EXAMPLE Product Studio™ Overview

This document contains a description of EXAMPLE Product Studio™ in the EXAMPLE Platform®. It outlines the major uses of EXAMPLE Product Studio™ and the primary features that make it a powerful insurance product creation and modification tool.

What is EXAMPLE Product Studio™?

EXAMPLE Product Studio™ is a customizable desktop application that allows users to create, maintain, and remove insurance products. Working with EXAMPLE Server®, EXAMPLE Author®, and the Script Editor utility provided in the EXAMPLE Author® install, EXAMPLE Product Studio™ provides the ability to:

- Create, modify, and delete insurance products faster and easier than ever before.
- Manage insurance product creation and maintenance projects through a built-in task system.

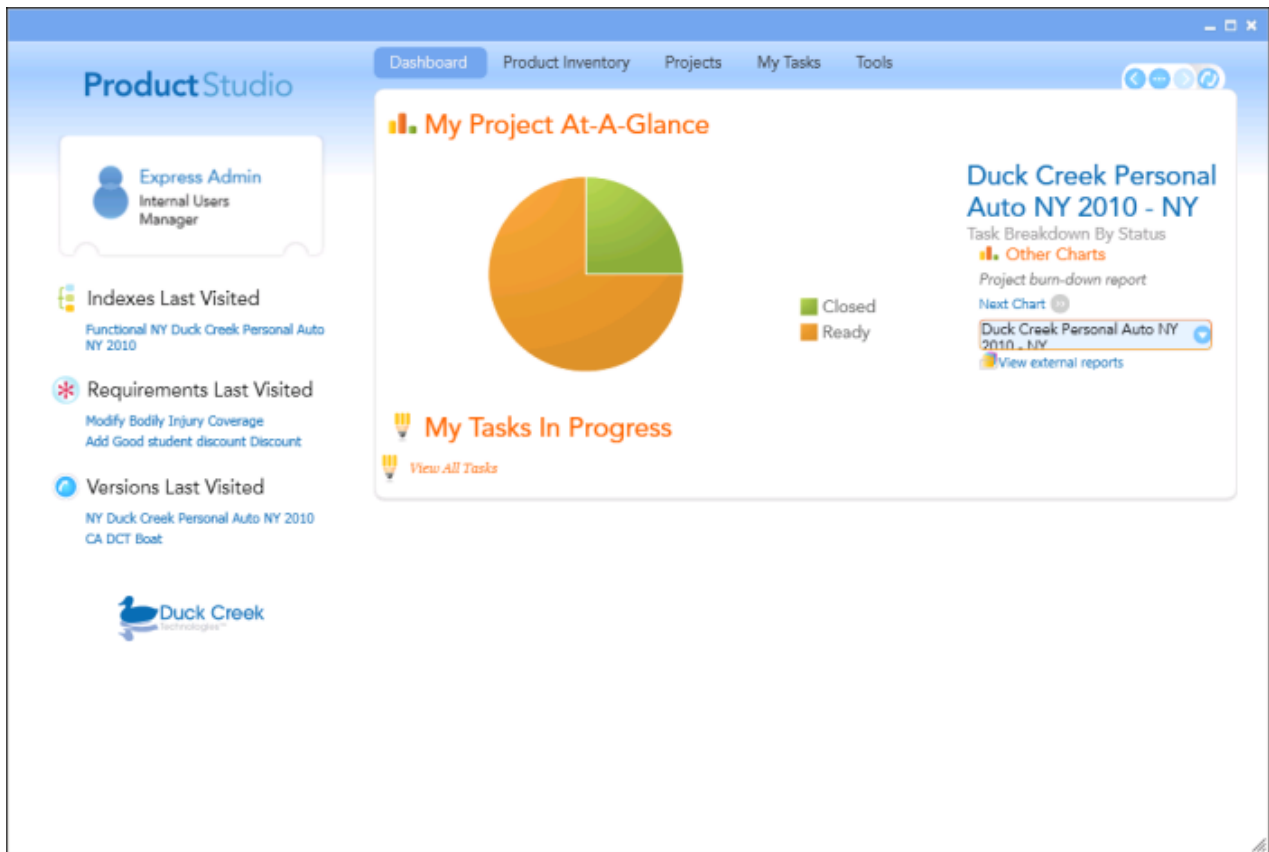

EXAMPLE Product Studio™ in the EXAMPLE Platform®

EXAMPLE Product Studio™ works with the following other EXAMPLE Platform® products to facilitate insurance product creation and modification:

- **EXAMPLE Server®** – Using scripts created with the Script Editor utility, EXAMPLE Server® performs the majority of the behind-the-scenes work required to create and modify insurance products with EXAMPLE Product Studio™.
- **EXAMPLE Author®** – EXAMPLE Product Studio™ provides a direct link to the different views (Fields, Tables, etc.) in EXAMPLE Author® to allow users to make changes to their Manuscripts.
- **EXAMPLE Manuscripts™** – Through the use of wizards, EXAMPLE Product Studio™ creates and/or modifies insurance products through EXAMPLE Manuscripts™. These Manuscripts contain the complete product definition that EXAMPLE Server® uses to collect data, run rules and rating, and control product workflow.

EXAMPLE Product Studio™ as an Insurance Product Creation/Maintenance System

EXAMPLE Product Studio™ is an insurance product creation and maintenance system that allows business users the ability to effortlessly create, maintain, and remove their insurance products. It provides support for any line of business or region, and enables product creation/modification in several ways.

Products

EXAMPLE Product Studio™ provides the ability to:

- Create new insurance products
- Maintain existing insurance products
- Perform rate/product changes

Projects

EXAMPLE Product Studio™ projects provide the ability to:

- Complete various tasks associated with a specific product version through the use of project requirements.
- View the workflow of any task related to a particular project.
- Monitor project status
- Gather and manage requirements

Wizards

EXAMPLE Product Studio™ wizards (powered by scripts created using the Script Editor utility) provide the ability to easily accomplish various tasks toward the modification of a product or the completion of a project.

What Does EXAMPLE Product Studio™ Do?

To understand EXAMPLE Product Studio™, you must first understand its major features. EXAMPLE Product Studio™ provides the following major features:

- A friendly, easy-to-use dashboard from which users can access the most recently viewed insurance products.
- A product inventory that allows users to easily view, modify, search for, and create new insurance products.
- A task management system that provides the ability to manage your insurance products throughout the entire product lifespan.

EXAMPLE Product Studio™ Dashboard Features

EXAMPLE Product Studio™ dashboard features include:

- **An Indexes Last Visited section** – Provides a list of the five last indexes visited. Users can navigate directly to the documentation tab of any of the indexes listed.
- **A Requirements Last Visited section** – Lists the last five requirements visited. Users can navigate directly to the Requirement Detail page for any of the requirements listed.
- **A Versions Last Visited section** – Contains a list of the last five product versions visited. Users can navigate directly to the Version Detail page for any of the versions listed.
- **An at-a-glance view of the completion status of a given project** – Includes a graph that illustrates what percentage of the projects' tasks are ready, active, OnHold, and closed. Users can select any project from the project list to view its status.
- **Links to Microsoft SQL reports** – Provide easy access to user-created reports for use with your insurance products. For information about using Microsoft SQL Reporting Services with EXAMPLE Product Studio™, see *Configuring SQL Reporting Services*.

EXAMPLE Product Studio™ Product Inventory Features

EXAMPLE Product Studio™ includes the following product inventory features:

- **View products** – View all of your insurance products, organized by type of insurance product (for example, Personal Lines, Specialty Lines, etc.). For information about viewing the details of your insurance products, see *Viewing Product Details* in the *EXAMPLE Product Studio™ User Guide*.
- **Add new products** – Add as many new insurance products as you need to. For information about adding new insurance products, see *Adding New Products* in the *EXAMPLE Product Studio™ User Guide*.
- **Modify existing products** – Change things like Product Name, Category, or Line of Business. For information about modifying insurance products, see *Editing Product Details* in the *EXAMPLE Product Studio™ User Guide*.
- **Remove existing products** – Mark any existing insurance product for deletion. For information about marking insurance products for deletion, see *Marking a Product for Deletion* in the *EXAMPLE Product Studio™ User Guide*.
- **Search** – Easily search all of your existing insurance products. For information about searching for a specific insurance product, see *Searching for Products* in the *EXAMPLE Product Studio™ User Guide*.

EXAMPLE Product Studio™ Task Management Features

EXAMPLE Product Studio™ includes the following task management features:

- **View your tasks** – View all tasks associated with the user currently signed in. For more information about viewing tasks, see *Viewing My Tasks* in the *EXAMPLE Product Studio™ User Guide*.
- **View task details** – View the details for a specific task. For more information about viewing task details, see *Viewing Task Details* in the *EXAMPLE Product Studio™ User Guide*.

- **Pick up tasks** – Pick up a task to add it to your task list. For more information about picking up tasks, see *Picking Up a Task* in the *EXAMPLE Product Studio™ User Guide*.
- **Start tasks** – Start work on a task in the task pool or in your task list. For more information about starting tasks, see *Starting a Task* in the *EXAMPLE Product Studio™ User Guide*.
- **Reassign tasks** – Reassign a task back to the task pool or to another user. For more information about reassigning tasks, see *Reassigning a Task* in the *EXAMPLE Product Studio™ User Guide*.
