EXAMPLE Express® Overview

This document contains a description of EXAMPLE Express® in the EXAMPLE Platform®. It outlines the major uses of EXAMPLE Express® and the main features that make it a flexible policy administration solution.

What Is EXAMPLE Express®?

EXAMPLE Express® is a customizable Web application that allows insurance carriers, MGAs, and other entities to provide their agents, partners, and in-house staff with an online policy administration system. In conjunction with EXAMPLE Server® and EXAMPLE ManuScripts™, EXAMPLE Express® provides the ability to:

- View and work with policies and quotes
- View and work with clients
- Send and receive notifications
- Manage work through a task system
- Add and view policy notes

In addition, EXAMPLE Express® can be used in conjunction with a carrier's own web site to provide consumers with the ability to obtain quotes and purchase and manage policies online.

EXAMPLE Express® in the EXAMPLE Platform®

EXAMPLE Express® works with the following other EXAMPLE Platform® products to facilitate policy administration through the web:

- **EXAMPLE ManuScripts™** – EXAMPLE Express® allows users to view and interact with insurance products defined through EXAMPLE ManuScripts™ (built in EXAMPLE Author®). These ManuScripts contain the complete product definition that EXAMPLE Server® uses to collect data, run rules and rating, and control product workflow.
- **EXAMPLE Server®** – EXAMPLE Express® acts as a translator between the user and EXAMPLE Server®, allowing users to send and receive XML data (policy data) and the requests and responses required for rating, underwriting, and other policy administration actions through a user-friendly interface. If desired, EXAMPLE Server® can be extended to allow integration with third-party data services such as MVRs and credit checks, or with internal services that can perform tasks such as querying the claims system for number of losses, generating new policy numbers, or performing clearance.
- **EXAMPLE UserAdmin™** – EXAMPLE UserAdmin™ enables administrators to assign and regulate the privileges of EXAMPLE Express® users using role-based security. With EXAMPLE UserAdmin™, carriers can define security permissions according to their distinct organizational needs.
- **EXAMPLE TransACT®** – (Optional) EXAMPLE Express® can work with EXAMPLE TransACT® to extend its policy processing capabilities through policy issuance and beyond. EXAMPLE TransACT® allows users to perform endorsements, cancellations, and other transactions, and it supports out-of-sequence transactions, audit processing, and batch processing.
- **EXAMPLE Forms™** – (Optional) EXAMPLE Express® can work with EXAMPLE Forms™ to provide document generation capabilities. EXAMPLE Forms™ allows users to view, select, and generate policy forms.

EXAMPLE Express® as a Policy Administration System

EXAMPLE Express® is a policy administration system for agents, underwriters, managers, or any other role in a carrier's organization. EXAMPLE Express® provides support for any line of business or state, and it facilitates policy administration in several ways.

Policies and Quotes

EXAMPLE Express® provides the ability to:

- Quote new business
- Manage quotes in progress
- Automatically underwrite qualified policies
- Electronically submit marginal business to underwriters for review
- Review submitted policies and approve, decline, or refer them
- Search for policies and quotes

When used in conjunction with EXAMPLE TransACT®, users can also use EXAMPLE Express® to manage policies after issuance, performing endorsements, renewals, cancellations, and other transactions according to customizable rules. EXAMPLE TransACT® supports out-of-sequence transactions, audit processing, and batch processing.

Notifications

The EXAMPLE Express® notification system provides the ability to:

- Manually create and send notifications to individuals or groups of users
- Automatically generate policy-specific notifications during quote and policy processing
- Specify types of notifications and assign a type to each notification
- Associate notifications with individual policies and quotes

Tasks

The EXAMPLE Express® task system provides the ability to:

- Manually or automatically create tasks and assign them to queues or individual users
- Assign due dates to tasks
- Specify task categories and assign a category to each task
- Edit or add notes to tasks
- Complete or decline tasks
- Manage task workloads

Notes

The EXAMPLE Express® notes system provides the ability to:

- Add and attach notes to a policy
- Specify the note to be public or private
- Filter the notes that display

EXAMPLE Express® as a Consumer Access Web Site

EXAMPLE Express® can be used in conjunction with a carrier's own web site and billing system to provide consumers with the ability to obtain quotes, purchase and manage policies online, and view and manage bills.

Using EXAMPLE Express®, consumers can:

- Generate quotes
- Save or send quotes for issuance
- Retrieve and update saved quotes
- View and make changes to quotes and policies
- View and print quote and policy documents

For more information about the Consumer Access feature in the EXAMPLE Platform®, see *Consumer Access in the EXAMPLE Platform®*.

EXAMPLE Express® Customization

EXAMPLE Express® can be easily customized to meet each carrier's unique needs. Through customization of EXAMPLE Express® skins, EXAMPLE Express® can have any look and feel, with any logos, layouts, images, text, and colors desired. Carriers can choose to hide or show certain pages and features, or they can customize the content of various pages. If desired, Carriers can extend the EXAMPLE Express® application to use their own custom pages. In

addition, EXAMPLE ManuScripts™ allow carriers to customize the insurance products that users work with in EXAMPLE Express®.

Besides customizing the look and feel of EXAMPLE Express® pages, carriers can also customize users' permissions in the EXAMPLE Express® system through the role-based security provided by EXAMPLE UserAdmin™. For more information about EXAMPLE UserAdmin™ and EXAMPLE Express® role-based security, see the *EXAMPLE UserAdmin™ Overview* or the *EXAMPLE UserAdmin™ User Guide*.

What Does EXAMPLE Express® Do?

An understanding of EXAMPLE Express® requires an understanding of the main features and functions of EXAMPLE Express®. EXAMPLE Express® has the following major features:

- Policy administration features, including a flexible home page, a customizable new quote process, robust client and policy search functionality, a notification system, and a task system.
- Consumer access features that allow consumers to shop for, purchase, and service policies online.
- A Portfolio feature that allows users to easily view, update, and perform transactions on data shared between a client's quotes and policies.
- Support for customizable, role-based security.

EXAMPLE Express® Policy Administration Features

EXAMPLE Express® policy administration features include:

- **A user-friendly, flexible home page** — Designed to cater to different types of users, the policy administration home page can provide a summary view of everything going on in each user's sphere of responsibility, including:
 - Recent notifications
 - Tasks due soon
 - Recently accessed policies
 - The ability to quickly and easily start a new quote

Carriers can easily customize the home page for each type of user (agent, underwriter, etc.) by adding, removing, or customizing content to best meet each user's needs.

- **Customizable new quote process** — Designed to meet each Carrier's unique needs, the new quote process in EXAMPLE Express® can be easily customized. In addition, users can start quotes simply and easily from anywhere in the system, including from a new quote module on the home page.
- **Robust client and policy search** — EXAMPLE Express® provides a Quick Search feature available from any page in the system that allows users to search for policies and quotes by policy or quote number, or for clients by client name or phone number. EXAMPLE Express® also provides a more advanced search page where users can search for clients or policies using a variety of options.
- **Policy and client pages** — EXAMPLE Express® provides the ability to view policy and client details. Client pages include contact information for the client and any associated policies, quotes, and portfolios. Policy pages include client information, basic policy information, policy data, any outstanding tasks or notifications associated with the policy, and any attachments on the policy.
- **Notification system** — EXAMPLE Express® provides a messaging system that allows users to distribute important announcements. Notifications can be generated manually or automatically, and can be sent to individual users or groups of users. Notifications can also be linked to specific policies and quotes.

- **Task system** — The EXAMPLE Express® task system helps with management of policy administration processes by providing the ability to:
 - Generate tasks automatically during quote/policy processing, or allow users to create tasks manually
 - Assign tasks to individual users or to queues
 - Add notes and attachments to tasks
 - Specify categories for tasks and assign a category to each task
 - Complete, close, or delete tasks, according to Carrier-customized security rules
 - View open tasks associated with a specific policy on that policy's details page
 - View task history, including when a task changed status or ownership
- **Support for policy administration processes** — EXAMPLE Express® can be used with EXAMPLE TransACT® to support policy administration processes such as endorsements, renewals, and cancellations. These processes can be driven by customizable ManuScript rules that govern rating, underwriting, and workflow.
- **Support for document printing** — Users can view printer-friendly versions of quote and policy documents and use browser printing capabilities to print them. EXAMPLE Express® can also be used with EXAMPLE Forms™ to support generation of policy documents.

EXAMPLE Express® Consumer Access Features

EXAMPLE Express® Consumer Access features include:

- The ability for consumers to create and retrieve quotes and log in from a Carrier's own web site
- An account home page from which policyholders can access their policies and quotes, and print forms
- Customizable policy pages where policyholders can view policy details and request changes
- The ability for Carriers to connect a billing system that allows policyholders to view and pay bills

For more information about Consumer Access, see *Consumer Access in the EXAMPLE Platform®*.

EXAMPLE Express® Portfolio Feature

The Portfolio feature offers agents and underwriters the ability to easily view, update, and perform simultaneous transactions on a client's quotes and policies. Designed to work with product ManuScripts, portfolios present a consolidated view of a customer's associated quotes and policies. Functionally, a portfolio enables transaction events and business rules to be applied to sets of associated information.

Using Portfolio, users may:

- View an at-a-glance presentation of all quotes and policies for a customer's account
- Easily enter or update information shared across multiple quotes and policies
- Perform simultaneous transactions on multiple policies
- Print portfolio policy packages with a consolidated billing page for all coverages
- Apply discount credits for multiple policies

For more information about the Portfolio feature, see *Portfolio in the EXAMPLE Platform®*.

EXAMPLE Express® Security Features

EXAMPLE Express® security is controlled through authentication (provided through any of five authentication methods available for the EXAMPLE Platform®) and authorization (provided through EXAMPLE UserAdmin™).

Authentication

Authentication is the process that determines whether a user can access the EXAMPLE Platform®. The EXAMPLE Express® application does not authenticate users itself, but instead can use any of the following five authentication methods:

- EXAMPLE Authentication Server™
- Database authentication
- Windows authentication
- Mixed mode authentication (combines database and Windows authentication)
- Third party authentication

EXAMPLE Express® can be configured to accommodate single sign-on through some of these methods. For more information about EXAMPLE Platform® authentication, single sign-on options, and how to set up each authentication method, see the *EXAMPLE Authentication Server™ User Guide*.

Authorization

Authorization is the process that determines what actions a user can perform in the EXAMPLE Platform®. EXAMPLE Express® authorization is controlled through EXAMPLE UserAdmin™, a powerful, easy-to-use tool that allows carriers to organize access permissions according to their distinct organizational needs. EXAMPLE UserAdmin™ provides role-based security for EXAMPLE Express® by allowing administrators to assign system privileges and product permissions to users based on their association with one or more entities within a carrier's corporate hierarchy. Administrators can grant system and custom privileges to users through the assignment of specified roles (underwriter, agent, administrator, etc.) that are specific to each entity.

EXAMPLE Express® permissions that can be controlled by EXAMPLE UserAdmin™ include:

- Which items (policies and quotes, clients, etc.) users can see in the system
- Which actions users can perform in the system
- Which products an entity's users can access

EXAMPLE UserAdmin™ also provides the ability to specify custom privileges that can be used by EXAMPLE Manuscripts™ to control properties of individual fields (visibility, limits, defaults, options, workflow, etc.) according to the identity of the current user.

For more information about the security provided through EXAMPLE UserAdmin™, see the *EXAMPLE UserAdmin™ Overview* or the *EXAMPLE UserAdmin™ User Guide*.

Other EXAMPLE Express® Features

EXAMPLE Express® has the following additional features:

- **Support for policy statuses** — Carriers can define policy statuses that describe the various states of policies. Statuses can include:
 - **Quote** — The policy is in the quoting stage.
 - **Submitted** — An agent has requested that the quote become a policy.
 - **Referred** — The carrier needs additional information on the policy.
 - **In Force** — The policy is an in-force policy.
 - **Denied** — The policy has been denied coverage.

- **Cancelled** — The policy has been cancelled.
- **Support for historical records** — Users can view historical images of policies.
- **Support for deletion and purging** — EXAMPLE Express® supports the ability for individual users to mark quotes and policies for delete, and then for system administrators to remove the quotes and policies that have been marked for delete using a purge process in EXAMPLE UserAdmin™. System administrators can also use EXAMPLE UserAdmin™ to configure automatic deletion of expired quotes.
- **Ability to manage policy number blocks** — Users can manage the policy number blocks used for submission using EXAMPLE UserAdmin™.
- **Ability to move policies between agencies** — Users can move policies from one agency to another using EXAMPLE UserAdmin™.
- **Support for online help** — Users can access online help provided through Manuscript annotations. Annotations can be added to fields and pages in any EXAMPLE Manuscript™.
- **Support for online agency sign-up** — EXAMPLE Express® supports the ability for potential partners to apply for accounts.
- **Download capabilities** — Users can download the current session to their local machine in XML format.
