Option**.
Options are:
 - **Adjust due dates** — Due dates for missed installments are adjusted.
 - **Do not adjust due dates** — Due dates for missed installments are not adjusted.
8. Click **Place Hold**.
The hold is added to the **Recent Account Activity** list with **Set Hold** as the Activity Type.

Editing Policy Terms on Hold

The end hold date for a policy term on hold can be edited, and the resume option can be changed.

To edit the end hold date:

1. From the Account Home page, click the appropriate **Policy Term** link in the **Policies Associated With This Account** list.
The Policy Term Summary page appears.
2. Click the **Update** link in the hold alert message.
The Edit Hold Billing For Policy Term page appears.
3. Perform one of the following actions:
 - Enter a different date in the **End hold on** text box.
 - Select the **Hold Indefinitely** check box.
4. Click **Save**.

To change resume options:

1. Click the alternate option.
2. Click **Save**.

Releasing a Policy Term Hold

A policy term hold is automatically released on the end hold date specified for the hold. A policy term hold can also be released manually.

To manually release a policy term hold:

1. From the Account Home page, click the appropriate **Policy Term** link in the **Policies Associated with This Account** list.
The Policy Term Summary page appears, with an alert message confirming the hold.
2. Click the **Update** link.
The Edit Hold Billing For Policy Term page appears.
3. Enter the appropriate date in the **End hold on** text box.

You can also:

Click the **Calendar** button  to select a date.

4. Click **Resume**.
A confirmation message appears, with details of the released hold.

Invoice generation activity resumes when the hold is released. Ending an account level hold does not end a policy term hold.

Working with Pending Cancellations

When payment for an invoice is not received by the due date, a pending cancellation (PCN) automatically occurs on the policy term if the *PCN Allow* parameter is selected in the Policy Term Option settings. The date the pending cancellation is triggered is determined by the *PCN Trig Days* parameter in Policy Option settings.

The PCN is automatically rescinded when a payment is made in the required amount. When a receivable type is specified as equity-bearing, that receivable is included in the calculation of the payment amount required to rescind the PCN activity on the policy term.

The amount of payment required to rescind a policy term in PCN status is included in the Pending Cancellation activity on **Recent Account Activity** list.

Equity-bearing receivables are automatically paid first when payment is applied to an account. For more information see *Working with Equity Bearing Receivables*.

Rescinding Pending Policy Cancellations

When an invoice is past due, a PCN is automatically initiated in Duck Creek Billing™. The policy status is updated to Pending Cancel in the policy administration system.

If it is discovered that the PCN is the result of an error, it can be manually rescinded. When a PCN is rescinded, open balances can be redistributed to future installments. If payment is made prior to the cancellation date, the cancellation is automatically rescinded.

This option is available only if the policy term status is Pending Cancellation (PCN).

To manually rescind a PCN:

1. From the Account Home page, in the **Policies Associated With This Account** list, click the **Policy Term Date** link for the appropriate policy.
The Policy Term Summary page appears.
2. In the **Policy Term Actions** section in the left navigation panel, click **Rescind this Policy Term**.
3. In the left navigation panel, click **Account Home**.
The Account Home page appears.

The change in status appears in the **Recent Account Activity** list as Rescind PCN (Manual). A message is sent to the policy administration system indicating the cancel has been rescinded. The billing system redistributes all installment rows that should have been invoiced up to the time the rescind was processed.

The **Rescind Redistribution Strategy** policy option setting determines how to redistribute the amount due while the policy term was in PCN.

For more information, see *Working With Late Charges and Past Due Accounts*.

Payments made to rescind a PCN must be made at the policy level, and be allocated appropriately to automatically rescind the PCN.

Working with Policy Transactions

Policy transactions originate in the policy administration system, and the policy term status is automatically updated in Duck Creek Billing™. Policy transactions completed on a policy are identified by transaction type and are listed in the **Recent Account Activity** list.

Available transactions include:

- Cancel
- Reinstate
- Reissue
- Rewrite
- Final Audit
- Credit Endorsement

The following table lists the available transactions, and the transaction results in Duck Creek Billing™.

Transaction Name	Results
------------------	---------

Cancel	• Policies must be canceled manually in the policy administration system. Based on the billing and policy options selected, Duck Creek Billing™ recommends a cancellation date, but cancellation is not automatic. The recommended cancellation date appears in the Recent Account Activity list. • All of the credit associated with the cancelled policy is scheduled in full, and assigned to the next available account month closing date. • All of the credit associated with policy level fees, taxes, and surcharges is sent as separate credit receivable transactions. • All receivables associated with the canceled policy term are included in the next statement released to the agent.
Reinstate	• The unearned portion of the premium related to the reinstated policy term is sent to Duck Creek Billing™. • Policy term balances are adjusted by the amount of the reinstatement debit.
Reissue	• The policy term dates change, based on the date of the reissue. • The policy number does not change.
Rewrite	• A new policy number is assigned. • Both the new and previous policy numbers are included in the Recent Account Activity list.
Final Audit	• A policy must be pro rata cancelled before a final audit. • Policy Term Summary page shows Hold on account until the final audit is complete. • Outstanding items do not appear on the statement.
Credit Endorsement	• Any action in the policy administration system that results in a credit on the amount due on a policy results in a credit endorsement in Duck Creek Billing™. • The credit endorsement is equally allocated among the remaining installments for the policy term, beginning with the first installment after the credit endorsement.
Renewal	• The policy number is unchanged. • All renewal activity is added to the Recent Account Activity list and Installment Schedule.

Cancellations, audits, and reinstatements will process with a premium amount of 0. Other types of transactions will not be processed.

Working with MPR Policy Terms

When an MPR policy is in pending cancel status for non-reporting (PCNR) or non-payment (PCNP), if payment for the amount due is made prior to the cancellation date, the pending cancel is automatically rescinded. The payment amount required to rescind the pending cancel is included in the Recent Account Activity list for the account. A pending cancel can also be manually rescinded.

This option is available only if the MPR policy term status is pending cancel for non-reporting or non-payment.

To manually rescind a pending cancel:

1. From the Account Home page, in the **Policies Associated With This Account** heading, click the **Policy Term Date** link for the appropriate policy.
The Policy Term Summary page appears.
2. In the **Policy Term Actions** section in the left navigation panel, click **Rescind this Policy Term**.
3. In the left navigation panel, click **Account Home**.

Working with the Seamless Gateway Feature

The seamless gateway feature allows a user to switch back and forth between a Duck Creek Billing™ account and the policy administration system to view the policy or policies associated with that account. This feature eliminates the need for a user to enter policy numbers and manually search for the Duck Creek Billing™ account or the policy information. In addition to saving time, the seamless gateway feature reduces errors resulting from entering an incorrect number.

Save

To use the Seamless Gateway link in Duck Creek Billing™:

1. On the Account Home page, in the **Policies Associated with this Account** list, click the **View in Policy Administration System** button

You can also:

Click the **View in Policy Administration System** button in the **Policy Term** list on the Policy Term Summary page.

The Policy Details page for the selected policy appears.

2. Click one of the available links to navigate to additional policy administration pages.

To use the Seamless Gateway link in the policy administration system:

1. Open the appropriate policy.
2. In the **Policy Actions** list, click **View Policy Details**.
The TransAct page appears.
3. On the TransACT page, click the **View Policy** button .
The Account page appears.
4. In the left navigation panel, click **Billing Summary**.
The Billing Summary page appears.
5. Click the **Account Reference** link.

The Account Home page for the account associated with the selected policy appears.

Working in the Billing Administration Area

Click the **Billing Administration** tab to do the following:

- View and manage the error queue
- Create and manage hold events
- Set the system date
- Request a disbursement

Viewing the Error Queue

The Error Queue provides a complete list of all errors in the billing system. The error queue is not account-specific.

To view the error queue:

1. Click the **Billing Administration** tab.
2. In the left navigation panel, click **View Error Queue**.
The Error Queue page appears.
3. (Optional) Use the **Filter Error List** to display only errors occurring within a specific time frame, or errors of a specific type or status.
4. (Optional) Click **Refresh List** to apply any selected filters.
5. In the **Errors** list, select the appropriate check box.
6. Click **View Details**.
The Error Details window appears, with complete details of the error.
7. Click **Close** to close the Error Details window.

To close an open error:

- Select the error from the **Errors** list, and then click **Close Selected Items**.
The status of the item is Closed.
- For more information, see *Troubleshooting the MSMQ Billing Listener* service in the Duck Creek Billing™ Reference Guide.

Managing Hold Events

Billing events and follow-up activities for accounts can be temporarily suspended for individual accounts, or multiple accounts. An individual hold might be used when an individual loss is incurred. Multiple accounts can be attached to the same hold event following a natural disaster. Holds may also be placed on individual policies rather than an account. For more information on policy level holds, see *Holding Billing for Policy Terms*.

Creating a Hold Event

A Hold Billing Event can be used to place a hold on multiple accounts linked by a common event, such as a natural disaster.

To create a hold billing event:

1. Click the **Billing Administration** tab.
2. In the left navigation panel, click **Manage Hold Events**.
The Manage Hold Events page appears.
3. Click **Create Hold Event**.
The Create Hold Event page appears.
4. Enter the name of the hold event in the **Event Name** text box.
5. Enter the description of the hold event in the **Description** text box.
6. Click one of the two available **Hold Options**:
 - Click **Hold billing** to stop future invoices for the selected item.
 - Click **Hold follow-up** to stop all currently scheduled and future follow-up activities.

When **Hold follow-up** is selected, invoicing continues.

7. Click an option for **Do you want to hold any follow-up activity that may occur due to past billing activities?**
 - Click **Yes** to hold any follow-up activity that may occur due to past billing activities.
 - Click **No** not to hold any follow-up activity.
8. In the **Reason for hold event** list, click one of the following options:
Options are:
 - Company Request
 - Natural Disaster

The **Start hold event on** date defaults to the current system date.

9. (Optional) Enter a date in the **Start hold event on** text box.

You can also:

Click the **Calendar** button  to select a date.

10. Click **Save**.
The Manage Hold Events page appears with a list of active hold events.

Reviewing Hold Events

To review a hold event:

1. Click the **Billing Administration** tab.
The Billing Administration screen appears.
2. In the left navigation panel, click **Manage Hold Events**.

The Manage Hold Events page appears.

3. Click the **Review** link for the appropriate hold event in the **Current Hold Events** list.
A confirmation message appears, with the details of the hold event.

Releasing an Account From a Hold Event

To release an account from a hold event:

1. From the Billing Dashboard, click the appropriate **Account** link.
The Account Home page appears.

You can also:

Search for an account. For more information, see *Searching for a Billing Account*.

2. In the hold event alert message, click the **Release from Event** link.
The Edit Hold Billing For Account page appears.
3. (Optional) Click an alternate resume option.
4. Click **Resume**.
The account is released from the hold event.

Ending a Hold Event

To end a hold event:

1. Click the **Billing Administration** tab.
2. In the left navigation panel, click **Manage Hold Events**.
The Manage Hold Events page appears.
3. Click the **End** link for the appropriate hold event.
A confirmation message appears, with the details of the hold event end.

Setting the System Date

Out-of-the-box functionality uses the computer system time and date. The system date can be changed to test date-sensitive functions in Duck Creek Billing™. Access to this functionality may be blocked for most users.

Extreme caution must be used when setting the system date. Changing the system date affects all Duck Creek Billing™ accounts, and causes automatic processing and other account activity to occur as though the time has actually passed. Reverting to the original date does not reverse the work that has been processed. For example, if an invoice is generated when a date is changed, the invoice cannot be reversed by changing the date back. Changing the system date outside a test environment will likely produce undesirable results.

To set the system date:

1. Click the **Billing Administration** tab.
2. In the left navigation panel, click **Set System Date**.

The System Date page appears.

3. In the **System Date** text box, enter a date.

You can also:

Click the Calendar button to select a date.

4. (Optional) Select the **Ignore Time** check box to ignore the time stamp.
5. (Optional) Click **Set System Date** to apply the new date.
6. (Optional) Click **Reset to Current Date** to reset the system date to match the system date on the computer being used.

Requesting a Disbursement

Configuration is required to request a disbursement in Duck Creek Billing™. For more information, see "Disbursement Interface Configuration" in the Customization section of the Duck Creek Billing™ Reference Guide.

While Duck Creek Billing™ can be configured to automatically generate disbursement requests, disbursements can also be requested manually. The Disbursement Interface Service allows a user to manually start and stop the disbursement interface. When the disbursement service is started, the associated requests are posted immediately, resulting in a file of pending disbursements. If the request is outside the processing window, the component will reschedule itself based on the start time and interface window set in the configuration settings. For more information on configuring the disbursement service, see "Disbursements" in the Integration section of the Duck Creek Billing™ Reference Guide.

To start the disbursement service:

1. Click the **Billing Administration** tab.
2. In the left navigation panel, click **Disbursement Request**.
The Disbursement Interface Service page appears.
3. Click **Start Service** to request a disbursement.

If a request is already in the queue, duplicate requests are created and the interface processing will run more frequently than expected. Verify the status of the interface service before using this function.

To stop the disbursement service:

- Click **Stop Service**.

For more information, see *Working with Disbursements*.

Working in the Batch Cash Management Area

Batch payments are designed for processing and managing multiple payments for multiple accounts simultaneously. A batch can contain any combination of payment methods, including cash, check, Electronic Fund Transfers (EFT), credit card, debit card, and pre-authorized credit and debit cards.

Identified and unidentified payments can be entered in the same batch. An identified payment is associated with an account or policy, while an unidentified payment is not immediately associated with an account or policy.

The account number, policy number, or party information can be used to launch a search for the appropriate account for an identified payment. Unidentified payments can be entered in the system, and be held until research to identify the account or policy associated with the payment can be completed. For more information about working with unidentified payments, see *Managing Unidentified Payments*.

For more information about working with individual payments, see *Making a Payment*.

Creating a Payment Batch

The first step for working with a payment batch is to create the batch. Multiple batches can be created and then be individually selected for entering payments, or a batch can be created and used immediately for entering payments.

To create a batch payment:

1. Click the **Batch Cash Management** tab.
The Batch Cash Management page appears.
2. In the left navigation panel, click **Start A New Batch**.
The Start A New Payment Batch page appears.
3. Do one of the following:
 - In the **Batch Number** text box, enter the appropriate batch number or name.
 - To automatically generate a batch number, leave the text box empty.

After a batch is created, the Batch Name cannot be edited.

4. (Optional) In the **Control Total** text box, enter the total dollar amount of payments to be entered in the batch.

If a Control Total is entered for a batch, the batch cannot be processed until the total of the batch cash payments equals the Control Total.

5. In the **Default Payment Method** list, click the appropriate method.

You can select a different option in the Payment Method list as necessary.

6. (Optional) In the **Description** text box, enter a description for the batch payment.
7. Click **Create**.
The Batch Number page appears.

8. (Optional) Click  to view a list of all the payments included in the batch.

Adding an Identified Payment to a Batch

An identified payment is one that can immediately be associated with an account or policy. The account number, policy number, or party information can be used to associate a payment with the appropriate account or policy.

To add an identified payment to a batch:

1. Click the **Batch Cash Management** tab.
The Batch Cash Management page appears.
2. Click the appropriate **Batch Number** link in the **Batch Number** list.
The Payment List page appears.

3. Click .
The Batch Number page appears.

The **I know the account, policy number or name** button is selected by default.

4. Enter the appropriate information in the **Enter Number** text box.
5. Click **Search**.

Selecting the Account Number or Policy Number initiates a search within the Duck Creek Billing™ system. Searching with Party Information initiates a search of the entire Party data system, which includes Duck Creek Billing™.

If a search returns a single match, the account number is displayed below the Payment Reference section. If the search returns multiple matches, a candidate list appears. Select the appropriate account from the list.

6. (Optional) Click **Select Another Reference** to launch another search if no matching account is found.
When a matching account is located, the Payment Details appear.
7. In the **Payment Amount** text box, enter the amount of the payment.

Entering the dollar sign (\$) in the **Payment Amount** text box is not necessary.

8. In the **Payment Type** list, click one of the following options:
 - Cash With App
 - Deposit
 - Payment
 - Voucher
9. In the **Payment Method** list, click the appropriate option.
For more information, see *Making a Payment*.

The Date Received defaults to the current system date.

10. (Optional) To change the date, enter a date in the **Date Received** text box.

You can also:

Click the **Calendar** button  to select a date.

11. Click **Add Payment**.
The Batch Number page appears.

Adding an Unidentified Payment to a Batch

Unidentified payments are payments that cannot immediately be associated with an account or policy. For example, a payment may be received without an invoice, account number, or policy number. Unidentified payments can be entered in the system, and be held until the appropriate account or policy is identified.

To enter an unidentified payment:

1. Click the **Batch Cash Management** tab.
The Batch Cash Management page appears.
2. Click the appropriate **Batch Number** link in the **Batch Number** list.
The Payment List page appears.
3. Click  **Add Another Payment**.
The Batch Number Payment page appears.
4. Click **This is an unidentified payment, not associated with an account or policy**.
The Payment Reference details appear.
5. Complete at least one of the fields marked with an asterisk (*).
6. Enter the available payment information.
The Date Received defaults to the current system date.
7. (Optional) To change the date, enter a date in the **Date Received** text box.

You can also:

Click the **Calendar** button  to select a date.

8. Click **Add Payment**.
The Batch Number page appears.
9. (Optional) To view all unidentified payments, from the Billing Dashboard, in the left navigation panel, click **Unidentified Payments**.

The Unidentified Payments page appears with a list of all unidentified payments. For more information, see *Managing Unidentified Payments*.

Working with Payment Batches

When working with payment batches in Duck Creek Billing™, you can:

- *Working with Batches Awaiting Deposit*
- *Process Payment Batches*
- *Search for Processed Batches*
- *Reverse Processed Batches*
- *Edit Payment Batches*

Working with Batches Awaiting Deposit

When you click the **Batch Cash Management** tab, the Batch Cash Management page appears with a list of all the batches awaiting deposit.

You can work with the entire batch, or individual payments within a batch.

Deleting a Payment Batch

To delete a batch awaiting deposit:

1. Click the **Batch Cash Management** tab.
The Batch Cash Management page appears.
2. Select the check box for the appropriate batch in the **Batch Number** list.

To delete multiple batches, select the appropriate check boxes in the **Batch Number** list.

3. In the action list, click **Delete the selected batches**.
4. Click **Submit**.

Depositing Payment Batches

To process a batch awaiting deposit:

1. Click the **Batch Cash Management** tab.
The Batch Cash Management page appears.
2. Select the check box for the appropriate batch in the **Batch Number** list.

To deposit multiple batches, select all the appropriate check boxes in the **Batch Number** list.

3. In the action list, click **Deposit the selected batches**.
4. Click **Submit**.

Reversing a Payment Batch

To reverse a batch awaiting deposit:

1. Click the **Batch Cash Management** tab.
The Batch Cash Management page appears.
2. Select the check box for the appropriate batch in the **Batch Number** list.

To reverse multiple batches, select all the appropriate check boxes in the **Batch Number** list.

3. In the action list, click **Reverse the selected batches**.
4. Click **Submit**.

Working with Individual Payments in a Batch

You can edit or delete individual payments in a batch.

To edit individual payments in a batch:

1. Click the **Batch Cash Management** tab.
The Batch Cash Management page appears, with a list of all Batches Awaiting Deposit.
2. Click the appropriate **Batch Number** link in the **Batches Awaiting Deposit** list.
The Payment List page for the selected batch appears.
3. Click the **Edit** button .
The Edit Payment page appears.
4. Make desired changes.
5. Click **Update Payment**.

To delete individual payments in a batch:

1. Click the **Batch Cash Management** tab.
The Batch Cash Management page appears, with a list of all Batches Awaiting Deposit.
2. Click the appropriate **Batch Number** link in the **Batches Awaiting Deposit** list.
The Payment List page for the selected batch appears.
3. Click the **Delete** button .

Clicking the **Delete** button  automatically deletes the payment without asking for confirmation.

The payment is deleted from the batch.

Searching for Processed Batches

You can search for a processed batch by entering as little as one piece of information about the batch.

To search for a processed batch:

1. Click the **Batch Cash Management** tab.
The Batch Cash Management page appears.
2. In the left navigation panel, click **Processed Batches**.
The Processed Batches page appears.
3. Enter the appropriate information in at least one of the following fields:
 - Batch Number
 - User ID
 - Date Deposited
 - Date Created

The list is filtered by the amount of information entered in the search.

4. Click **Search**.

You can also:

Click

Display All Items

5. Click the **Batch Number** link to view the batch details.
The Payment List Batch Number detail page appears.

Working with Processed Batches

After a batch is processed, it can be reversed, or edited.

Reversing Processed Batches

If a batch is processed in error, it can be reversed.

To reverse a processed batch:

1. Click the **Batch Cash Management** tab.
The Batch Cash Management page appears.
2. Click **Processed Batches** in the left navigation panel.
The Processed Batches page appears.
3. Select the appropriate check box in the **Processed Batches** list.

To reverse multiple batches, select all the appropriate check boxes from the **Processed Batches** list.

4. Click **Reverse**.
The reversed batch remains in the list of processed batches with a status of Reversal Processed.

Editing a Payment Batch

To edit batch details:

1. Click the **Batch Cash Management** tab.
The Batch Cash Management page appears.
2. Click the **Batch Number** link in the **Batch Number** list.
The Payment List page appears.
3. Click  **Edit Batch Details**.
The Edit Payment Batch page appears.
4. Make the appropriate edits.
5. Click **Update**.
The Payment List page appears.

Managing Unidentified Payments

Unidentified payments are payments that cannot immediately be associated with the appropriate policy or account. After they are entered in Duck Creek Billing™, unidentified payments can be applied to a policy, updated, or reversed.

Associating Unidentified Payments with Accounts

To associate an unidentified payment with the appropriate policy or account:

1. In the **Activities** list on the Billing Dashboard, click **Unidentified Payments**.
The Unidentified Payments page appears.
2. Locate the appropriate payment in the **Unidentified Payments** list, and then click the **Details** link.
The Payment Reference page appears.
3. Click **I know the account, policy number or name**.
4. In the **Search for Account by** list, click the appropriate criteria.

Selecting the Account Number or Policy Number initiates a search within the Duck Creek Billing™ system. Searching with Party Information initiates a search of the entire Party data system, which includes Duck Creek Billing™.

5. In the **Enter Number** text box, enter the appropriate number.
6. Click **Search**.
If a search returns a single match, the account number is displayed in the Payment Reference section. If multiple matches are returned, a candidate list appears.
7. (Optional) Click **Select Another Reference** to launch another search if no matching account is found.
The Unidentified Payments page appears.

8. (Optional) Select the **Place hold on payment when processed** check box to place the item in suspense.

If the check box is not selected, the payment is automatically processed.

9. Click **Process Payment**.
The Unidentified Payments page appears, with an **Account Number** link. The payment is added to the **Recent Account Activity** list.

Updating Unidentified Payments

If you have additional information about an unidentified payment, you can update the payment reference without processing the payment.

To update the payment reference:

1. In the **Activities** list on the Billing Dashboard, click **Unidentified Payments**.
The Unidentified Payments page appears.
2. Locate the appropriate payment in the **Unidentified Payment** list, and then click the **Details** link.
The Payment Reference page appears.
3. Update the Payment Reference information as appropriate.
4. Click **Update Reference**.
The Unidentified Payments page appears.

Reversing Unidentified Payments

To reverse an unidentified payment:

1. In the **Activities** list on the Billing Dashboard, click **Unidentified Payments**.
The Unidentified Payments page appears.
2. Locate the appropriate payment in the **Unidentified Payment** list, and then click the **Details** link.
The Payment Reference page appears.
3. In the **Reverse This Payment** list, click one of the following reasons for the reversal:
 - Company Mistake
 - EFT Rejection
 - Non-Sufficient Funds
4. Click **Reverse Payment**.
The Unidentified Payments page appears with a message confirming the reversal.

Working with Tasks

The Tasks section allows users to view and work with tasks. Tasks can be generated by individual users, or by the system using ManuScript logic. All tasks accessible from Duck Creek Billing™ are associated with a billing account number. In addition, all tasks are assigned to task queues (defined by privileges assigned in EXAMPLE UserAdmin™).

Within queues, tasks can be assigned to individual users or remain available for any user with access to that queue to pick up.

Out of the box, the Tasks section has two pages:

- My Tasks
- Task Management

In addition to viewing tasks from the Tasks section in Duck Creek Billing™, users can also view open tasks associated with a specific policy on that policy's Policy Details page in the policy administration system. Users can create new billing tasks for a policy from this page. For more information about the Policy Details page and its tasks section, see *Policy Details*.

For information about customizing tasks, generating tasks automatically, setting up task queues, or setting up batch processes for tasks, see *Customizing Tasks*. For general information about customizing EXAMPLE Express® pages, see *Customizing EXAMPLE Express® Skins*.

My Tasks

The My Tasks page is divided into two sections: *My Tasks*, which displays all tasks assigned directly to the user, and *Tasks Available for Pickup*, which displays all tasks the user can pick up. Out of the box, this page is visible to all users, and it appears as follows:

The screenshot shows the Duck Creek Billing interface. The top navigation bar includes links for Policy, Billing, and Logout. Below this, a secondary navigation bar contains tabs for Billing Dashboard, Billing Administration, Batch Cash Management, Tasks (selected), and Notifications. The main content area is titled 'My Tasks' and is divided into two sections. The first section, 'My Tasks', features a 'View All Tasks' dropdown and a 'More Options' link. It contains a table with the following data:

Queue	Category	Title	Status	Policy/Quote #	Created	Due Date
Internal Users	Billing Ac...	use	Open	1P2011	2/15/2011	2/15/2011
Internal Users	Billing Ac...	New task for documentation ...	Open	1P2011	2/15/2011	2/15/2011
Internal Users	Billing Ac...	Review applications	Open	1P2011	2/15/2011	2/15/2011

Below the table, it indicates '3 results found. Currently showing 1 - 3.' The second section, 'Tasks Available for Pickup', has 'View All Queues' and 'View All Tasks' dropdowns, and a 'More Options' link. It contains a table with the following data:

Queue	Category	Title	Status	Policy/Quote #	Created	Due Date
-------	----------	-------	--------	----------------	---------	----------

At the bottom, it states 'No results to display.'

From the My Tasks page, users can open individual tasks and view details or perform any of the following actions (based on the user's privileges):

- Pick up the task (if not already assigned)
- Complete the task (if assigned to the user)
- Decline the task
- Edit the task (if the user created the task, or if the task is assigned to the user), or add notes to the task
- Attach items to the task (if the user has attachment privileges and created or has been assigned the task)
- Send the task back to the queue (if assigned to the user)
- Reassign the task
- Delete the task

For more information about the Task Details page and the actions available on that page, see *Task Details Page*.

Task Management

The Task Management page is intended for users who must be able to view and manage task workloads. This page displays all tasks in all queues the user has permission to work with. On this page, users can filter tasks by queue, due date, or assignee. Users can then use a shortcut to reassign tasks, or open task details to view or perform other task actions. Out of the box, this page appears as follows:

New Task Page

Users can create new tasks using the New Task page.

To add a new task:

1. From the Account Home page, in the left navigation panel, click **Account Tasks**. The Account Task page appears.
2. Click **Add a Task** to add a new task.

You can also: Click **Add a Task** on the Policy Details page of a quote or policy.

On this page, users can enter information for a new task, including the title, type of task, due date, and description. Users can then assign the task to the appropriate queue and, if they have the appropriate permissions, to an individual within the specified queue.

Out of the box, the New Task page appears as follows:

The New Task page is controlled by the Task Detail Manuscript. If desired, carriers can use the out-of-the-box Task Detail Manuscript, or they can modify their implementation to use a custom Task Detail Manuscript.

For instructions on using a custom Task Detail Manuscript or customizing the out-of-the-box Task Detail Manuscript, see *Customizing the Task Detail Manuscript*. For information about system Manuscripts in general, see *System Manuscripts*.

Task Details Page

Users can view details of a task by clicking that task in the list of tasks. Out of the box, tasks have the following details.

Item	Description
Title	Title of the task.
Account Number	Account number associated with the task and link to the Account Home page.

Category	Type of task. For instructions on defining task categories, see <i>Customizing Task Categories</i> .
Due Date	Date the task is due.
State	State of the task. Options are Open, Completed, Closed, or Deleted. Out of the box, the EXAMPLE Platform® comes with a reason code of "Declined" for the <i>Closed</i> state. For instructions on defining additional reason codes, see <i>Customizing Task Reason Codes</i> .
Created	Date task was created.
Created By	User who created the task. If the task was system-generated, the value will be <i>System</i> .
Queue	Queue to which the task is assigned.
Assignee	User (within the assigned queue) to which the task is assigned.
Description	Task details.
Notes	Any user-added notes for the task.
Task History	History of the task, including any changes to assignee, queue, or status.
Attachments	Documents attached to the task.

Actions available for tasks include:

- **Pick up** – Available only if a user has permission to view and work with tasks, as determined by privileges in EXAMPLE UserAdmin™. Available only when a task is not already assigned. Picking up a task assigns the task to the user who picks it up.
- **Complete** – Available only if a user has permission to view and work with tasks, as determined by privileges in EXAMPLE UserAdmin™. Available only when a task is assigned to the user. Marking a task as complete sets the state of the task to *Completed*.
- **Decline** – Available only if a user has permission to decline the task, as determined by privileges in EXAMPLE UserAdmin™. Declining a task sets the state of the task to *Closed*, with a reason of *Declined*.
- **Edit** – All users can add notes. A user to whom a task is assigned can also edit the due date. A user who created a task can edit the title, category, and description.
- **Send to Queue** – Available only when a task is assigned to the user. Sending a task back to the queue moves the task back into an unassigned state within its queue.
- **Reassign** – Available only if a user has permission to reassign, as determined by privileges in EXAMPLE UserAdmin™. This action allows the user to select a new queue and (if desired) a new assignee.
- **Delete the task** – Available only if a user has permission to delete the task, as determined by privileges in EXAMPLE UserAdmin™. This action marks the task for deletion. The task is not permanently deleted until the associated policy is purged from the database.

In addition, users who have attachment privileges and have created or been assigned a task can add and delete attachments from that task.

Working with Notifications

You can use the Notification system accessible in Duck Creek Billing™ to send notifications or view existing notifications. The notifications originate in EXAMPLE Express® and are accessible in Duck Creek Billing™. For information about customizing notifications, see the *EXAMPLE Express® User Guide*.

When working with notifications in Duck Creek Billing™, you can:

- *Send a Notification*
- *View Notification Details*
- *Delete a Notification*

Sending a Notification

In Duck Creek Billing™, you can send a general notification (not attached to any quote or policy) or a policy-specific notification (attached to a quote or policy).

Sending a General Notification

To send a general notification (not attached to a quote or policy):

1. On the Notifications page, click **Send A Notification**.
The New Notification page appears.
2. Beneath **Send To**, click the desired recipient.
 - **All users** — Skip to Step 4.
 - **Selected users, Selected entities, or Selected entity groups** — Continue with Step 3.
3. Select the desired users, entities, or entity groups.
4. Select the **Type** of notification.
5. Enter the **Subject** of the notification.
6. Enter the text of the notification, and then click **Send**.

Sending a Policy-Specific Notification

To send a notification attached to a quote or policy:

1. On the Policy Details page for a given quote or policy, in the **Notifications** section, click **Send A Notification**.
The New Notification page appears.
2. Beneath **Send To**, click the desired recipient.
 - **All users** — Skip to Step 4.
 - **Selected users, Selected entities, or Selected entity groups** — Continue with Step 3.
3. Select the desired users, entities, or entity groups.
4. Select the **Type** of notification.
5. Enter the **Subject** of the notification.
6. Enter the text of the notification, and then click **Send**.

Viewing Notification Details

To view notification details, perform one of the following actions:

- In the list of notifications on the Notifications page or on the Policy Details page for a given quote or policy, click the **View** button .
- In the list of notifications on the Policy Administration Dashboard, click the **Message** of the desired notification.

Deleting a Notification

Deleting a notification deletes the notification from the database. The notification will be removed from all users' lists of notifications.

To delete a notification:

1. When viewing notification details, click **Delete This Notification**.
A confirmation message appears.
2. Click **Yes** to complete the task.

You can also:

In the list of notifications on the Notifications page or on the Policy Details page for a given quote or policy, click the **Delete** button .

Appendixes

This section contains information about:

- Searching for a Billing Account
- Selecting Billing Account Options
- Selecting Policy Plan Options
- Setting Table Preferences
- Adding A Bill-In-Full Record (Optional)
- Adding A Down Payment Record (Optional)
- Adding An Allocation Priority (Optional)
- Target Draw Days Settings
- Target Due Days Settings

Searching for a Billing Account

To search for a billing account:

1. From the **Billing Dashboard**, in the **I want to find an account by** list, click one of the following options:

- Account Number
- Policy Number
- Party Information

Selecting the Account Number or Policy Number initiates a search of Duck Creek Billing™ accounts. Selecting Party Information initiates a search of the entire Party data system, which includes Duck Creek Billing™.

2. In the **searching for** text box, enter the appropriate text.
3. Click **Search**.
4. Select the appropriate account, or refine search criteria and launch a new search.

Selecting Billing Account Options

Billing plans may be configured by specifying the values for Billing Account Options. The available options control all automated billing and collection processes, including account type, installment scheduling and invoicing and collection follow-up activities. The options Duck Creek Billing™ users see is determined by the Manuscript configuration.

Any modifications to existing Billing Account Option configurations will affect all billing accounts and policies which reference the configuration.

The following table includes all the possible options, and may include options that are not configured in your selected Manuscript.

Category	Option	Definition	Valid Entries	Default
Payment				
	Account Type Code	Specifies the type of account.	• Account • Agency Lite	Account
	NSF Charge Action	Specifies whether a charge is assessed for non-sufficient funds (NSF).	• A — Assess NSF fee. • N — Do not assess NSF fee.	A
	NSF Reversal Charge Amount	Amount of the NSF penalty.	Any value, including 0.	\$25

	Payment Reversal Due Date Adjust Reason	When a payment is reversed, the system re-opens the bill items that were closed by the reversed payment. The system adjusts the due date for the closed items only when a payment reversal reason is indicated here.	• CM — Company mistake. • NSF — Non-sufficient funds.	CM
	Excess Payment On Policy	Defines how excess payment is handled when a payment allocation is directed to a specific policy with a zero balance.	• A — Payment will be automatically allocated to other policies on the account that have a balance. • S — Suspend the payment on the policy it was intended for, and allow for disbursement.	A
Scheduling				
	Planned Installment Frequency Code	The frequency at which billing occurs on the account level.	Monthly	Monthly
	Bill Production Offset Days	The number of days between the invoice date and the due date. Determines when the invoice is generated.	Any positive number between 1 and 31.	20

	EFT Draw Offset Days	The number of days between EFT invoice date and the due date. This value is added to the EFT invoice date to determine the EFT draw date.	Any positive number between 1 and 31.	3
	Out of Cycle Bill Allowed Indicator	Determines whether an out of cycle bill is allowed.	Select check box to allow.	Not selected
	EFT Pre Note Indicator	Determines whether the account sends pre-notes when it is first set up on EFT.	Select check box to allow.	Not selected
	Default Policy Plan Manuscript ID	Specifies the ID of Manuscript being used.	Any valid Manuscript ID.	Billing_PolicyPlanSetup_TemplateFull_1_0_0_0
Disbursement				
	Disbursement Method Code	Determines the method by which disbursements will be sent to the payee on the account.	• Check • EFT • Credit Card	Check
	Hold Disbursement Indicator	Determines whether the account allows for automatic disbursement requests.	Select check box to allow.	Not selected
Invoice				
	Account Rollup	Displays the total amount due on the invoice.	Select check box to allow.	Selected
	Aggregation Rollup	Displays the aggregation on the invoice.	Select check box to allow.	Not selected
	Bill Item Rollup	Displays bill items on the invoice.	Select check box to allow.	Not selected

	Commission Rollup	Displays commission on invoice.	Select check box to allow.	Not selected
	Coverage Rollup	Displays coverage on invoice.	Select check box to allow.	Not selected
	Form MS	Specifies forms ManuScript.	Any valid ManuScript.	BillingInvoice
	Line Type Rollup	Displays line type on invoice.  If this check box is not selected, no information will display on the invoice even if other check boxes are selected.	Select check box to allow.	Selected
	Policy Rollup	Displays the amount due on each policy below the Premium heading on the invoice.	Select check box to allow.	Selected
	Receivable Sub Type Rollup	Displays the receivable sub type on the invoice.	Select check box to allow.	Not selected
	Receivable Type Rollup	Displays each receivable on the invoice.	Select check box to allow.	Selected
	Transaction Type Rollup	Displays the transaction type in the description box on the invoice.	Select check box to allow.	Not selected

	Unit Rollup	Displays the unit on the invoice.	Select check box to allow.	Not selected
	Invoice Method	Specifies the invoice type.	• Paper • EFT	Paper
	EFT Service Charge Amount	Specifies the service charge amount for EFT invoice.	Any value.	\$1
	EFT Service Charge Action	Determines whether the account will generate service charges for EFT invoices.	• Fixed Service Charge • No Service Charge • Variable Service Charge	Fixed Service Charge
	Invoice Service Charge	Specifies the service charge amount.	Any value.	\$1
	Paper Invoice Service Charge Action	Determines whether the account will generate a service charge for paper invoices.	• Fixed Service Charge • No Service Charge • Variable Service Charge	A
	Suppress First	Determines if the first invoice should be suppressed.	Select check box to allow.	Not selected
	Paper Invoice Service Charge Percent	Specifies the service charge percentage.	Any value.	8.00 (8%)
	EFT Invoice Service Charge Percent	Specifies the service charge percentage.	Any value.	8.00 (8%)

	Service Charge Minimum Amount	Specifies the minimum service charge amount assessed.	Any amount.	\$5.00
	Service Charge Maximum Amount	Specifies the maximum service charge amount assessed.	Any amount.	\$20.00
	EFT Variable Service Charge Exclusions	Specifies items excluded from the variable service charge calculation.	Any valid selection.	None
	First Name (EFT Only)	Specifies the first name on bank account used for the EFT draw.	Any valid entry.	None
	Last Name (EFT Only)	Specifies the last name on bank account used for the EFT draw.	Specifies the last name on bank account used for the EFT draw.	None
	Bank Name (EFT Only)	Bank Name (EFT Only)	Any valid entry.	None
	Account Type (EFT Only)	Specifies the account type.	Checking Savings	None
	Routing Number (EFT Only)	Specifies the bank routing number.	Any valid entry.	None
	Account Number (EFT Only)	Specifies the bank account number.	Any valid entry.	None
	Target Draw Days (EFT Only)	Determines the day of the month the EFT draft is drawn from the specified account.	Any positive number between 1 and 31.	1

	Paper Variable Service Charge Exclusions	Specifies items excluded from the variable service charge calculation.	Any valid selection.	None
	Invoice Line Type (Paper Only)	Specifies the items to exclude from the variable service charge calculation.	(None) Earned Premium First Invoiced Premium Missed Invoice Premium Prior Invoiced Premium Past Due Premium First Invoiced Charges Prior Invoiced Charges Past Due Charges (All)	None
	Receivable Type (Paper Only)	Specifies the receivable type for the items to exclude from the variable service charge calculation.	(None) Premium Tax Fee Surcharge ERPM Deposit (All)	Deposit
	Receivable Sub Type (Paper Only)	Specifies the receivable sub type items to exclude from the variable service charge calculation.	(None) PREV DBRB N L S (All)	(All)

	Transaction Type (Paper Only)	Specifies the transaction type for the items to exclude from the variable service charge calculation.	(None) Endorsement Flat Cancellation New Business Pro Rata Cancellation Monthly Report (All)	(All)
	Use Projected Service Charge	Determines if the projected service charge is displayed on the Installment Schedule.	Select the check box to utilize.	Selected
	Target Due Days	Determines the day of the month that invoices for the account are due.	Any positive number between 1 and 31.	1
Suspense				
	Disbursement Maximum Amount	Specifies the suspended amount that can be disbursed automatically at the time the Disbursement Write Hold Days is reached. If the amount is more than the Disbursement Maximum Amount, the money is held in suspense.	Any positive value.	\$99,999.99

	Disbursement Minimum Amount	Specifies the suspended amount that can be disbursed automatically at the time the Disbursement Write Off Hold Days is reached. If the amount is less than the Disbursement Minimum Amount, the money is written off.	Any positive value.	\$10
	Disbursement Write Off Hold Days	Specifies the number of days money will be held in suspense before it is evaluated for disbursement or write off.	Any value including 0.	30
	Cash With Application Disbursement Write Off Hold Days	Specifies the number of days payments marked with "Cash with App" payment type will be held in suspense before evaluation for disbursement or write off.	Any value including 0.	30
Follow Up				
	Late Charge Action	Determines whether the account will be charged late fees.	• Charge • None	Charge

	Late Charge Amount	Determines the amount of the late charge. Valid only when the value of the Late Charge Action setting is Charge. Late charges appear on the next scheduled invoice, and are not included in the current amount due.	Any value.	\$10
	Late Charge Days	Determines the number of days past the due date the late charge is assessed if the unpaid invoice amount meets or exceeds the Late Charge Threshold Amount. Valid only when the Late Charge Action setting is C.	Any value.	3

	Late Charge Threshold Amount	Determines the amount of the invoice that must remain unpaid in order to assess the late charge on an account. Any amount less than the threshold amount does not generate a late charge, and is written off or billed with the next scheduled invoice.  Valid only when the Late Charge Action setting is Charge.	Any value.	\$10
	Reminder Notice Action	Determines whether reminder notices are sent on the account.	• Reminder • None	Reminder
	Reminder Notice Days	Determines the number of days before or after the due date that the reminder notice can be generated if the unpaid invoice amount meets or exceeds the Reminder Notice Threshold Amount. The value of the Reminder Notice Action Setting must be set to Reminder.	Any value.	5

	Reminder Notice Threshold Amount	Determines the unpaid amount of the invoice that must remain unpaid to generate a reminder notice for an account. Any amount less than the threshold amount will not generate a reminder notice, and will be written off or billed with the next scheduled invoice. The value of the Reminder Notice Action setting must be Reminder.	Any value.	\$10
	EFT Default Letter Manuscript ID	Specifies the Manuscript to be used.	Any valid Manuscript ID.	
	EFTPCN Evaluation Days	Specifies the number of calendar days after an EFT invoice due date that a policy term will be evaluated for pending cancellation status.	Any positive integer.	0
Commissions				
	Commission Statement Format	Specifies commission statement format.	• Adobe PDF • Excel • Comma Separated Value (CSV) • XML	Adobe PDF

	Commission Statement Frequency	Specifies commission statement frequency and day of the month for processing.	• Monthly • Any number between 1 and 31.	• Monthly • 31
	Commission Statement Payment/Collection Method	Specifies the method for paying and collecting commissions.	• Check • EFT	Check

Selecting Policy Plan Options

You can control policy plan options by specifying the values for policy plan options. At the policy-level, these options control invoice frequency, commission scheme, follow up for pending cancel, payment allocation and down payments.

The table below specifies what policy options are available for configuration. The options available to Duck Creek Billing™ users is determined by the ManuScript configuration.

The following table includes the policy options available.

Category	Option	Definition	Valid Entries	Default
Scheduling				
	Frequency	Determines the planned installment frequency code for invoicing.	• Monthly • Quarterly • Annually • Semi-Annually • Bi-Monthly	Monthly
	Installment Plan Description	Specifies a free-form description of the installment plan.	• None • One less than term • Two less than term	One less than term
	Late Entered Strategy Code	Determines whether to catch up or spread the premium when a bill item is posted to billing after its effective date.	• Catch up • Spread • None	None
	Max Number of Installments	Determines the maximum number of installments for a policy term based on frequency.	12 invoices	12

	New Business Earliest Bill Offset Days	Determines the maximum number of days from the effective date of the new business policy term that the first installment is due.  Changing this setting after policy issuance will cause rescheduling activity to occur.	Any positive number, including 0.	45
	Last Available Due Date Displacement	Determines the minimum number of days prior to the expiration date of a policy term that an invoice can be due.  Changing this setting after policy issuance will cause rescheduling activity to occur.	Any positive number, including 0.	30
	Renewal Business Earliest Bill Offset	Determines the maximum number of days from the effective date of the renewal policy term that the first installment can be due.	Any positive number, including 0.	20
	Rescind Redistribution Strategy	Determines what to do with installments that did not invoice due to a rescission because the policy was in a pending cancellation status.	• Catchup • Spread	Catchup
	Reinstatement Charge Amount	Determines the policy term charge created in billing that is assessed when a policy term is reinstated.	Any positive value.	\$5
Commission				

	Commission Scheme	Determines how commission is paid on a policy.	• POW1 (Paid on Written) — The entire commission amount is authorized when the receivable is posted. • POP1 (Paid on Paid) — The commission is authorized as payments are applied to the receivable. • POP2 (Paid on First Paid) — The entire commission amount is paid when the first payment is applied to the receivable. • POE1 (Paid on Effective) — Commission is authorized for each policy transaction at issuance. Payment is not required. • POP4 (Paid on First Paid, plus latter of effective or activity date) — Receiving one good payment on the policy term releases the commission for the policy term. The latter of the policy transaction effective date or the activity date (process date) of the payment is used as the commission authorization date.	POW1
Follow Up				
	P C N Allow	Determines whether or not the policy term should ever be evaluated for pending cancellation.	• Selected — Yes • Cleared — No	Selected
	P C N Trig Days	Determines the number of days after the due date that a policy term is evaluated for pending cancellation.	Any positive integer.	5

	Auto Rescind Tolerance Days	Determines the tolerance number of days within the Auto Rescind Equity Date that a recalculated current equity date must be in order to rescind a policy term.	Any positive integer.	5
	Auto Reinstatement Days	Determines the number of days from the term expiration date that the equity term expiration date and the equity date must meet after a payment has been made on the canceled policy. If the payment made on the canceled policy term brings the equity date to be greater than the term expiration date minus the Auto Rescind Days, the system will send a request for reinstatement to the issue system.	Any integer between 0 and 365.	0

Setting Table Preferences

You can set preferences for the display of tables in Duck Creek Billing™. In Duck Creek Billing™ tables, you can:

- *Sort table data*
- *Show or hide columns*
- *Rearrange column order*

After setting table preferences, you can save your changes and preserve your preferences, or you can restore the default table settings.

- To preview the display, click the **Show Preview** button .
- To save table preferences, click the **Save Table Settings** button .
- To restore table defaults, click the **Restore Defaults** button .

Sorting Table Data

To sort table data:

1. In the table you wish to sort, hover over the column heading by which you wish to sort.
2. Click the drop-down arrow to the right of the heading.
3. Click **Sort Ascending** or **Sort Descending**.

You can also:

In the table you wish to sort, click the column heading by which to sort the data. The table automatically sorts in ascending order. To sort in descending order, click the column heading again.

Showing or Hiding Columns

To show or hide columns:

1. In the table you wish to sort, hover over any column heading.
2. Click the drop-down arrow to the right of the heading.
3. Point to **Columns**, and then click the columns you wish to show or hide.

Rearranging Column Order

To rearrange column order:

- Click the heading of the column you wish to move, and drag it to the desired location.

Adding A Bill-In-Full Record (Optional)

If the policy amount is paid in full, you can add a paid in full record to the policy. A Bill-In-Full Record schedules in full, regardless of the policy term frequency set in the policy term settings.

To add bill-in-full record:

1. Click **Add Bill-In-Full Record**.
2. In the **Receive Type** list, click one of the following options:
 - Premium
 - Tax
 - Fee
 - Surcharge
 - Deposit
3. In the **Sub Type** list, click the appropriate option.
4. In the **Transaction** list, click one of the following options:
 - Endorsement
 - Flat Cancellation
 - New Business
 - Pro Rata Cancellation
 - Monthly Report
 - *
5. Click **Complete**.

Depending on the policy system being used, the work flow and available pages will vary, but the result of the work is the issuance of a policy. If you are using EXAMPLE Express®, the Submission page appears. Click **Complete Issuance**. The EXAMPLE TransACT® page appears.

Adding A Down Payment Record (Optional)

The down payment record is the percentage of down payment to bill on the first invoice for the policy term.

To add a down payment record to a policy:

1. Click **Add Down Payment Record**.
2. In the **Receive Type** list, click one of the following options:
 - Premium
 - Tax
 - Fee
 - Surcharge
 - Deposit
3. In the **Sub Type** list, click the appropriate option.
4. In the **Transaction** list, click one of the following options:
 - Endorsement
 - Flat Cancellation
 - New Business
 - Renewal
 - Pro Rata Cancellation
 - Monthly Report
 - *
5. In the **Percent** text box, enter the appropriate percentage for the down payment.

Valid values are any positive integer, including 0.

Changing the selected Down Payment Record values after policy issuance will cause rescheduling activity to occur.

Adding An Allocation Priority (Optional)

When the amount of payment received for a policy term is the full amount due, all the bill items associated with that policy term with the same due date are automatically paid when the payment is applied. However, when the amount of payment is less than the full amount due, the payment is spread among the bill items proportionately unless an allocation priority is specified.

Instead of distributing the payment proportionately, an allocation priority specifies the order that payment is applied to specific receivable types within the policy term. The highest priority is paid first, and any remaining payment amount is then applied in order from the highest to the lowest priorities. If multiple receivable types have the same priority, the payment amount is allocated proportionately among those items.

The oldest item within a specified policy term is automatically paid first when payment is made on the account, regardless of any specified allocation priority. Policies in PCN status are paid first, and allocation priorities determine how any remaining payment amount is applied.

Specifying Payment Allocation Priorities

To specify a payment allocation priority for a policy term:

1. From the Policy Term Summary page, click **View/Edit Policy Term Settings** in the left navigation panel.
2. Click **Add Allocation Priority**.
3. In the **Receive Type** list, click one of the following options:
 - Premium
 - Tax
 - Fee
 - Surcharge
 - ERPM (Earned Premium)
 - Deposit
4. In the **Sub Type** list, click one of the following options:
 - *
 - PREV (Payment Reversal)
 - DBRB (Re-billed Disbursement)
 - N (NSF Charge)
 - L (Late Fee)
 - S (Service Charge)
5. In the **Transaction** list, click one of the following options:
 - Endorsement
 - Flat Cancellation
 - New Business
 - Pro Rata Cancellation
 - Monthly Report
 - *
6. In the **Priority** text box, enter a priority value for the allocation.

The higher the number, the higher the priority. For example, number five is a higher priority than number one. The same priority can be assigned to multiple receivables.

7. Click **Complete**.
8. (Optional) Click **Delete** to remove an allocation priority.

Working with Equity-Bearing Calculations

Equity-bearing receivables, including premium, fees, surcharges, and taxes, are computed in the automatic rescind amount for an equity-bearing receivable. When payment is received for a policy term in PCN status, equity-bearing receivables are paid first regardless of any payment allocation priorities for other receivables. Any remaining payment amount after satisfying the amount due for an equity-bearing receivable is applied according to any specified allocation priorities. For more information, see *Adding an Allocation Priority*.

To specify an equity-bearing receivable:

1. From the Policy Term Summary page for the appropriate policy term, in the left navigation panel, click **View/Edit Policy Term Settings**.
The Policy Plan Setup page appears.
2. Click **Add Allocation Priority**, and then click the appropriate item in the **Receivable Type** list.
3. Select the **Equity Bearing** checkbox for the appropriate item.
4. (Optional) Repeat Steps 2 and 3 for each equity-bearing receivable type.
5. Click **Save Changes**.

Target Draw Days Settings

The Target Draw Days setting determines the draw date each month. The date the invoice is created is determined by the number entered in the EFT Draw Offset Days on the Select Billing Account Options page. For example, if a draw will be made the 30th day of the month, and the EFT Draw Offset Days is set to 10, the invoice is generated the 20th day of each month.

The following table provides examples of numbers you can enter, and the resulting draw date.

Item	Description
31	The draw date is the last day of the month. This setting automatically adjusts for months with fewer than 31 days.
30	The draw date is the 30th day of each month, except February which is the 28th or 29th.
29	The draw date is the 29th day of each month. This setting automatically adjusts for February when it is not a leap year.
1 to 28	The draw date corresponds to the specific date of the month entered.

Target Due Days Settings

The target due day is the day the installment is due each month. The date the invoice is generated each month is determined by the number entered in the Bill Production Offset Days on the Select Billing Account Options page. For example, if a bill is due the 30th day of the month, and the Bill Production Offset Days value is set to 10, the invoice is generated the 20th day of the month.

The following table provides examples of the numbers you can enter, and the resulting due date.

Item	Description
31	The due date is the last day of the month. This setting automatically adjusts for months with fewer than 31 days.
30	The due date is the 30th day of each month, except February which is the 28th or 29th.

29	The due date is the 29th day of each month. This setting automatically adjusts for February when it is not a leap year.
1 to 28	The due date corresponds to the specific date of the month entered.
